INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the periods ending on June 30, 2023, and 2022, and December 31, 2022

INDEPENDENT AUDITOR'S REVIEW REPORT
(A free translation from the original in Spanish)

Santiago, July 28, 2023

To the Shareholders and Directors
Banco Santander Chile

Results of the review of interim consolidated financial information

We have audited the accompanying interim consolidated financial statements of Banco Santander Chile and subsidiaries, which comprise the interim consolidated statement of financial position as of June 30, 2023, and the related interim consolidated statements of income and other comprehensive income for the three and six-month periods ended June 30, 2023 and 2022, the related interim consolidated statements of cash flows and changes in equity for the six-month periods then ended, and the related notes to the interim consolidated financial statements (collectively referred to as interim consolidated financial information).

Based on our reviews, we are not aware of any significant modifications that should be made to the interim consolidated financial information to be in accordance with accounting standards and instructions issued by the Financial Market Commission.

Basis for the review results

We conducted our review in accordance with Generally Accepted Auditing Standards in Chile applicable to reviews of interim financial information. A review of interim financial information consists mainly of applying analytical procedures and making inquiries with those responsible for accounting and financial matters. A review of interim financial information is substantially less in scope than an audit performed in accordance with Chilean Generally Accepted Auditing Standards, the objective of which is the expression of an opinion on the interim financial information as a whole. Consequently, we do not express such an opinion. According to the ethical requirements relevant to our review, we are required to be independent of Banco Santander Chile and to comply with the other ethical responsibilities in accordance with such requirements. We believe that the results of the review procedures provide a reasonable basis for our conclusion.

Management's responsibility for the interim consolidated financial information

Management of Banco Santander Chile is responsible for the preparation and fair presentation of interim consolidated financial information in accordance with accounting standards and instructions issued by the Financial Market Commission. This responsibility includes the design, implementation and maintenance of a relevant internal control for the preparation and fair presentation of interim consolidated financial information that is free from material misstatement, whether due to fraud or error.

Santiago, July 28, 2023
Banco Santander Chile
2

Other matters – Consolidated statement of financial position as of December 31, 2022

On February 22, 2023, we issued an unqualified opinion on the consolidated financial statements of Banco Santander Chile and subsidiaries, as of December 31, 2022 and 2021, which include the consolidated statement of financial position as of December 31, 2022 presented in the accompanying interim consolidated financial statements, together with the related notes.

The accompanying notes form an integral part of the interim consolidated financial statements.

NOTE 01 – CORPORATE INFORMATION

Banco Santander-Chile is a banking corporation organised under the laws of the Republic of Chile, supervised by the Financial Market Commission (FMC). It is also subject to the regulations of the Securities and Exchange Commission of the United States of America (SEC), considering the Bank is listed on the New York Stock Exchange (NYSE) through an American Depositary Receipt (ADR) programme.

Banco Santander Spain manages Banco Santander Chile through its shareholdings in Teatinos Siglo XXI Inversiones SA and Santander Chile Holding SA, both subsidiaries controlled by Banco Santander Spain. As of June 30, 2023, Banco Santander Spain directly or indirectly owns 99.5% of Santander Chile Holding SA and 100% of Teatinos Siglo XXI Inversiones SA, which allows Banco Santander Spain control over 67.18% of the Bank's shares.

The Bank provides its clients with a wide range of general banking services, from individuals to large corporations. In addition, Banco Santander-Chile and its affiliates (collectively referred to as 'Bank' or 'Santander-Chile' hereafter) offer consumer and commercial banking services, as well as other services, including factoring, collection, leasing, securities and insurance brokerage, mutual and investment funds, investment fund management and investment banking.

The Bank's legal address is Calle Bandera No 140 Santiago de Chile, and its website is www.santander.cl

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Basis of preparation

These Interim Consolidated Financial Statements have been prepared following the Compendium of Accounting Standards for Banks (CASB), in its version applicable as of January 2022, as well as the instructions issued by the Financial Market Commission (FMC). The FMC, under Law No 21,000, provides in article 5.6 that the Financial Market Commission may set the rules for the preparation and presentation of the annual reports, balance sheets, statements of financial position and other financial statements of the supervised entities and determine the principles according to which they must keep their accounts. Regarding all matters that are not covered by this regulation, if they do not conflict with its instructions, then they must adhere to generally accepted accounting criteria corresponding to the technical standards issued by the Chilean Association of Accountants AG, which coincide with the International Financial Reporting Standards (IFRS) agreed by the International Accounting Standards Board (IASB). In case of discrepancies between the accounting principles and the accounting criteria issued by the FMC in its Compendium of Accounting Standards for Banks and instructions, the latter shall prevail.

The Bank uses certain currency terms and conventions for these Interim Consolidated Financial Statements. Thus, 'USD' stands for 'US dollar', 'EUR' stands for 'euro', 'CNY' stands for 'Chinese yuan', 'JPY' stands for 'Japanese yen', 'CHF' stands for 'Swiss franc', 'AUD' stands for 'Australian dollar' and 'UF' stands for 'Unidad de Fomento de Chile'.

The notes in the Interim Consolidated Financial Statements contain information in addition to that presented in the Interim Consolidated Statements of Financial Position, Interim Consolidated Income Statements, Interim Consolidated Statements of Other Comprehensive Income, Interim Consolidated Statements of Changes in Equity and Interim Consolidated Statements of Cash Flows. They provide narrative descriptions or disaggregation of such states in a clear, relevant, reliable and comparable manner.

b. Basis of preparation for the Interim Consolidated Financial Statements

The Interim Consolidated Financial Statements as of June 30, 2023, and 2022, and as of December 31, 2022, incorporate the individual interim financial statements of the Bank and those of companies over which the Bank exerts control (affiliates) and include the adjustments, reclassifying and eliminations necessary to abide by the accounting and measurement criteria established by IFRS 10 'Consolidated Financial Statements'. Control is achieved when the Bank:

- i. Has power over the investee (that is, it has rights that grant it the present capacity to manage the relevant activities of the investee);

Has exposure or rights to variable returns from its involvement with the investee; and

- ii. Has the ability to use its power over the investee to influence the amount of the investor's returns.

The Bank reassesses whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above. For example, when the Bank has less than most of the voting rights in an investee, but those voting rights are sufficient to have the ability to direct the relevant activities, then it is concluded that the Bank has control. The Bank considers all relevant facts and circumstances in assessing whether the Bank's voting rights in an investee are sufficient to give it power. These include:

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

- The size of the Bank's holding of voting rights relative to the size and dispersion of holdings of the other vote holders.
- The potential voting rights held by the Bank, other vote holders or other parties.
- The rights arising from other contractual agreements
- Any additional facts and circumstances that indicate that the Bank has or does not have the current ability to direct the relevant activities when decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Bank obtains control of the subsidiary and ceases when the Bank cedes control. Specifically, the income and expenses of a subsidiary acquired or disposed of during the period are included in the Interim Consolidated Statements of Income and Interim Statements of Other Comprehensive Income from the date the Bank gains control until the date the Bank ceases to control the subsidiary.

Profit or loss alongside each component of the Interim Consolidated Statements of Other Comprehensive Consolidated Income is attributed to the Bank's holders and non-controlling interest. The total comprehensive income of subsidiaries is attributed to the owners of the Bank and the non-controlling interests, even if this results in the non-controlling interests having a deficit in certain circumstances.

When necessary, adjustments are made to the financial statements of the subsidiaries to ensure their accounting policies are consistent with the Bank's accounting policies. All balances and transactions between consolidated entities are eliminated.

Changes in the consolidated entities' participation that do not result in the loss of control are accounted for as equity transactions. Accordingly, the equity carrying value of the Bank holders and the non-controlling interests are adjusted to reflect the changes in participation over subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration being paid or received is recognised directly in equity and attributed to the owners of the Bank.

The non-controlling interest represents the participation of third parties in the Bank's consolidated equity, which is presented in the Interim Consolidated Statements of Changes in Equity. Their share of the result for the year is shown as 'Profit attributable to non-controlling interest' in the Interim Consolidated Statements of Income.

The following table shows the composition of the entities over which the Bank can exercise control and, therefore, belong to the consolidation perimeter in such capacity:

i. Entities controlled by the Bank through participation in equity

	Activity Main	Place of Incorporation and operation	% Percentage of ownership								
			As of June 30, 2023			As of December 31, 2022			As of June 30, 2022		
			Direct	Indirect	Total	Direct	Indirect	Total	Direct	Indirect	Total
Santander Corredora de Seguros Limitada	Insurance brokerage	Santiago, Chile	99.75	0.01	99.76	99.75	0.01	99.76	99.75	0.01	99.76
Santander Corredores de Bolsa Limitada	Brokerage of financial instruments	Santiago, Chile	50.59	0.41	51.00	50.59	0.41	51.00	50.59	0.41	51.00
Santander Asesorías Financieras Limitada	Securities brokerage	Santiago, Chile	99.03	-	99.03	99.03	-	99.03	99.03	-	99.03
Santander SA Sociedad Securitizadora	Acquisition of loans and issuance of debt securities	Santiago, Chile	99.64	-	99.64	99.64	-	99.64	99.64	-	99.64
Klare Corredora de Seguros SA	Insurance brokerage	Santiago, Chile	50.10	-	50.10	50.10	-	50.10	50.10	-	50.10
Santander Consumer Finance Limitada	Automotive financing	Santiago, Chile	51.00	-	51.00	51.00	-	51.00	51.00	-	51.00
Santander Operadora de Tarjetas de Pago Santander Getnet Chile SA	Card Operator	Santiago, Chile	99.99	0.01	100.00	99.99	0.01	100.00	99.99	0.01	100.00

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Details of non-controlling interests are shown in Note 28 Equity letter g) Non-controlling interest (minority interests).

ii. Entities controlled by the Bank through other considerations

The following companies have been consolidated based on the fact that the Bank determines their relevant activities (these are companies complementary to the banking sector) and, therefore, over which the Bank exercises control:

- Santander Gestión de Recaudación y Cobranza Limitada: its exclusive activity is administering and collecting loans.
- Banca Santander SA: its main activity is financing revolving inventory lines for automotive dealers.
- Multiplica SpA: its primary purpose is the development of incentive programmes that encourage the use of payment cards.

iii. Associated entities

An associate is an entity over which the Bank can exercise significant influence but not control or joint control. This capacity is usually manifested in a 20% or more interest in the entity's voting rights and is accounted for using the equity method in accordance with IAS 28 'Investments in Associates and Joint Ventures'.

The following entities in which the Bank has an interest and are recognised using the equity method are considered 'associates':

Associates	Main Activity	Place of incorporation and operation	% Percentage of ownership		
			As of June 30, 2023	As of December 31, 2022	As of June 30, 2022
Redbanc SA	ATM service	Santiago, Chile	33.43	33.43	33.43
Transbank SA	Debit and credit card service	Santiago, Chile	25.00	25.00	25.00
Centro de Compensación Automatizado SA	Electronic funds transfer and compensation services	Santiago, Chile	33.33	33.33	33.33
Sociedad Interbancaria de Depósito de Valores SA	Repository of publicly offered securities	Santiago, Chile	29.29	29.29	29.29
Cámara Compensación de Alto Valor SA	Payment clearing	Santiago, Chile	15.00	15.00	15.00
Administrador Financiero del Transantiago SA	Administration of smart cards for public transportation	Santiago, Chile	20.00	20.00	20.00
Servicios de Infraestructura de Mercado OTC SA	Administration of the infrastructure for the financial market of derivative instruments	Santiago, Chile	12.48	12.48	12.48

In the case of the Cámara Compensación Alto Valor SA, Santander-Chile has a representative participating in its Board of Directors. Management has concluded that this entails an exercise of significant influence over the latter.

In the case of Servicios de Infraestructura de Mercado OTC SA, the Bank participates actively in its administration through its executives, which is why Management has concluded that it exercises significant influence over it.

iv. Share or rights in other companies

Entities over which the Bank has no control or significant influence are presented in this category. These equity instruments must be measured at fair value in compliance with IFRS 9 'Financial Instruments'. Nevertheless, the Bank may consider the cost an appropriate fair value estimate in concrete circumstances. This may be the case if the most recently available information is insufficient to measure the fair value or if a wide range of possible fair value measurements and the cost involved represents the best estimate of fair value within that range.

In another regard, the Bank may make an irrevocable decision to present subsequent changes to the fair value in other comprehensive income during its initial recognition. Subsequent changes in this valuation shall be recognised in 'Accumulated other comprehensive income - Items that will not be reclassified to profit or loss'. Dividends received from these investments are recorded in the Interim Consolidated Statement of Income under 'Result from investments in companies'. These instruments are not subject to the IFRS 9 'Financial Instruments' impairment model.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

c. Non-controlling interest

Non-controlling interest represents the portion of net income and net assets the Bank does not own, either directly or indirectly. It is presented as 'Attributable to owners of the Bank' separately in the Interim Consolidated Statements of Income and separately from the equity in the Interim Consolidated Statements of Financial Position.

In the case of entities controlled by the Bank through other considerations, profit and equity are presented fully as a non-controlling interest. This is because the Bank controls them but has no ownership expressed as a percentage.

d. Reporting segments

The Bank's operating segments are those units whose operating results are reviewed regularly by the highest authority regarding decision-making. Accordingly, two or more operating segments can be added into one only when the aggregation is consistent with the basic principle under the IFRS 8 'Operating Segments' and if the segments have similar economic characteristics and are alike in each one of the following aspects:

- i. The nature of the products and services;
- ii. The nature of production processes;
- iii. The type of client category for which its products and services are intended;
- iv. The methods used to distribute their products or provide services; and
- v. If applicable, the nature of the regulatory framework, e.g., banking, insurance, utilities.

The Bank reports separately for each operating segment that meets any of the following quantitative thresholds:

- i. Its reported revenues from ordinary activities, including both sales to external clients and intersegment sales or transactions, equal or exceed 10% of the combined revenues from all operating segments' ordinary internal and external activities.
- ii. The amount of its reported results is, in absolute terms, equal to or greater than 10% of the greater of (i) the combined profit reported by all operating segments that have not reported a loss; and (ii) the combined loss reported by all operating segments that have reported a loss.
- iii. Its assets equal or exceed 10% of the combined assets of all operating segments.

Operating segments that do not meet any of the quantitative thresholds may be considered reportable segments. The information must be disclosed separately if management believes it would be helpful to Interim Consolidated Financial Statements users.

Information regarding other business activities that do not correspond to reportable segments is combined and disclosed within the Corporate Activities category 'other'.

Concerning the above presented, the Bank's segments were obtained under the consideration that an operating segment is a component of an entity that:

- i. Engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses from transactions with other elements of the same entity).
- ii. Whose operating results are regularly reviewed by the entity's chief executive officer, who makes decisions about resources allocated to the segment and assesses its performance.
- iii. For which discrete financial information is available.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

e. Functional and presentation currency

The Bank, in 'The Effects of Changes in Foreign Exchange Rates' in IAS 21, has defined the Chilean Peso as its functional and presentation currency, as it is the currency of the primary economic environment in which the Bank operates, as well as the currency that influences in the cost and revenue structure. Therefore, all balances and transactions denominated in currencies other than the Chilean Peso are considered 'foreign currency'.

f. Foreign currency transactions

The Bank conducts transactions in amounts denominated in foreign currencies, mainly US dollars. The assets and liabilities denominated in foreign currencies held by the Bank and its affiliates are translated into Chilean Pesos at the market exchange rate corresponding to the end of the reported month (discounted spot rate), which amounted to \$800.94 per US\$ for June 2023 (\$922.12 per US\$ for June 2022 and \$849.59 for December 2022). For other currencies, an external price provider is used.

The net foreign exchange gain and loss includes recognising the effects of exchange rate changes on assets and liabilities denominated in foreign currencies and the profit and loss on foreign exchange spot and forward transactions undertaken by the Bank.

g. Cash and cash equivalents

The indirect method is used to prepare the Interim Consolidated Cash Flow Statements. This one starts with the Bank's consolidated pre-tax income and incorporates non-cash transactions, cash-flows-related income, and expenses of activities classified as investments or financing.

The following items are taken into consideration in the preparation of the Interim Consolidated Cash Flow Statements:

- i. Cash flows: inflows and outflows of cash and cash equivalents, defined as balances in items such as deposits with the Central Bank of Chile, deposits in domestic banks and deposits abroad.
- ii. Operating activities: these are the normal activities carried out by banks alongside other activities that cannot be classified as investments or financing.
- iii. Investing activities: these correspond to the acquisition, sale or disposal by other means of long-term assets and other investments not included in cash and cash equivalents.
- iv. Financing activities: those that result in changes to the size and composition of equity and liabilities that are not part of operating or investing activities.

h. Definitions, classification and measurement of financial assets/liabilities

i. Definitions

A 'financial instrument' is any contract that gives rise to a financial asset in an entity and a financial liability or equity instrument in another entity.

A 'financial asset' is any asset that is: (a) cash; (b) an equity instrument of another entity; (c) a contractual right to receive cash or another financial asset from another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity; or (d) a contract that will or may be settled using the entity's own equity instruments.

A 'financial liability' is any liability that is: (a) a contractual obligation to deliver cash or another financial asset to another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity; or (b) a contract that will or may be settled using the entity's equity instruments.

An 'equity instrument' is any contract that evidences a residual interest in the assets of the issuing entity after deducting all of its liabilities.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

A 'financial derivative' is a financial instrument whose value fluctuates in response to changes concerning an observed market variable (such as an interest rate, a foreign exchange rate, a financial instrument's price, or a market index, including credit ratings), whose initial investment is minimal compared with other financial instruments with a similar response to changes in market factors, and which is generally settled at a future date.

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in a transaction between market participants at the measurement date.

ii. Initial recognition

The Bank shall recognise a financial asset or financial liability only when it becomes part of the contractual terms of the instrument (rights and obligations).

A conventional purchase or sale of financial assets shall be recognised using trade date accounting or settlement date accounting.

iii. Classification of financial assets/liabilities

Classification of financial assets

Financial assets shall be classified into measurement categories based on the entity's business models for managing the financial assets and the contractual cash flow characteristics of said assets.

The business model refers to how the Bank manages its financial assets to generate cash flows. In other words, the entity's business model determines whether the cash flows will come by obtaining contractual cash flows, selling financial assets, or both.

Assessing the contractual flow characteristics (SPPI test) requires determining whether the asset's contractual flows are solely payments of principal on specified dates and interest on the principal outstanding amounts in the currency in which the financial asset is denominated. The principal is the fair value of the financial asset at initial recognition. Nevertheless, the principal amount may change over the life of the financial asset (if there are principal repayments). Interest is the compensation received for the time value of money and the credit risk related to the principal amount owed over a specified period, alongside other basic lending risks such as administrative costs and a profit margin.

For the assessment, the Bank conducted a test evaluating whether the contractual flows meet the criteria for a core lending arrangement. The Bank uses its professional assessment and considers relevant factors such as currency, interest rate (fixed or variable) and the period it sets.

The assessment of business models is not an instrument-by-instrument ranking approach but at a higher level of aggregation and considers all relevant evidence: model performance, risks affecting performance, and how managers are rewarded, among others.

According to the above, the objectives of the business models are:

- To hold assets to collect cash flows – through management that produces cash flows by collecting contractual payments throughout the instrument's life. Models with this goal allow for sales if they are infrequent (even if significant in value) or insignificant in value both individually and in aggregate (even if frequent), and even more so if they result from a substantial increment in risk or the risk management of credit concentration.
- To maintain for collection and sale of financial assets. Per this objective, the entity's key management personnel have decided that the supply of contractual cash flows and the sale of financial assets are essential to achieve the business model's goal. Therefore, there is a higher frequency and value of sales for this purpose.
- Other models - financial assets are measured at fair value through profit or loss if they are not held within a business model whose objective is to hold the assets to collect contractual cash flows or if their objective is achieved by obtaining contractual cash flows and selling financial assets. Assets are managed on a sales basis, and decisions are made on a fair value basis.

The Bank classifies its financial assets depending on whether they are subsequently measured at amortised cost, at fair value through other comprehensive income or at fair value through profit or loss.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Furthermore, at initial recognition of investments in equity instruments, an irrevocable decision can be made to present subsequent changes in fair value into other comprehensive income.

Due to the exceptional changes that have taken place in the market's liquidity, and which should remain in the short and medium term, the need arose for the Bank to maintain collateral with a maturity in the range of 2024 to 2026. This is due to the constitution of guarantees related to the Central Bank's Credit Facility Conditional to Incremental Flexibility programme (FCIC) and the demand to constitute larger technical reserves due to increased balances held by the Bank's clients. Therefore, the Bank determined to create a new business model called 'Held to collect investments', which aims to manage these higher levels of liquidity better. The Bank also has both the intention and the ability to hold them to maturity.

Classification of financial liabilities

An entity shall classify all financial liabilities as subsequently measured at amortised cost, except for derivative liabilities measured at fair value through profit or loss.

Reclassifying

Reclassifying occurs only when the business model for managing financial assets is changed. These changes are determined by top management due to external or internal changes. Financial liabilities are not reclassified.

iv. Measurement of financial assets/liabilities

Initial measurement

Financial assets and liabilities are initially measured at fair value (transaction price), plus or minus transaction costs in the case of a financial asset or financial liability that is not carried at fair value through profit or loss.

Subsequent measurement of financial assets

A financial asset shall subsequently be measured according to the following:

(a) Amortised cost

A financial asset is measured at amortised cost if the financial asset is held within a business model whose objective is to hold financial assets to earn cash flows, and the contractual terms of the financial asset give rise, at specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Interest income shall be calculated using the effective interest method. This method applies to financial assets and liabilities measured at amortised cost (interest income and interest expense). The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of the financial asset or the amortised cost of a financial liability.

(b) Fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if the financial asset is held within a business model whose objective is achieved by obtaining contractual cash flows and selling financial assets and if the contractual terms of the financial asset give rise, at specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(c) Fair value through profit or loss

A financial asset is measured at fair value through profit or loss unless measured at amortised cost or fair value through other comprehensive income.

(d) Irrevocable election to measure at fair value with changes in other comprehensive income.

Upon initial recognition of Investments in equity instruments, an election may be made to present subsequent changes in fair value in other comprehensive income that would otherwise be measured at fair value through profit or loss when not held for trading, except for dividend income, which is recognised in profit or loss for the period. Gains or losses arising from the derecognition of these equity instruments are not transferred to profit or loss.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Subsequent measurement of financial liabilities

Financial liabilities are subsequently measured at amortised cost, except for derivatives measured at fair value through profit or loss.

v. Derecognition of financial assets/liabilities

A financial asset shall be derecognised when and only when:

- (a) The contractual rights to the cash flow from the financial asset expire, or
- (b) It transfers the contractual rights to receive the cash flows of a financial asset or retains the contractual rights to receive the cash flows of a financial asset but assumes a contractual obligation to pay them to one or more recipients. Otherwise, if the risks and rewards of ownership of the financial asset are substantially transferred, the financial asset is derecognised.

In the case of unconditional sales, sales under repurchase agreements at fair value at the date of repurchase, sales of financial assets with a purchased call option or a written put option that is deeply out of the money, uses of assets where the transferor does not retain subordinated financing or grant any credit enhancement to the new owners, and other similar cases, the transferred financial asset is derecognised from the Consolidated Interim Statement of Financial Position with simultaneous recognition of any rights or obligations retained or created as a result of the transfer.

In the case of sales of financial assets under fixed-price repurchase agreements or using the sale price plus interest of securities lending agreements in which the borrower must return the same or similar assets and in other akin cases, the transferred financial asset is not derecognised from the Interim Consolidated Statements of Financial Position and continues to be measured on the same basis as before the transfer.

A financial liability is derecognised when and only when it is extinguished – that is, when the obligation specified in the contract is discharged, cancelled or expired. In the case of loans, the FMC requirements for derecognition apply. See letter o), VIII.

vi. Offsetting a financial asset with a financial liability

A financial asset and a financial liability shall be offset and presented by their net amount in the Interim Consolidated Statement of Financial Position when, and only when, there is at the moment a legally enforceable right to set off the recognised amounts and an intention to settle the net amount or to realise the asset and settle the liability simultaneously. As of June 30, 2023, and 2022, and as of December 31, 2022, the Bank has no financial asset/liability offsets.

i. Financial derivatives and accounting hedges

Derivatives are classified as either trading instruments or hedging instruments.

The Bank uses financial derivatives for the following purposes:

- i. To provide such instruments to customers who request them to manage their market and credit risks.
- ii. To use them for the risk management of the proprietary position of the Bank's entities and their assets and liabilities ('hedging derivatives').
- iii. To benefit from changes in the value of these derivatives (trading derivatives).

Trading derivatives are measured at fair value through profit or loss and are presented as assets/liabilities according to their positive or negative fair value. Derivatives that do not qualify as hedging instruments are accounted for as trading instruments.

The Bank has elected to continue to use the IAS 39 guidelines for hedge accounting. For a financial derivative to be considered a hedging derivative, all the following conditions must be met:

1. To cover one of the following three types of risk:
 - a. Changes in the value of assets and liabilities due to fluctuations in, among other things, inflation (UF), interest rates and/or exchange rates to which the position or balance to be hedged is subject ('fair value hedging').
 - b. Changes in the estimated cash flows arising from financial assets and liabilities, commitments and highly probable forecast transactions ('cash flow hedges').
 - c. The net investment in a foreign operation ('hedge of a net investment in a foreign operation').

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

2. To effectively eliminate some risk inherent in the hedged item or position for the entire expected term of the hedge, which entails that:
 - a. At the date of arrangement, the hedge is expected, under normal conditions, to be highly effective ('prospective effectiveness').
 - b. There is sufficient evidence that the hedge was effective during the life of the hedged item or position ('retrospective effectiveness').
3. There must be adequate documentation evidencing the specific designation of the financial derivative to hedge certain balances or transactions and how this effective hedge was expected to be achieved and measured, provided that this is consistent with the Bank's management of its risks.

The changes in the value of financial instruments qualifying for hedge accounting are recorded as follows:

- a. For fair value hedges, the gains or losses arising on both hedging instruments and the hedged items (attributable to the type of risk being hedged) are included as 'Net income (expense) from financial operations' in the Interim Consolidated Statement of Income.
- b. For fair value hedges of the interest rate risk of a portfolio of financial instruments ('macro-hedges'), gains or losses arising on measurement of the hedging instruments are recognised directly in the Interim Consolidated Income Statements under 'Interest and adjustment income'.
- c. For cash flow hedges, the effective portion of the change in the value of the hedging instrument is recorded in the Interim Consolidated Statements of Other Comprehensive Income in 'Valuation accounts - cash flow hedges' within equity.
- d. Differences in the valuation of the hedging instrument corresponding to the ineffective portion of cash flow hedging transactions are taken directly to the Interim Consolidated Income Statements in 'Net income from financial operations'.

If a derivative designated as a hedge, whether due to termination, ineffectiveness or any other cause, does not meet the above requirements, hedge accounting is discontinued. When 'fair value hedging' is discontinued, the fair value adjustments to the carrying amount of the hedged item arising from the hedged risk are amortised to gain or loss from that date, when applicable.

When cash flow hedges are discontinued, the cumulative gain or loss on the hedging instrument recognised in the Interim Consolidated Statements of Other Comprehensive Income in equity 'Valuation Accounts' (while the hedge was effective) continues to be recognised in equity until the hedged transaction occurs. At that time, it is recognised in the Interim Consolidated Statements of Income unless the transaction is not expected to occur, in which case it is recognised immediately in the Interim Consolidated Statements of Income.

Embedded derivatives in hybrid financial instruments

'Embedded derivatives' is a hybrid contract component that simultaneously includes a host contract that is not a derivative and a financial derivative that is not individually transferable. It has the effect that some of the cash flows of the hybrid contract vary in the same way as the embedded derivative would if taken alone. As of June 30, 2023, and 2022, and December 31, 2022, Banco Santander-Chile did not hold embedded derivatives in its portfolio.

j. Fair value of financial assets and liabilities

No transaction costs are deducted when financial assets and liabilities are measured at fair value. Assets and liabilities subsequently measured at amortised cost are not required to be measured at fair value.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

'Fair value' is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal market at the measurement date under current market conditions (i.e., an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. Fair value measurement is for a specific asset or liability. Therefore, in measuring fair value, the Bank considers the characteristics of the asset or liability in the same way that market participants would consider in pricing the asset or liability at the measurement date. In addition, the fair value measurement assumes that the transaction of selling the asset or transferring the liability takes place either: (a) in the principal market for the asset or liability or (b) in the absence of a principal market, the most advantageous market for the asset or liability.

When there is no market price for a given financial instrument, its fair value is estimated based on the price established in recent transactions involving similar instruments or, in the absence thereof, based on valuation models sufficiently contrasted by the international financial community, considering the specific peculiarities of the instrument to be valued and, in particular, the different types of risk related to the instrument.

When valuation techniques are used, they maximise the use of the relevant observable input data and minimise that of unobservable input data. For example, when an asset or a liability measured at fair value has a bid price and an asking price, the price within the bid-ask spread that is most representative of fair value in the circumstances shall be used to measure fair value regardless of where the input is categorised within the fair value hierarchy.

Although average prices are allowed as a practical resource to determine the fair value of an asset or a liability, the Bank makes an adjustment (FVA or fair value adjustment) when there is a gap between the purchase and sale price (close-out cost).

All derivatives are recorded in the Interim Consolidated Statements of Financial Position at fair value from the trade date. If their fair value is positive, they shall be recorded as an asset; if their fair value is negative, they shall be recorded as a liability. In the absence of evidence to the contrary, the trade date's fair value is deemed the transaction price. Changes in the fair value of derivatives from the trade date are recognised with a balancing entry in the Interim Consolidated Income Statements under 'Profit/(loss) on financial assets/liabilities held for trading at fair value through profit or loss'.

Specifically, the fair value of financial derivatives included in the trading books is deemed similar to their daily quoted price. If, for exceptional reasons, the quoted price cannot be determined on a given date, the fair value is calculated using similar methods to those used for over-the-counter (OTC) derivatives. The fair value of OTC derivatives is the sum of the future cash flows stemming from the instrument that have been discounted to the present value at the appraisal date ('present value' or 'theoretical closure') using valuation techniques commonly used by the financial markets: 'net present value' (NPV) and option pricing models, among other methods. Also, within the fair value of derivatives are included the Credit Valuation Adjustment (CVA) and the Debit Valuation Adjustment (DVA), aiming for the fair value of each instrument to include the credit risk of its counterparty and the Bank's own risk. The Counterparty Credit Risk (CVA) is a valuation adjustment to derivatives contracted in non-organised markets as a result of the exposure to counterparty credit risk.

The CVA is calculated considering the potential exposure to each counterparty in future periods. The Debit Valuation Adjustment (DVA) is a valuation adjustment similar to CVA but generated by the Bank's credit risk assumed by our counterparties. In the case of derivative instruments contracted with Central Clearing Houses, where the variation margin is contractually defined as a firm and irrevocable payment, this payment is considered part of the derivative's fair value.

For loans and advances covered by fair value hedging transactions, changes in their fair value related to the risk or risks covered in these hedging transactions are recorded.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Equity instruments and contracts related to them must be measured at fair value. Nevertheless, the Bank believes the cost is an appropriate fair value estimate in specific circumstances. This may be necessary, for example, if the recently available information is insufficient to measure the fair value or if a wide range of possible fair value measures exists, and the cost represents the best fair value estimate within that range. Furthermore, the Bank may irrevocably elect to present subsequent changes in the instrument's fair value in other comprehensive income.

As of June 30, 2023, and 2022, and December 31, 2022, no significant investments in listed financial instruments had ceased to be recorded at their quoted market value due to their market being unable to be considered active.

The amounts at which financial assets/liabilities are recorded represent, in all material respects, the Bank's maximum exposure to credit risk at each reporting date. The Bank also has collateral and other credit enhancements to mitigate its exposure to credit risk, consisting mainly of mortgages, cash, equity and personal guarantees, leased and rented assets, assets purchased under repurchase agreements, securities lending and credit derivatives.

Valuation techniques

According to IFRS 13 'Fair Value Measurement', a fair value hierarchy is established based on three levels: Level 1, Level 2 and Level 3, in which the highest priority is given to quoted prices (unadjusted) in active markets for identical assets and liabilities and the lowest priority to unobservable inputs.

Financial instruments at fair value and determined by published prices in active markets (Level 1) comprise government bonds, corporate bonds, exchange-traded derivatives, securitised assets, equities, short positions and issued bonds.

In cases where quotations cannot be observed, management best estimates what the market would price using its own internal models. In most cases, these internal models use data based on observable market parameters as significant inputs (level 2) and sometimes use significant unobservable inputs in market data (level 3). Various techniques are used to estimate it, including extrapolating observable market data. As a result, the most reliable evidence of the fair value of a financial instrument on initial recognition is the transaction price unless the value of that instrument can be derived from other market transactions by the same or a similar instrument or valued using a valuation technique in which the inputs used include only observable market data, mainly interest rates.

The main techniques used as of June 30, 2023, and 2022 and December 31, 2022 by the Bank's internal models to determine the fair value of financial instruments are described below:

- i. The present method is used in the valuation of financial instruments permitting static hedging (mainly forwards and swaps). Estimated future cash flows are discounted using the interest rate curves of the related currencies. The interest rate curves are generally observable market data.
- ii. In the valuation of financial instruments requiring dynamic hedging (mainly structured options and other structured instruments), the Black-Scholes model is normally used. Where appropriate, observable market inputs are used to obtain the bid-offer spread, exchange rates, volatility, correlation indexes and market liquidity.
- iii. For the valuation of certain financial instruments exposed to interest rate risks, such as interest rate futures, caps and floors, the present (future) value method and the Black-Scholes model (plain vanilla options) are used. The main inputs used in these models are observable market data, including the related interest rate curves, volatilities, correlations and exchange rates.

The fair value of the financial instruments calculated by the aforementioned internal models considers contractual terms and observable market data, including interest rates, credit risk, exchange rates, the quoted market price of shares and market rates of raw materials, volatility, prepayments and liquidity. In addition, the Bank's management verifies that the valuation models do not incorporate significant subjectivity. Therefore, if necessary, these methodologies can be adjusted and calibrated through internal calculations of fair value and subsequent comparison with the corresponding actively traded price.

The Bank has developed a formal process for the systematic valuation and management of financial instruments, implemented in all units included in the scope of consolidation. The governance structure of this process distributes responsibilities between two separate divisions: Treasury (responsible for the development, marketing and daily management of financial products and market data) and Market Risks (responsible for the periodic validation of valuation models and market data, the process of calculating risk metrics, policies for approving new transactions, market risk management and the implementation of valuation adjustment policies).

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Approving a new product involves several steps (application, development, validation, integration into corporate systems and quality review) before production. This process ensures that the rating systems are properly reviewed and stable before use.

Details of the most significant derivative products and families, together with their respective valuation techniques and inputs, by type of asset, are set out under Note 44 'Fair value of financial assets and liabilities' in these Interim Consolidated Financial Statements.

k. Fixed assets

This category includes the number of buildings, land, furniture, vehicles, computer hardware and other fixed assets owned by the consolidated entities or acquired under finance leases. Assets are classified according to their use as follows:

i. Fixed assets for own use

The fixed assets for own use include but are not limited to tangible assets received by the consolidated entities in full or partial satisfaction of financial assets representing accounts receivable from third parties intended to be held for continuing own use, and tangible assets acquired under finance leases. Accordingly, these assets are presented at the acquisition cost to which the related accumulated depreciation is subtracted along with, if applicable, any impairment loss resulting from comparing the net value of each item to the respective recoverable amount.

Depreciation is calculated using the straight-line method over the acquisition cost of assets minus their residual value, assuming that the land on which buildings and other structures stand has an indefinite life and is not subject to depreciation.

The Bank applies the following useful lives for the tangible assets that comprise its assets:

ITEM	Useful Life (Months)
Land	-
Paintings and works of art	-
Carpets and curtains	36
Computers and Hardware	36
Vehicles	36
ATMs and teleconsultations	60
Other machines and equipment	60
Office furniture	60
Telephone and communication systems	60
Security systems	60
Rights over telephone lines	60
Air conditioning systems	84
Other installations	120
Buildings	1,200

At each reporting period, the consolidated entities assess whether there is any indicator that the carrying amount of any tangible asset exceeds its recoverable amount. If this is the case, the asset's carrying amount is reduced to its recoverable amount. Future depreciation charges are adjusted under the revised carrying amount and to the new remaining useful life.

Likewise, the estimated useful lives of the items of property, plant and equipment held for own use are reviewed at the end of each reporting period to detect significant changes. If changes are detected, the useful lives of the assets are adjusted by correcting the depreciation charge to be recorded in the Interim Consolidated Statement of Income in future years based on the new useful lives.

Maintenance expenses relating to tangible assets held for own use are recorded as an expense in the period in which they are incurred.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

ii. Assets leased out under operating leases

The criteria used to record the acquisition cost of assets leased out under operating leases, to calculate their depreciation and their respective estimated useful lives, and to record their impairment loss, are the same criteria as those for fixed assets held for own use.

I. Leases

At the contract's creation, the Bank assesses whether it contains a lease or not. A contract contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for compensation. To assess whether a contract conveys the right to control the use of an identified asset, the Bank assesses whether:

- The contract involves using an identified asset. This may be specified explicitly or implicitly and should be physically distinct. The asset is not identified if the supplier has a significant substitution right.
- The Bank has the right to obtain all the economic benefits from using the asset throughout the contract's duration.
- The Bank has the right to direct the use of the asset – this is the decision-making purpose for which the asset is used.

a. As a lessee

The Bank recognises a right-of-use asset and a lease liability at the starting date of the lease according to the IFRS 16 'Leases'. The Bank's main contracts are with its related offices and branches necessary to undertake its activities.

In the beginning, the right-of-use asset is equal to the lease liability. It is calculated as the present value of the lease payments, which are discounted using the Bank's incremental interest rate at the starting date and considering each contract's duration. The average incremental interest rate is 1.61%. Subsequently, the asset is straight-line depreciated according to the contract's duration, and the financial liability is amortised in terms of the monthly payments. The financial interest is charged to net interest income, and the depreciation is charged to the depreciation expense of each financial year.

The lease's term encompasses non-cancellable periods stipulated within each contract. In the case of a lease contract with indefinite duration, the Bank has determined to assign a span equal to the longest of the non-cancellable period of its lease contracts. Contracts with a non-cancellable period of 12 months or less are treated as short-term leases. Therefore, the related payments are recorded as straight-line expenses. Any change in the lease term or rent is treated as a new measurement of the lease.

In the initial measurement, the Bank measures the right-of-use asset at cost. The rent of the lease contracts is agreed in UF and payable in Chilean pesos. According to Circular No 3,649 of the FMC, the monthly UF variation that affects all contracts established in such monetary units should be treated as a new measurement. Therefore, readjustments should be recognised as an amendment to the obligation, and in parallel, the amount of the related asset should be adjusted.

The Bank has not entered into lease agreements with guarantee clauses for residual value or variable lease payments.

b. As a lessor

When the Bank acts as a lessor, it first determines if the process corresponds to a financial or operating lease. To do this, the Bank evaluates whether it has substantially transferred all the risks and benefits of the asset. In the affirmative case, it corresponds to a financial lease. Otherwise, it is an operating lease.

The Bank recognises lease rentals received on a straight-line income basis over the lease term.

c. Third-party financing

The sum of present values of the lease payments receivable from the lessee is recognised as loans with third parties under 'Loans and receivables from customers' in the Interim Consolidated Statements of Financial Position. This includes the price of the lessee's right-to-call option by the end of the lease term when it is reasonably certain that the lessee will exercise said right. The financial income and expense derived from these contracts are recorded in the Interim Consolidated Income Statements under 'Interest income' and 'Interest expense', respectively, to achieve a constant return rate over the lease term.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

m. Factoring transactions

Factored receivables are valued at the amount disbursed by the Bank in exchange for invoices or other commercial instruments representing the credit the transferor assigns to the Bank. The price difference between the amounts disbursed and the actual face value of the credits is recorded as interest income in the Interim Consolidated Statement of Income using the effective interest method over the financing period. When the assignment of these instruments involves no liability on the part of the assignee, the Bank assumes the risks of insolvency of the parties responsible for payment.

n. Intangible assets

Intangible assets are non-monetary assets (identifiable separately from other assets) without physical substance arising from legal or contractual rights. The Bank recognises an intangible asset, whether purchased or self-created (at cost), when the asset's cost can be measured reliably. Additionally, the future economic benefits attributable to the asset are expected to flow into the Bank.

To calculate intangible assets, they are recorded initially at their acquisition or production cost, from which the accumulated amortisation and accumulated impairment loss are subtracted.

Internally developed computer software is recorded as an intangible asset if, among other requirements (primarily the Bank's ability to use or sell it), it can be identified, and its ability to generate future economic benefits can be demonstrated.

Intangible assets are amortised linearly based on their estimated useful life, defined by default at 36 months. They can be modified if the extent to which the Bank will benefit from its use for a different period than the mentioned above is demonstrated.

Expenditure on research activities is recorded as the expense incurred in the year and cannot be subsequently capitalised.

o. Non-current assets held for sale

Non-current assets held for sale and discontinued operations

Per the IFRS 5, 'Non-current assets held for sale and discontinued operations', a non-current asset is classified as held for sale if its carrying amount will be recovered mainly through a sale transaction rather than through continued use.

To apply the above classification, the asset must meet the following requirements:

- It must be available in its current conditions for immediate sale, and selling must be highly probable.
- For it to be highly probable, the appropriate management level must be engaged in a plan to sell the asset (or group of assets for its disposal). Also, a program to find a buyer and completing said purchase must have been actively initiated.
- Furthermore, the sale should be expected to qualify for recognition as a completed sale within one year of the classification date.

Assets classified as such shall be measured at the lower carrying amount or fair value with fewer selling costs.

Assets received or awarded in lieu of payment

All assets received or awarded as credit payments and receivables from customers are recorded – in the case of dation in payment – at a price agreed between the parties or, conversely, in those cases in which there is no agreement between the parties, at the amount at which the Bank is awarded such assets in a judicial auction. In both cases, an independent assessment of the market value of the goods is determined based on the state in which they are acquired.

If there is an excess of loans and receivables over the fair value of the goods received or foreclosed in payment when the selling cost is subtracted, they are recognised in the Interim Consolidated Income Statements under 'Provision for credit risk'.

These goods are subsequently valued at the lower amount between the initially recorded figure and the net realisable value, which corresponds to their fair value (liquidation value determined through an independent appraisal) minus their respective costs of sale. The differences between the two are recognised in the Interim Consolidated Income Statements under 'Other operating expenses'.

At the end of each year, the Bank analyses to review the cost of sale of assets received or foreclosed in payment, which is then applied from that date onwards and into the following year. In December 2022, the average cost was estimated at 5.8% of the appraised value (4.0% as of December 31, 2021). In addition, a review of the appraisals (independent) is carried out every 18 months to adjust the fair value of the assets.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

These assets are generally estimated to be disposed of within one year from the award date. Under article 84 of the General Banking Law, assets not sold within this period are penalised through a single instalment. On March 25, 2021, the FMC issued Circular No 2247 granting an additional 18 months for the disposal of all assets that financial institutions have received in payment or are awarded between March 1, 2019 and December 31, 2021, also allowing these assets' write-off to be made in instalments proportional to the number of months between the date of their receipt and that set by the Bank for their disposal.

p. Income and expense recognition

The most important criteria used by the Bank to recognise its revenues and expenses are summarised as follows:

i. Interest revenue, interest expense, and similar items

Interest income, interest expense and similar items are recognised on an accrual basis using the effective interest rate method.

Nevertheless, the Bank ceases to recognise income on an accrual basis when a loan or one of its instalments is 90 days overdue. This means that interest, adjustments or commissions are not recognised in the Interim Consolidated Income Statement unless received.

These interest and readjustments are generally referred to as 'suspended' and are recorded in memorandum accounts, which do not form part of the Interim Consolidated Statements of Financial Position but are reported as part of the supplementary information therein (Note 30 and 31).

Interest incomes of previous 'transactions with suspended accrual' are only recognised again when the debtor is up to date with its obligations.

ii. Commissions, fees and similar items

Fee and commission income and expenses are recognised in the Interim Consolidated Income Statements using the criteria set out in IFRS 15, 'Revenue from contracts with customers'.

Under IFRS 15, 'Revenue from contracts with customers', the Bank recognises revenue when it satisfies its performance obligations by transferring the service (an asset) to the customer. Under this definition, an asset is transferred when the customer obtains control over the asset. The Bank considers the contractual terms and its traditional business practices for determining the transfer price. The transfer price is the amount of compensation the entity expects to be entitled in order to transfer committed goods and services to the customer, excluding amounts collected on behalf of third parties.

The Bank consistently applies the recognition method for each performance obligation, whether it satisfies the performance obligation over time or satisfies the performance obligation at a specific point in time.

The main income arising from commissions, fees, and similar items are:

- Credit prepayment fees, which include fees related to customer prepayments of credit operations.
- Fees and commissions on loans with letters of credit, which comprise fees and commissions related to granting loans with letters of credit.
- Credit lines and overdraft fees, which refer to fees accrued during the year to grant credit lines and current account overdrafts.
- Fees for guarantees and letters of credit, which include fees accrued during the year to grant payment guarantees for real or contingent third-party obligations.
- Card service fees. These refer to fees earned and accrued for the year related to credit, debit and other cards.
- Account administration fees. These comprise fees incurred to maintain current, savings and other accounts.
- Fees and commissions for collections and payments, which include fees and commission income generated by the Bank's collections and payment services.
- Commissions for brokerage and handling securities, which refer to income from commissions generated on brokerage, placements, administration, and custody of securities.
- Remuneration for the administration of mutual funds, investment funds or others, which comprises commissions from fund management companies separated by type of client (natural or legal person).
- Insurance intermediation and consultancy fees, which include income generated through insurance sales, separated by the type of insurance brokered.
- Fees for financial leasing transaction services, which refer to those financial leasing services in which the Bank acts as a lessor.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

- Securitisation fees, which include fees for securitisation services.
- Fees for financial advisory services, which comprise those involved in advisory services concerning the issuance and placement of financial instruments, restructuring and funding financial liabilities, sale and purchase of companies, and others.
- Other commissions earned, which include income generated by currency exchanges, issuing demand vouchers and guarantee slips, trust commissions, foreign trade operations, student loan administration, and other services.

Commission expenses comprise:

- Card transaction fees, which involve commissions generated by credit cards, debit cards and the provision of funds related to the income generated from card service fees.
- Card brand licence fees. These are fees paid to the main card brands: credit, debit and provision of funds.
- Other fees for services linked to the credit card system and cards with the provision of funds.
- Expenses for loyalty and merit programme obligations for card clients. They refer to expenses related to customer benefit programmes related to the use of cards.
- Fees for securities transactions. They comprise fees for deposit, safekeeping and brokerage of securities, investments in mutual funds, stock exchanges, central counterparty and market infrastructure services.
- Other fees for services received. They include securities services, foreign trade, correspondent banking, ATMs and wire transfer fees.
- Fees for clearing high-value payments, which include fees to ComBanc, CCLV, etc.

The relationship between the segment note and the disaggregated income is presented in Note 32 Commissions.

The Bank maintains loyalty programmes linked to its credit card services, which under IFRS 15 'Revenue from contracts with customers', have the necessary provisions to meet the delivery of committed performance obligations to come. Such obligations are settled immediately upon incurrence.

iii. Non-financial income and expenses

They are recognised under the criteria established in IFRS 15, 'Revenue from contracts with customers', identifying the performance obligation and when they are satisfied (accrued).

iv. Commissions in the formalisation of loans

Financial fees and commissions arising on the origination of loans, mainly origination or arrangement fees and information fees, are accrued and recognised in the Interim Consolidated Statements of Income over the life of the loan.

q. Provisions for credit risk on loans and receivables and contingent liabilities

The Bank permanently evaluates the entire portfolio of loans and contingent loans, as established by the FMC, to promptly create sufficient provisions to cover the expected loss linked with the debtors' characteristics and credits based on payment and subsequent recovery.

The Bank uses the following models established by the FMC and approved by the Board of Directors to assess its loan and contingent loan portfolio:

- Individual assessment of debtors – This applies to debtors recognised as individually significant, that is, with substantial levels of debt, and to those who, even if not significant, are not able to be classified in a group of financial assets with similar credit risk characteristics, and which, due to their size, complexity or level of exposure, require detailed analysis.
- Group assessment of obligors - Group assessments are relevant for residential mortgage and consumer credit exposures, in addition to commercial student credit exposures and exposures to obligors that simultaneously meet the following conditions:
 - i. The Bank has an aggregate exposure to the same counterparty of less than UF 20,000. The aggregate exposure is considered the gross of provisions or other mitigants and includes housing mortgages in its calculation. Concerning off-balance sheet items (contingent claims), the gross amount is calculated by applying the credit translation factors defined in Chapter B-3 of the Compendium of Accounting Standards for Banks.
 - ii. Each aggregate exposure to a single counterparty does not exceed 0.2% of the total portfolio related to the group-rated loans.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Group assessments are suitable for dealing with many transactions with low individual amounts and involving individuals or small companies. The Bank groups debtors with similar credit risk characteristics by associating each group with a certain probability of non-performing and a recovery rate based on a substantiated historical analysis. To this end, the Bank implemented the standard model for mortgage and commercial loans and the internal model for consumer loans.

I. Allowances for individual assessments

The individual assessment of trade debtors is necessary, as established by the FMC, in the case of companies that require detailed knowledge and analysis due to their size, complexity, or level of exposure to the entity.

The analysis of debtors focuses firstly on their credit quality. Then, it classifies them in the risk category corresponding to the debtor and their respective credit operations and contingent loans after assigning them to one of the three portfolio statuses: Standard, Substandard and Impaired. The risk factors used in the allocation are the industry or sector, business situation, partners and management, their financial situation and ability to pay, and payment behaviour.

The portfolio categories and their definitions are as follows:

- i. Normal Portfolio includes debtors with a payment ability to meet their obligations and commitments. Evaluations of the current economic and financial environment do not indicate that this will change. The classifications assigned to this portfolio are categories from A1 to A6.
- ii. Substandard Portfolio includes debtors with financial difficulties or significant deterioration of their payment ability. There is reasonable doubt concerning the future reimbursement of the capital and interest within the contractual terms, with limited ability to meet short-term financial obligations. The classifications assigned to this portfolio are categories from B1 to B4.
- iii. Impaired Portfolio includes debtors and loans in which repayment is considered remote, with a reduced or no likelihood of repayment. This portfolio includes debtors who have stopped paying their loans or who indicate that they will stop paying, as well as those who require forced debt restructuring, reducing the obligation or delaying the term of the capital or interest and any other debtor who is overdue by 90 days or more in their payment of interest or capital. The classifications assigned to this portfolio are categories from C1 to C6.

Normal and Substandard Compliance Portfolio

As part of individual assessment, the Bank classifies debtors into the following categories, assigning them a probability of non-performance and severity, which result in the expected loss percentages:

Portfolio	Debtor's Category	Probability of Non-Performance (%)	Severity (%)	Expected Loss (%)
Normal Portfolio	A1	0.04	90.0	0.03600
	A2	0.10	82.5	0.08250
	A3	0.25	87.5	0.21875
	A4	2.00	87.5	1.75000
	A5	4.75	90.0	4.27500
	A6	10.00	90.0	9.00000
Substandard Portfolio	B1	15.00	92.5	13.87500
	B2	22.00	92.5	20.35000
	B3	33.00	97.5	32.17500
	B4	45.00	97.5	43.87500

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

The first step to determine the number of provisions is to assess the affected exposure, which comprises the book value of loans plus contingent loans, minus the amounts that are feasible to recover through the activation of the financial or real guarantees covering the operations. The respective loss percentages are applied to this exposure result. In the case of collateral, the Bank must demonstrate that the value assigned to the deduction reasonably reflects the value realised at the disposal of the assets or equity instruments. If the debtor's credit risk is substituted for the guarantor's credit quality, this methodology will only apply if the guarantor or surety is an entity qualified in a category similar to the investment grade of a local or international rating agency recognised by the FMC.

Furthermore, guaranteed securities cannot be deducted from the exposure amount. Only financial guarantees and collateral can be considered.

Notwithstanding the above, the Bank must maintain a minimum provision of 0.5% over loans and contingent loans in the normal portfolio.

Non-performing Portfolio

The impaired portfolio includes all loans and the entire value of contingent loans of the debtors overdue by 90 days or more on the payment of interest or principal of any loan at the end of the month. It also includes debtors who have been granted a loan to refinance loans overdue by 60 days or more and debtors who have undergone forced restructuring or partial debt forgiveness.

The impaired portfolio excludes: a) residential mortgage loans, with payments overdue less than 90 days; and b) loans to finance higher education according to Law No 20,027, provided the breach conditions outlined in Circular No 3454 of December 10, 2008, are not fulfilled.

The provision for an impaired portfolio is calculated by determining the expected loss rate for the exposure, adjusting for amounts recoverable through available financial guarantees and deducting the present value of recoveries made through collection services after the related expenses.

Once the expected loss range is determined, the related allowance rate is applied over the exposure amount, including loans and contingent loans related to the debtor.

The allowance rates applied over the calculated exposure are as follows:

Classification	Estimated range of loss	Allowance
C1	Up to 3%	2%
C2	Between 3% and 20%	10%
C3	Between 20% and 30%	25%
C4	Between 30% and 50%	40%
C5	Between 50% and 80%	65%
C6	More than 80%	90%

All the obligor's loans are maintained in the impaired portfolio until its payment ability is normalised, notwithstanding the charge-off of each particular credit that meets Title II of Chapter B-2 of the CASB. Once the circumstances that led to classification in the Impaired Portfolio have been overcome, the debtor can be removed from this portfolio once all the following conditions are met:

- i. The debtor has no obligations overdue with the Bank by 30 days or more.
- ii. The debtor has not been granted loans to pay its obligations.
- iii. At least one of the payments includes the amortisation of capital.
- iv. If the debtor has made partial loan payments in the last six months, two payments must already be made.
- v. Four consecutive instalments have been made if the debtor must pay monthly instalments for one or more loans.
- vi. The debtor does not appear to have bad debts in the information provided by the FMC, except for insignificant amounts.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

II. Allowances for group assessments

Group assessments are relevant for residential mortgage and consumer credit exposures, in addition to commercial student credit exposures and debtor exposures that simultaneously meet the following conditions:

- i. The Bank has an aggregate exposure (the exposure on the same Business Group at a consolidated level) to the same counterparty of less than UF 20,000. The aggregate exposure is considered the gross of provisions or other mitigants and includes housing mortgages in its calculation. Concerning off-balance sheet items (contingent claims), the gross amount is calculated by applying the credit translation factors defined in Chapter B-3 of the Compendium of Accounting Standards for Banks.
- ii. Each aggregate exposure to a single counterparty does not exceed 0.2% of the total portfolio related to the group-rated loans.

For determine provisions, group assessments require the creation of groups of loans with homogeneous qualities in terms of the type of debtors and agreed conditions to establish, using technically sound estimates and prudential criteria, both the payment behaviour of the group and the recoveries of its non-performing loans. This is done using a model based on the characteristics of debtors, payment history, outstanding loans and delinquency, among other relevant factors.

The Bank uses credit risk methodologies based on internal and/or standard models to estimate provisions for the group-assessed portfolio. These include commercial loans for debtors not individually assessed, housing loans and consumer loans (including instalment loans, credit cards and overdraft facilities). This methodology helps to independently identify the portfolio's performance one year ahead and determine the provision necessary to cover the losses arising in the period of one year from the balance sheet date.

Customers are segmented according to their internal and external characteristics into groups or profiles to differentiate the risk of each portfolio in a more appropriate and orderly manner (customer-portfolio model); this is known as the profiling method.

The profiling method is based on a statistical construction method, constituting a relationship through a logistic regression between variables such as delinquency, external behaviour, socio-demographic variables, and a response variable that determines the customer's risk. In this case, delinquency is equal to or greater than 90 days. Hence, common profiles are established and assigned a Probability of Non-Performance (PNP) and a recovery rate based on a historical analysis known as Severity (SEV).

Therefore, once the customers have been profiled and the loan's profile assigned a PNP and a SEV, the exposure at default (EXP) is calculated. This exposure includes the book value of the loans and receivables from the customer, plus contingent loans, minus any amount that can be recovered by activating guarantees (for credits other than consumer loans).

Notwithstanding the above, in establishing provisions related to mortgage and commercial loans, the Bank must recognise minimum provisions according to standard methods established by the FMC for those types of loans. While this is considered a conservative minimum base, it does not relieve the Bank of its responsibility to have its own methodologies for determining adequate provisions to protect the portfolio's credit risk. Provisions must be made considering the higher value obtained between the respective standardised method and the internal method.

Standard method of group portfolio provisioning

i. Mortgage portfolio

Under the CASB, the Bank applies the standard provisioning method for residential mortgages. Under this method, the expected loss factor applicable to the number of residential mortgage loans will depend on the delinquency of each loan and the ratio, at the end of each month, between the outstanding principal amount of each loan and the value of the mortgage collateral (LTV) that protects it.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

The relevant provisioning factor according to delinquency and LTV is as follows:

LTV Range	Days past due at month-end	0	1-29	30-59	60-89	Non-performing portfolio
LTV ≤ 40%	PI (%)	1.0916	21.3407	46.0536	75.1614	100
	PDI (%)	0.0225	0.0441	0.0482	0.0482	0.0537
	PE (%)	0.0002	0.0094	0.0222	0.0362	0.0537
40% < LTV ≤ 80%	PI (%)	1.9158	27.4332	52.0824	78.9511	100
	PDI (%)	2.1955	2.8233	2.9192	2.9192	3.0413
	PE (%)	0.0421	0.7745	1.5204	2.3047	3.0413
80% < LTV ≤ 90%	PI (%)	2.5150	27.9300	52.5800	79.6952	100
	PDI (%)	21.5527	21.6600	21.9200	22.1331	22.2310
	PE (%)	0.5421	6.0496	11.5255	17.6390	22.2310
LTV > 90%	PI (%)	2.7400	28.4300	53.0800	80.3677	100
	PDI (%)	27.2000	29.0300	29.5900	30.1558	30.2436
	PE (%)	0.7453	8.2532	15.7064	24.2355	30.2436

LTV= (Loan-to-Value Ratio) unpaid loan principal/value of the mortgage collateral.

This standardised approach will also be applied to residential leasing transactions, following the same criteria described above and considering the leased asset value equivalent to the amount of the mortgage collateral.

If the same debtor holds more than one residential mortgage loan with the Bank and one is overdue by 90 days or more, all these loans will be assigned to the non-performing portfolio, with provisions calculated for each according to their respective LTV percentages.

In the case of housing mortgage loans linked to housing and subsidy programmes of the State of Chile, provided that they are contractually covered by the auction insurance supplied by the latter, the provisioning percentage may be weighted by the loss mitigation (LM) factor, which depends on the LTV percentage and the value of the house in the deed of sale (V). Therefore, the LP factors to be applied to the corresponding provisioning percentage are presented in the table below:

LTV Range	Loss mitigation (LM) factor for loans with state auction insurance	
	Segment V: Deeded house price (UF)	
	V<1,000	1,000< V ≤ 2,000
LTV ≤ 40%	100	
40% < LTV ≤ 80%		
80% < LTV ≤ 90%	95	96
LTV > 90%	84	89

ii. Commercial portfolio

Following the CASB, the Bank applies the standard model of provisions for commercial loans in the group portfolio, depending on whether it corresponds to commercial leasing, student or other commercial loans.

Before implementing the standard method, the Bank used internal models to determine group business provisions.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued**a. Commercial leasing operations**

The provision factor must be applied to the current value of commercial leasing operations (including the call option) for these operations. Therefore, it will depend on the delinquency of each operation, the type of leased asset and the relationship, at the closing of each month, between the current value of each operation and the value of the leased asset (PVB), as indicated in the following tables:

Probability of Non-Performance (PNP) applicable according to delinquency and type of asset (%)		
Days past due at the end of the month	Type of asset	
	Real estate	Non-real estate
0	0.79	1.61
1-29	7.94	12.02
30-59	28.76	40.88
60-89	58.76	69.38
Non-performing portfolio	100.00	100.00

Probability of Non-Performance (PNP) applicable by PVB range and type of asset (%)		
PVB range (*)	Real estate	Non-real estate
PVB ≤ 40%	0.05	18.2
40% < PVB ≤ 50%	0.05	57.00
50% < PVB ≤ 80%	5.10	68.40
80% < PVB ≤ 90%	23.20	75.10
PVB > 90%	36.20	78.90

(*) PVB= Current value of operation/leased asset value

The PVB ratio will be determined considering the appraisal value, expressed in UF for real estate and Pesos for non-real estate, recorded at the time of granting the respective credit, considering any situations that may be causing pricing rises of the asset at that time.

b. Student loans

For these operations, the provision factor should be applied to the student loan and the exposure of the contingent loans, when applicable. The determination of this factor depends on the type of student loan and the enforceability of the payment of capital or interest at the end of each month. Where payment is due, the factor will also depend on the delinquency of the payment.

For the loan classification, a distinction is made between those granted for financing higher studies under Law No 20,027 (CAE) and, on the other hand, the CORFO guarantee credits or other student loans.

Probability of Non-Performance (PNP) according to enforceability, delinquency and type of loan (%)			
Presents payment enforceability or interest at month-end	Days past due at month-end	Type of student loan	
		CAE	CORFO and others
Yes	0	5.20	2.90
	1-29	37.20	15.00
	30-59	59.00	43.40
	60-89	72.80	71.90
	Non-performing portfolio	100.00	100.00
No	N/A	41.60	16.50

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Probability of Non-Performance (PNP) applicable by PVB range and type of asset (%)		
Presents payment enforceability or interest at month-end	Type of student loan	
	CAE	CORFO and others
Yes		70.90
No	50.30	45.80

c. Generic commercial loans and factoring

For factoring transactions and other commercial loans, the provisioning factor, applicable to the amount of the loan and the contingent loan exposure, will depend on the delinquency of each transaction and the ratio at the end of each month between the debtor's obligations to the Bank and the value of the collateral (PTVG) securing them, as indicated in the following tables:

Probability of Non-Performance (PNP) applicable according to delinquency and PTVG range (%)			
Days past due at month-end	Guarantee		
	PTVG ≤ 100%	PTVG > 100%	No guarantee
0	1.86	2.68	4.91
1-29	11.60	13.45	22.93
30-59	25.33	26.92	45.30
60-89	41.31	41.31	61.63
Non-performing portfolio	100.00	100.00	100.00

Severity (SEV) applicable according to PTVG range (%)			
Guarantee (with/without)	PTVG Range	Factoring and other commercial loans without responsibility	Factoring with responsibility
Guarantee	PTVG ≤ 60%	5.00	3.20
	60% < PTVG ≤ 75%	20.30	12.80
	75% < PTVG ≤ 90%	32.20	20.30
	90% < PTVG	43.00	27.10
No guarantee		56.90	35.90

The guarantees used to calculate the PTVG ratio of this method may be of a specific or general nature, including those that are both specific and general. However, a guarantee can only be considered if, according to the respective coverage clauses, it was set in the first degree of preference in favour of the Bank and only guarantees the debtor's credits concerning which it is attributed (not shared with other debtors).

The invoices assigned in the factoring operations, or the guarantees linked to mortgage loans, regardless of their coverage clauses, will not be considered in the calculation.

The following considerations must be taken into account when calculating the PTVG ratio:

- Transactions with specific guarantees: those in which the debtor provided specific guarantees for generic commercial loans and factoring. The PTVG ratio is calculated separately for each secured transaction as the division between the loan amount and the contingent loan exposure over the collateral's value.
- Transactions with general guarantees: when the debtor is granted general or general and specific guarantees, the Bank calculates the corresponding PTVG jointly for all generic commercial loans, factoring and operations not contemplated in the above paragraph i), as the division between the sum of the amounts of loans and contingent loan exposures over the general or specific guarantees that, according to the scope of the remaining hedge clauses, protect the credits considered in the numerator of the ratio mentioned above.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

The amounts of collateral used in the PTVG ratio in (i) and (ii) should be determined according to the:

- Type of real guarantee, the guarantee's last valuation is its appraisal or fair value. Therefore, the criteria in Chapters 7-12 of the Updated Collection of Standards should be considered to determine fair value.
- Possible situations that could be causing temporary increases in the values of the guarantees.
- Limitations on the amount of coverage established in their respective clauses.

III. Provisions for contingent loans

Contingent loans are transactions or commitments in which the Bank assumes a credit risk by obliging itself vis-à-vis third parties upon a future event to make a payment or disbursement to be recovered from its clients.

To calculate the provisions as indicated in Chapter B-1 of the CASB, the amount of exposure to be considered shall be equal to the percentage of the contingent claim amounts indicated below:

Type of loan	Credit Translation Factors (FCC)
Immediately repayable unrestricted credit lines	10%
Contingent loans linked to CAE	15%
Letters of credit for goods movement operations	20%
Other unrestricted credit lines	40%
Debt purchase commitments in local currencies abroad	50%
Transactions related to contingent events	50%
Guarantees and sureties	100%
Other credit commitments	100%
Other contingent loans	100%

In the case of transactions with clients with non-performing loans, such exposure shall always equal 100% of their contingent loans.

IV. Guarantees and credit enhancements

Guarantees are only considered in calculating provisions when they are legally established and when the conditions allowing their eventual activation or settlement in the Bank's favour are met.

Collateral valuation (mortgages or pledges) reflects the net cash flow obtained from selling goods or equity instruments, or from capital minus estimated expenses, in the event of a debtor's non-performance.

For mortgages and pledges on goods, the Bank undertakes analyses highlighting the relationship between the prices obtained in an eventual settlement and their appraisal or foreclosure values. Nevertheless, the valuations of mortgages and other goods received are based on valuations carried out by independent professionals, while maintenance and transaction costs are based on historical data from at least three years prior. The Bank has the necessary collateral revaluation policies in place.

Financial guarantees, measured through fair value adjustments, may only be deducted from credit risk exposures when they are provided to secure the performance of the credits concerned. The adjusted fair value is obtained by applying the interest rate and currency volatility discount factors established by the FMC and subtracting settlement costs.

Determining provisions in the case of leased assets considers the value obtained on the disposal of the leased assets, considering the impairment that these may present, and the expenses related to their redemption and liquidation or eventual relocation.

Determining provisions for factoring loans considers that the counterparty is the assignor of the documents endorsed to the Bank when the factoring is with liability and the debtor when the assignment is without liability of the assignor.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

V. Additional provisions

According to FMC regulation, banks can establish provisions over the already described limits to protect themselves from the risk of non-predictable economic fluctuations that could affect the macroeconomic environment or a specific economic sector. As set out in number 9 of Chapter B-1 of the CASB of the FMC, these provisions shall be reported on the liability side in the same way as provisions on contingent claims.

VI. VI. Provisions related to financing with FOGAPE guarantee Covid-19

The FMC requested the determination of specific provisions for loans secured by the FOGAPE Covid-19 guarantee, for which the expected loss must be determined. This is done by estimating the risk of each transaction, dismissing the guarantor's credit quality substitution, and following the appropriate individual or group analysis method per the clauses of the CASB Chapter B-1. This calculation must be made on an aggregate basis, grouping all transactions to which the same deductible percentage is applicable.

Hence, the total expected loss resulting from the aggregate calculation of each transaction group must be compared with the total deductible corresponding to them. When the expected loss of the transactions of a group with the same deductible percentage is determined to be equal to or less than the aggregate deductible, the provisions are set without considering the FOGAPE Covid-19 hedge, that is, without replacing the creditworthiness of the direct debtor for that of the guarantor. When they surpass the aggregate deductible, the provisions shall be determined using the substitution method set out in the CASB paragraph 4,1(a) of Chapter B-1 and shall be recognised in accounts separate from commercial, consumer and housing provisions.

VII. Impaired receivables and suspension of accrual

For individual assessments, the impaired portfolio comprises loans classified in the 'non-performing portfolio' plus categories B3 and B4 of the 'substandard portfolio'. For group assessment, it comprises loans in the 'non-performing portfolio'.

The Bank ceases to recognise income on an accrual basis in the Interim Consolidated Statement of Income when the loan or one of its instalments is 90 days overdue. From the date interest is suspended until they are no longer impaired, loans shall not be credited with interest, adjustments or fees in the Interim Consolidated Statement of Financial Position. No income from such loans shall be recognised unless duly received in the Interim Consolidated Statement of Income.

VIII. Charge-offs

As a general rule, charge-offs should be applied when the contractual rights to the cash flows expire.

The charge-offs in question refer to the derecognition in the Interim Consolidated Statement of Financial Position of the assets corresponding to the respective transaction, including that part which may not be overdue in the case of a loan payable in instalments or a leasing transaction (there are no partial charge-offs). This includes overdue, past-due and current instalments, with the term corresponding to the time elapsed since the date on which payment of all or part of the obligation is in delinquency.

Charge-offs are always booked against the credit risk provisions set up under Chapter B-1 of the CASB, regardless of the reason for the write-off.

Charge-offs should be carried out in the following circumstances, whichever occurs first:

- a. Based on all available information, the Bank concludes that it will not obtain flows from the loans recorded on the asset.
- b. When an unencumbered claim is 90 days old since it was registered as an asset.
- c. Upon expiry of the statute of limitations for actions to claim collection through an enforceable judgment or at the time of the rejection or abandonment of the enforcement of the title by an enforceable court decision.
- d. When the period of arrears of a transaction reaches the time limit for charge-offs set out below:

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Type of loan	Term
Consumer loans with or without collateral	6 months
Other transactions without collateral	24 months
Commercial loans with collateral	36 months
Mortgage loans	48 months
Consumer leasing	6 months
Other non-mortgage leasing transactions	12 months
Mortgage leasing (household and business)	36 months

IX. Recovery of loans previously written off and receivables from clients

Subsequent payments on written-off transactions shall be recognised in profit or loss as recoveries of impaired loan receivables.

When there are recoveries in terms of goods, the income is recognised as the amount by which they are incorporated into the asset under the provisions of the Chapter on Goods received or awarded in payment of obligations.

The same approach is followed if the leased goods are recovered after a leased transaction is written off when such goods are returned to the asset.

r. Impairment of financial assets other than loans and receivables and contingent liabilities

The Bank applies IFRS 9 'Financial Instruments' to determine the impairment of financial assets measured at fair value through other comprehensive income and financial assets at the amortised cost other than loans and contingent receivables.

The estimate involves calculating the potential credit losses that could be observed on a financial instrument due to differences between the future cash flows under the original contract and the cash flows expected to be received, ensuring at all times that the results obtained are appropriate to the reality of the transactions, the current economic environment and the available forward-looking information.

This model uses a dual measurement approach in which the impairment provision is measured as follows:

- Credit loss expected at 12 months: it represents expected credit losses arising from default events on a financial instrument that may arise within 12 months from the reporting date.
- Lifetime expected credit loss: it represents the expected credit losses arising from default events over the expected life of a financial instrument.

At each reporting date, an entity must measure the provision as equal to the 'lifetime expected credit loss' if the credit risk on that financial instrument has increased significantly since initial recognition. Otherwise, if the credit risk of a financial instrument has not increased significantly at the reporting date since initial recognition, an entity shall measure the loss allowance for that financial instrument at an amount equal to 'expected credit loss over the next 12 months'.

When making such an assessment, an entity compares the default risk of a financial instrument at the reporting date with that of its initial recognition as well as considering reasonable and tenable information made available without unnecessary cost or effort, indicating the growth of credit risk since its initial recognition (on a group or individual basis). Based on changes in credit quality, IFRS 9 describes a 'three-step' impairment model according to the following diagram:

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Change in credit quality since initial recognition		
Phase 1	Phase 2	Phase 3
Initial recognition	Significant increase in credit risk since initial recognition	Credit-impaired assets
Credit loss expected in 12 months	Lifetime credit loss	Lifetime credit loss

Reasonable and tenable information refers to information readily available at the reporting date without unreasonable cost or effort, including information about past events, current conditions and forecasts of future economic conditions. When contractual payments are overdue by 30 days or more, the Bank considers that the credit risk of a financial asset has increased significantly, but this is not the only indicator.

Measurement of expected credit loss

Expected credit loss estimates the weighted probability of credit losses over the financial instrument's expected life, that is, the present value of all cash shortfalls. The three components of the measurement of expected credit loss are:

PD: The probability of default estimates the probability of non-performance over a given time frame.

LGD: Loss-given default estimates the loss that would occur in the event of a default at a given time.

EAD: Exposure at default is an estimate of the exposure at a future date of non-performance, considering expected exposure changes after the reporting date, including repayments of principal and interest, whether contractually scheduled or otherwise, and interest on defaults.

The parameters used for the calculation of impairment provisions were developed based on the infrastructure of the internal models used and take into account the experience acquired in the regulatory and management areas, as well as the stages in which each financial asset is classified, including forward-looking information, point-in-time (PIT) view, multiple scenarios, calculation of losses for the entire life of the operation through PD lifetime, among others.

Collateral and other credit enhancements are considered to measure expected credit loss.

Determination of significant risk increase

To determine the classification at phase 2, it is assessed whether there is a significant increase in credit risk (SICR) from the initial recognition of the transactions, considering a series of principles that ensure that all financial instruments are subject to this assessment, which considers the particularities of each portfolio and type of product based on various quantitative and qualitative indicators. All of this is subject to the expert judgement of analysts, who set the thresholds under appropriate management integration and implement it under the approved governance.

The judgements and criteria used to establish thresholds are based on several principles and develop a set of techniques. The principles are as follows:

- **Universality:** all financial instruments under a credit rating must be assessed for their potential SICR.
- **Proportionality:** the definition of the SICR should consider each portfolio's particularities.
- **Materiality:** its implementation should also be consistent with each portfolio's relevance to avoid unnecessary cost or effort.
- **Holistic view:** the selected approach should combine the most relevant aspects of credit risk (i.e. quantitative and qualitative).
- **Application of IFRS 9:** the approach should consider the features of IFRS 9, focusing on a comparison with credit risk at initial recognition and considering forward-looking information.
- **Risk management integration:** criteria should be consistent with those metrics considered in day-to-day risk management.
- **Documentation:** Appropriate paperwork must be prepared.

For classify phase 2 financial instruments, we consider the following criteria:

- **Quantitative criteria:** changes in the risk of a default occurring over the expected life of the financial instrument are analysed and quantified relative to its level of credit risk at inception. For this purpose, quantitative thresholds have been defined for the portfolios. These thresholds can be expressed as an absolute or relative increase in the probability of default.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

- Qualitative criteria: using expert judgement, we use various indicators aligned with those used in ordinary credit risk management (defaults over 30 days, refinancing, etc.).
- Definition of default: this definition entails the application of various criteria to classify exposures as phase 3, including transactions in default for 90 consecutive days or identifying other criteria that demonstrate that the counterparty can meet all of its financial obligations.
- Expected life of the financial instrument: we estimate the expected life of a financial instrument considering all contractual terms (e.g. prepayments, duration, call options, etc.).

Recognition of expected credit loss

An entity shall recognise in its financial results a gain or loss caused by value impairment as the amount of the expected credit loss (or releases) by which the value is adjusted given the losses that have occurred by the reporting date to capture the amount that requires recognition accurately.

For assets measured at fair value through other comprehensive income, the book value of the instruments is understood as the fair value. Therefore, the recognition of impairment does not affect the carrying amount of such instruments and is reflected as a movement between other comprehensive income (a deduction from fair value) and results at each reporting date.

In the case of assets measured at amortised cost, impairment is presented through a supplementary account that reduces the asset's value.

s. Impairment of non-financial assets

The Bank's non-financial assets are reviewed at each reporting date of the Interim Consolidated Financial Statements for indications of impairment (i.e., when the carrying amount exceeds the recoverable amount). If such indications exist, the asset's recoverable amount is estimated to determine the extent of the impairment loss.

The recoverable amount is the higher of fair values minus disposal costs and value in use. In assessing value in use, estimates of cash inflows or outflows shall be discounted to present value using the pre-tax discount rate that reflects the current market assessment of the time value of money and the specific risks for which estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset is estimated to be lower than its carrying amount, it is written down as its recoverable amount. The impairment loss is recognised immediately in profit or loss.

Concerning other assets, impairment loss recognised in prior periods is assessed at each reporting date for any indication that the loss has decreased and should be reversed. The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss shall not exceed the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior years. Loss for goodwill impairment recognised through capital gains is not reversed.

t. Provisions, contingent assets and liabilities

Provisions are liabilities whose amount or maturity is uncertain. These provisions are recognised in the Interim Consolidated Statements of Financial Position when all the following requirements are met:

- It is a present obligation (legal or constructive) as a result of past events and,
- as of the publication date of the financial statements, the Bank will probably have to expend resources to settle the obligation and;
- the amount of these resources can be reliably measured.

Contingent assets or contingent liabilities encompass all potential rights or obligations arising from past events. These are only confirmed if one or more uncertain future occurrences are not wholly within the Bank's control.

The Interim Consolidated Financial Statements reflect all significant provisions for which the probability of meeting the obligation is estimated to be more likely than not. Provisions are quantified using the best available information regarding the consequences of the event giving rise to them and are reviewed and adjusted at the end of the accounting period. Provisions are used when the liabilities for which they were originally recognised are settled. Partial or total reversals are recognised when such liabilities cease to exist or are reduced.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Provisions are classified according to the obligation covered as follows:

- Provisions for employee benefit obligations
- Provisions for lawsuits and litigations
- Provisions for operational risk
- Provisions for mandatory dividends
- Provisions for contingent loan risks
- Provisions for contingencies

u. Income tax and deferred taxes

The Bank recognises, where appropriate, deferred tax assets and liabilities for the estimated future tax effects attributable to differences between the carrying amounts of assets, liabilities and their tax bases. Deferred tax assets and liabilities are calculated using the tax rate applied in the year the deferred tax assets and liabilities are realised or settled according to current tax legislation. The future effects of tax legislation or tax rate changes are recognised in deferred taxes from when the law approving such changes is published.

Current tax assets relate to provisional payments in excess of the provision for income tax or other income tax credits, such as training expenses or donations to universities. In addition, it should be included the monthly provision payments to be recovered for profits absorbed by tax losses. In the case of liabilities, they correspond to the provision for income tax calculated based on the tax results for the period, minus the mandatory or voluntary provisional payments and other credits applied to this obligation.

For its presentation in the Interim Consolidated Statements of Financial Position, under IAS12, the tax items should be cleared at the taxing entity's level as deemed appropriate to subsequently add the net balances per taxing entity on a consolidated level.

v. Employee benefits

i. Post-employment benefits – Defined Benefit Plan:

According to the current collective labour covenant and other agreements, Banco Santander-Chile makes available an additional benefit for its main executives consisting of a pension plan, aiming for them to have the necessary funds for a supplementary pension upon retirement.

Features of the Plan:

The main features of the Post-Employment Benefits Plan promoted by the Banco Santander-Chile are:

- i. Aimed at the Bank's management.
- ii. The general requirement is that the beneficiary must still hold their position within the Bank by the time they turn 60 years old.
- iii. The Bank will contract a mixed collective insurance policy (life and savings) for each executive, with the contracting party and beneficiary being the Group company to which the executive belongs. Periodic contributions will equal the amount each manager commits to their voluntary contribution plan.
- iv. The Bank will be responsible for granting the benefits directly.

The projected unit credit method calculates the present value of the defined benefit obligation and the current service cost. Components of defined benefit cost include:

- Current and past service costs are recognised in profit or loss for the period.
- Net interest over the net defined benefit liability (asset), recognised in profit or loss for the period.
- New net defined benefit liability (asset) measurements include: (a) actuarial gains and losses; (b) the performance of the plan's assets, and (c) changes in the effect of the asset ceiling, which are recognised in other comprehensive income.

The net defined benefit liability is the deficit or surplus, calculated as the difference between the defined benefit obligation's present value minus the plan assets' fair value.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

The plan assets comprise the pension fund procured by the Bank through an unrelated third party. These assets are held by an entity legally separated from the Bank and exist solely to pay employees their benefits.

The Bank recognises the present service cost and the net interest of the 'Personnel wages and expenses' on the Interim Consolidated Statement of Income. The plan's structure does not generate actuarial gains or losses. The plan's performance is established and fixed during the period; consequently, there are no changes to the asset's ceiling. Accordingly, there are no amounts recognised in other comprehensive income.

The post-employment benefits liability, recognised in the Interim Consolidated Statement of Financial Position, represents the deficit or surplus in the defined benefit plans of the Bank. Any surplus resulting from the calculation is limited to the present value of any economic benefits available regarding the plan's reimbursements or reductions to future contributions.

When employees abandon the plan before meeting the requirements to become eligible for the benefit, the Bank's contributions decrease.

ii. Severance package:

Severance packages by years of employment are recorded only when they actually occur or upon the availability of a formal and detailed plan in which the fundamental modifications to be made are identified, provided that such plan has already started to be implemented or its principal features have been publicly announced, or objective facts about its activation are known.

iii. Cash-settled share-based payments:

The Bank allocates cash-settled share-based payments to executives of the Bank and its Subsidiaries under IFRS 2. Accordingly, the Bank measures the services received and the obligation incurred at fair value.

Until the obligation is settled, the Bank calculates the fair value at the end of each reporting period and at the date of settlement, recognising any change to fair value in the income statement for the period.

w. Use of Estimates

Preparing the Interim Consolidated Financial Statements requires the Bank's Management to make estimates and assumptions that affect applying the accounting policies and the reported values of assets, liabilities, revenues and expenses. Accordingly, actual results may differ from these estimates.

In certain cases, the International Financial Reporting Standards (IFRS) require that assets or liabilities be recorded or disclosed at their fair value. The fair value is the price received to sell an asset or paid to transfer a liability in an orderly transaction between informed market participants at the measurement date. When available, quoted market prices in active markets have been used for measurement. When the trade prices of an active market are not available, the Bank estimates such values based on the best information available, including internal modelling and other valuation techniques.

The Bank has established provisions to cover potential credit loss per the regulations issued by the FMC. These allowances must be regularly reviewed, considering factors such as changes in the nature and volume of the loan portfolio, trends in forecasted portfolio quality, credit quality, and economic conditions that may adversely affect the borrowers' ability to pay. Increases in the allowances for loan loss are reflected as 'Provisions for loan loss' in the Interim Consolidated Statement of Income.

Loans are written off when the contractual rights for the cash flows expire. Nevertheless, the Bank will charge off per Title II of Chapter B-2 of the Compendium of Accounting Standards issued by the FMC for loans and accounts receivable from clients. Charge-offs are recorded as a reduction of credit risk provisions.

The Bank's Management regularly reviews the relevant estimates and assumptions to calculate provisions quantifying certain assets, liabilities, revenues, expenses, and commitments. Revised accounting estimates are recorded in the period the estimate is revised and in any affected future period.

NOTE 02 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

These estimates are based on the best available information and mainly refer to the following:

- Allowances for loan loss (Notes 13 and 41)
- Impairment loss on certain assets (Notes 11, 13, 15, 16, 17, 39 and 40)
- The useful lives of tangible and intangible assets (Notes 15, 16 and 17)
- The fair value of assets and liabilities (Notes 8, 11, 12, 21 and 44)
- Commitments and contingencies (Note 29)
- Current and deferred taxes (Note 18)

x. Earnings per share

Basic earnings per share are calculated by dividing the net income attributable to the equity holders of the Bank by the weighted average number of shares outstanding during the reported period. Diluted earnings per share are calculated similarly to basic earnings. Still, the weighted average number of outstanding shares is adjusted to consider the potential diluting effect of stock options, warrants, and convertible debt. As of June 30, 2023, and 2022, and December 31, 2022, the Bank does not hold any instruments that have a dilutive effect on equity.

y. Temporary acquisition (assignment) of assets

Purchases or sales of financial assets under non-optional repurchase agreements at a fixed price (repos) are recorded in the Interim Consolidated Statements of Financial Position as a financial assignment (receipt) based on the nature of the debtor (creditor) under 'Deposits in the Central Bank of Chile', 'Deposits in financial institutions' or 'Credits and receivables from customers' ('Deposits from Central Bank of Chile', 'Deposits from financial institutions' or 'Deposits and collections').

The difference between the purchase and sale prices is recorded as financial interest over the contract's life.

z. Assets and investment funds managed by the Bank

The assets managed by the different companies that form part of the Bank's consolidation perimeter (Santander SA Sociedad Securitizadora) that third parties own are not included in the Interim Consolidated Statements of Financial Position. The commissions generated by this activity are included in the balance of 'Fee and commission income' in the Interim Consolidated Statement of Income.

aa. Provision for mandatory dividends

As of June 30, 2023, and 2022, and December 31, 2022, the Bank recognised a liability (provision) for minimum or mandatory dividends. This provision is made under Article 79 of the Chilean Corporation Law, which is under the Bank's internal policy, which requires at least 30% of net income for the period to be distributed, except in the case of a contrary resolution adopted at the respective shareholders' meeting by unanimous vote of the outstanding shares. This provision is recorded as a deduction from 'Retained earnings' under 'Provision for dividends, interest payments and repricing of equity financial instruments' in the Interim Consolidated Statements of Changes in Equity.

NOTE 03 - NEW ACCOUNTING PRONOUNCEMENTS ISSUED AND ADOPTED OR ISSUED AND NOT YET ADOPTED

1. Pronouncements issued and adopted

As of the date these Interim Consolidated Financial Statements were published, the new accounting pronouncements issued by both the FMC and the International Accounting Standards Board, which the Bank has fully adopted, are set out below:

a. Accounting Standards issued by the Financial Market Commission.

There are no new accounting pronouncements to be adopted in this period.

b. Accounting Standards issued by the International Accounting Standards Board.

Amendment to IAS 1 - Classification of liabilities as current - non-current. On January 23, 2020, the IASB issued an amendment affecting only the presentation of liabilities in the financial statements. The classification as current or non-current should be based on the rights existing at the end of the reporting period and align the wording in all the affected paragraphs by referring to the right to defer settlement for at least 12 months and specify that only rights outstanding at the end of the reporting period affect the classification of a liability. Along the same lines, it specifies that the classification is not affected by the expectations of whether an entity will exercise its right to defer a liability settlement and clarifies that the settlement refers to the transfer of cash, equity instruments, and other assets or services to the counterparty. This amendment is effective as of January 1, 2023, to be applied retrospectively, with early application permitted. *This amendment does not have any material impact on the presentation of the Interim Consolidated Financial Statements of the Bank.*

Amendment to IAS 8 - Definition of Accounting Estimates. As of February 12, 2021, the IASB published this amendment to help entities distinguish between accounting policy and accounting estimate. According to the new definition, accounting estimates are 'monetary amounts in the financial statements subject to measurement uncertainty'.

The amendments are effective for annual periods beginning on or after January 1, 2023, and include changes in accounting policies and accounting estimates occurring on or after the beginning of that period. Early application is allowed. *This amendment does not have any material impact on the presentation of the Interim Consolidated Financial Statements of the Bank.*

Amendment to IAS 1 and Statements of the practice of IFRS 2 - Disclosures of accounting policies. As of February 12, 2021, the IASB published this amendment intended to assist preparers in deciding which accounting policies should be disclosed in their financial statements. The modifications include the following:

- An entity must now disclose its material accounting policy information instead of its significant accounting policies;
- it explains how an entity can identify material accounting policy information and gives examples of when it will likely be material;
- the amendments clarify that accounting policy information may be material because of its nature, even if the related amounts are immaterial; the amendments clarify that accounting policy information is material if users of an entity's financial statements need it to understand other material information in the financial statements; and
- the amendments clarify that if an entity discloses immaterial accounting policy information, such information shall not obscure material accounting policy information.

In addition, IFRS Practice Statement 2 has been amended by adding guidance and examples to explain the application of the 'four-step materiality process' to accounting policy information to support the amendments to IAS 1.

The amendments are applied prospectively. The amendments to IAS 1 are effective for annual periods beginning January 1, 2023. Early application is allowed. Once the entity applies the amendments to IAS 1, it is also permitted to apply them to IFRS Practice Statement 2. *The Bank has reviewed its disclosures under these standards, resulting in no material amendments.*

NOTE 03 - NEW ACCOUNTING PRONOUNCEMENTS ISSUED AND ADOPTED OR ISSUED BUT NOT YET ADOPTED, continued

Amendment IAS 12 - Deferred taxation of assets and liabilities arising from a single transaction. This Amendment was issued on May 7, 2021, concerning the treatment of deferred taxes over leases and decommissioning obligations. In these cases, the entities shall recognise deferred assets and liabilities if equal deductible and temporary taxable differences arise. The amendment is effective for annual reporting periods beginning on or after January 1 2023, with early adoption permitted. *Management has implemented this amendment to the Interim Financial Consolidated Statements of the Bank.*

Amendment of IFRS 17 - Initial Application of IFRS 17 and IFRS 9, Comparative information. This amendment was issued on December 9, 2021. It considers that if an entity applies IFRS 17 and IFRS 9 simultaneously for the first time, it can apply to a 'classification overlay' to present comparative information regarding financial assets if this comparative information has not been restated per IFRS 9. The comparative information of a financial asset will not be restated if the entity chooses not to do so for previous financial periods, or if the entity restates prior financial exercises. Still, the financial asset has been derecognised during those previous periods. An entity that opts to apply this amendment will do so when first applying IFRS 17 (January 1, 2023). *This amendment has no material impact on the presentation of the Interim Consolidated Financial Statements.*

Amendment IAS 12 - International Tax Reform, based on Pillar Two Model Rules. The amendments introduce an exception to the requirements of IAS 12, allowing an entity not to recognise and not disclose information about deferred tax assets and liabilities related to OECD Pillar Two income taxes; the entity applying the exception must disclose that it has applied the exception which is effective immediately upon issuance of the amendment; the remaining disclosure requirements are required for annual periods beginning on or after January 1, 2023. *This amendment has no material impact on the presentation of the Interim Consolidated Financial Statements.*

2. Issued pronouncements which have not yet been adopted

As of the reporting date of these Interim Consolidated Financial Statements, new International Financial Reporting Standards had been published, as well as their interpretation and the FMC standards, which were not mandatory as of June 30, 2023. Accordingly, while the IASB permits an early application in some cases, the Bank has not undertaken its application by such date.

a. Accounting Standards issued by the Financial Market Commission.

General Standard No 484 - Commissions on credit operations. Law No 18,010 and adjustment to current contracts. As of August 5, 2022, the FMC has issued this instruction to establish requirements, rules, and conditions to be met by fees charged regarding money lending transactions. In general terms, any payment that the creditor receives or is entitled to receive will be considered interest, except for those that have a special legal regime and those that comply with the following:

1. The charge made to the debtor must be calculated based on the service provision's cost.
2. The service must be real and veritably provided to the debtor and distinct from those inherent to the money lending operation.
3. The amount to be paid by the debtor must have been expressly informed and accepted by the debtor before collection and service provision.
4. The charges deriving from the services contracted for credit operations must be made available to the public via the same channels used to make offers or secure contracts of credit operations.

Inherent services are defined as those necessary to initiate, execute, materialise or terminate the credit operation and those that the creditor is obliged to provide in compliance with legal and regulatory requirements applicable to credit operations.

As stated above, the same requirements and rules governing fees and commissions apply to money lending transactions that use credit lines from current accounts or credit cards. Management, operation and maintenance services must be considered fees, provided that the charge is not based on the credit operation's amount or has been applied for another service product. Any charges that do not comply with commissions must be considered fees to calculate the maximum conventional rate.

The instructions are effective as of August 1, 2023. Institutions that need to modify contracts must communicate so at their own expense to their clients by the means agreed with them, providing an annexe of amendments and justifying their acceptance or rejection. Institutions may only terminate the contract in the event of rejection of the amendments intended to align the contracts to the changes introduced. *The Bank undertook a process of identifying, assessing, modifying and disclosing changes associated with compliance with this standard, which has no material effect on the Bank's consolidated financial statements.*

NOTE 03 - NEW ACCOUNTING PRONOUNCEMENTS ISSUED AND ADOPTED OR ISSUED BUT NOT YET ADOPTED, continued

Regulation for the new standardised methodology to calculate provisions for the consumer portfolio On August 17, 2022, the Financial Market Commission (FMC) announced the start of the public consultation regarding the standardised methodology for calculating consumer and contingent loans granted by banking institutions established in the country. The regulation under consultation would allow all loans granted by banks to have a standard methodology for calculating provisions, as for other portfolios. This consultation period ended on December 31, 2022. As of the date these financial statements were issued, the final regulations have not yet been published.

b. Accounting Standards issued by the International Accounting Standards Board.

Amendment to IFRS 16 - Lease liability on a sale and leaseback. This amendment, issued on September 22, 2022, requires a lessee-seller to measure lease liabilities arising after a lease in a manner that does not recognise any gain or loss related to the right-of-use. The new requirements do not prevent a vendor-lessee from recognising any gain or loss related to a lease's partial or total termination in profit or loss. The amendments are effective for annual periods beginning on or after January 1, 2024. Early application is allowed. *The administration will evaluate this amendment whenever it presents leaseback sales.*

Amendment to IAS 7 and IFRS 7 - Supplier finance arrangements. The amendment to IAS 7 Statement of Cash Flows and IFRS 7 Disclosures about Financial Instruments requires an entity to disclose information about supplier finance arrangements that enable users of Financial Statements to evaluate the effects of those arrangements on the entity's liabilities and cash flows and its exposure to liquidity risk. The amendments to IAS 7 apply for annual periods beginning on or after January 1, 2024, and the amendments to IFRS 7 when the amendments to IAS 7 are applied. *Accordingly, the Administration will await the new validity to assess the potential effects of this modification.*

IFRS S1 - General requirements for reporting sustainability-related financial disclosures. On June 26, the International Sustainability Standards Board (ISSB) published this standard, which aims to require an entity to disclose information about its sustainability-related risks and opportunities that are useful to users of general-purpose financial reports in making decisions to the extent that these affect the entity's cash flows, access to finance or cost of capital in the short, medium or long term. *Accordingly, the Administration will await the new validity to assess the potential effects of this modification.*

IFRS S2 - Climate-related disclosures. On June 26, the International Sustainability Standards Board (ISSB) published this standard, which aims to require an entity to disclose information about its climate-related risks and opportunities that is useful to users of general-purpose financial reports when making decisions. *Accordingly, the Administration will await the new validity to assess the potential effects of this modification.*

NOTE 04 - ACCOUNTING CHANGES

As of the date these Interim Consolidated Financial Statements were issued, there were no accounting changes to disclose.

NOTE 05 - SIGNIFICANT EVENTS

As of June 30, 2023, the following events, considered by the Bank's management as material and affecting the Bank's operations, have been recorded in the Interim Consolidated Financial Statements.

Board of Directors

At a Directors Board Meeting on March 28, 2023, it was agreed upon to summon an Ordinary Shareholders' Meeting for April 19, 2023, to propose a distribution of profits and dividend payments taken from the 60% of retained earnings as of December 31, 2022, equivalent to \$ 2.57469221 per share. It also was proposed that the remaining 40% of profits be used to increase the Bank's reserves and/or profit.

Considering the above, the Bank decided to increase the minimum provision for dividend payments up to 60% of the profits accrued during 2022.

In the same Board meeting mentioned above, the resignation of Alternate Director Oscar von Chrismar was acknowledged, being replaced by Maria Olivia Recart Herrera.

Shareholders' Meeting

At the Ordinary Shareholders' Meeting of Banco Santander-Chile held April 19, 2023, along with the approval of the 2022 Consolidated Financial Statements, the shareholders resolved to distribute 60% of the net profit for the year ('Profit attributable to the equity holders'), which amounted to MCh\$485,191. These earnings are equivalent to a dividend of Ch\$2,57469221 per share. It was also approved that 40% be allocated to:

- Increasing Retained Earnings from prior years by the amount necessary to meet the payment of the next three interest coupons on the bonds with no fixed maturity.
- Increasing the Bank's Reserves and other retained earnings by the remaining amount.

Furthermore, the following were elected as full directors: Claudio Melandri Hinojosa (chairman), Rodrigo Vergara Montes (independent), Orlando Poblete Iturrate (independent), Felix de Vicente Mingo (independent), Maria Olivia Recart Herrera (independent), Ana Dorrego de Carlos, Rodrigo Echenique Gordillo, Lucia Santa Cruz Sutil, Blanca Bustamante Bravo (independent) and as alternate directors Juan Pedro Santa Maria Perez (independent) and Alfonso Gómez Morales (independent).

At the aforementioned Ordinary Shareholders' Meeting, PricewaterhouseCoopers Consultores Auditores was also approved as external auditors for the 2023 financial year.

NOTE 05 - SIGNIFICANT EVENTS, continued**Bond Issuance**

In 2023, the Bank issued current FMC bonds for CLP 700,000,000,000 and UF 15,000,000. Details of the placements made during the current year are included in Note 22.

Series	Currency	Term Original	Issuance rate Annual	Issuance Date	Issue Amount	Maturity Date
AA1	CLP	6 years	6.60%	12-01-2022	100,000,000,000	12-01-2028
AA2	CLP	6.5 years	6.20%	12-01-2022	100,000,000,000	06-01-2029
AA3	CLP	8 years	6.20%	09-01-2022	100,000,000,000	09-01-2030
AA4	CLP	10.5 years	6.25%	09-01-2022	100,000,000,000	03-01-2033
AA5	UF	9.5 years	2.95%	08-01-2022	10,000,000	02-01-2032
AA6	UF	15 years	2.70%	10-01-2022	5,000,000	10-01-2037
AA7	CLP	3.5 years	6.80%	02-01-2023	75,000,000,000	08-01-2026
AA8	CLP	4.5 years	6.70%	03-31-2023	100,000,000,000	09-01-2027
AA9	CLP	8 years	6.30%	03-31-2023	75,000,000,000	11-01-2030
AA10	CLP	8 years	7.10%	04-24-2023	50,000,000,000	03-01-2026

Other

The Ministry of Treasury, alongside The Chilean Banks and Financial Institutions Association AG (ABIF), announced that Transbank shareholder banks started the process of selling their stock ownership in this company in consideration of the enactment of the four-part model in the payment system. Shareholders have determined JPMorgan as their advisor bank for the disposal.

At the Extraordinary Board Meeting of Getnet held on April 5, 2023, Mr Carlos Alfredo Rocca Vidal resigned as General Manager of the Company, and the Board unanimously appointed Mr Fernando Benito Olivares as the new General Manager.

NOTE 06 - REPORTING SEGMENT

The Bank manages and measures the performance of its operations by business segments. Their reporting is based on the Bank's internal information system for management of the segments established by the Bank.

Inter-segment transactions are conducted under normal commercial terms and conditions. Each segment's assets, liabilities, and results include items directly attributable to the segment on which they can be allocated reasonably. A business segment comprises clients to whom a differentiated product offer is directed while being homogeneous in terms of their performance and measured similarly.

To comply with the strategic objectives established by the senior management and adapt to changing market conditions, the Bank makes organisational adjustments from time to time. These adjustments affect how it is managed or administered to a greater or lesser extent. Accordingly, the present disclosure provides information on how the Bank is managed as of June 30, 2023.

The Bank comprises the following business segments:

Retail Banking

It comprises individuals and small to middle-sized companies (SMEs) with an annual income of less than MCh\$3,000. This segment offers various services, including consumer loans, credit cards, commercial loans, foreign exchange, mortgage loans, debit cards, current accounts, savings products, mutual funds, stockbroking and insurance. Additionally, SME clients are offered government-guaranteed loans, leasing and factoring.

Middle-market

This segment comprises companies and large corporations with annual sales exceeding MCh\$3,000, such as universities, government entities, municipalities and regional governments and companies in the real estate sector executing projects for sale to third parties, along with all construction companies with annual sales over MCh\$800 and no market cap. The companies within this segment have access to many products, including commercial loans, leasing, factoring, trade finance, credit cards, mortgage loans, current accounts, transactional services, treasury services, financial consulting, savings products, mutual funds and insurance. Additionally, companies in the real estate industry are offered specialised services to finance residential projects, with the aim of raising mortgage loan sales.

Global Corporate Banking

This segment comprises foreign multinational companies or Chilean multinational companies with sales above MCh\$10,000. This segment offers a wide range of products, including commercial lending, leasing, factoring, trade finance, credit cards, mortgage loans, current accounts, transactional services, treasury services, financial consulting, investment banking, savings products, mutual funds and insurance.

This segment also counts with a Treasury Division, which provides sophisticated financial products to Middle-market and Global Corporate Banking companies. These include products such as short-term financing and fundraising, brokerage services, derivatives, securitisation, and other tailor-made products. In addition, the Treasury Division may act as a broker for transactions as well as manage the Bank's investment portfolio.

NOTE 06 - REPORTING SEGMENTS, continued

Corporate Activities ('Other')

This segment includes Financial Management, which performs the global management of the structural exchange rate item, the parent entity's structural interest rate risk, and the liquidity risk. The latter is managed through the implementation of emissions and utilisations. Likewise, it also manages its own resources, the capital endowment of each unit and the cost of financing the investments made. This usually entails that this segment has a negative contribution to the results.

Furthermore, this segment incorporates all intra-segment results and all activities not allocated to a segment or product with customers.

The accounting policies of the segments are the same as those described in the SUMMARY of accounting policies and are customised to meet the Bank's management needs. The Bank's earnings stem mostly from income from interests, fees, commissions, and financial operations. Accordingly, the highest decision-making authority for each segment relies primarily on interest income, fee income and provision for expenses to assess segment performance and thus make decisions on the resource allocation to the segments.

The tables below show the Bank's balances by business segment as of June 30, 2023, and 2022.

	For the period of 6 months until June 30, 2023							
	Loans and receivables from clients (1)	Demand and time deposits (2)	Net interest and adjustment income	Net commission income	Financial transactions, net (3)	Provisions	Support expenses (4)	Net segment contribution

NOTE 07 - CASH AND CASH EQUIVALENTS

a. The detail of the balances included under cash and cash equivalents is as follows:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Cash and deposits in banks		
Cash	1,135,380	1,110,830
Deposits at the Central Bank of Chile	263,821	444,491
Deposits in foreign Central Banks	-	-
Deposits in domestic banks	726	2,646
Deposits foreign banks	942,964	424,975
Subtotal cash and deposits with banks	2,342,891	1,982,942
Cash items in collection process	15,795	96,944
Other cash equivalents	-	-
Total cash and cash equivalents	2,358,686	2,079,886

The balance of funds held in cash at the Central Bank of Chile follows regulations concerning requirements and technical reserves that the Bank must maintain on average every month, although these funds are immediately available.

b. Operations in the process of settlement:

Cash items in the collection process are transactions in which only the settlement—that will increase or decrease the funds at the Central Bank or abroad – is pending. This process usually happens within the next 24 to 48 working hours following the transaction. These operations are presented as follows:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Assets		
Documents held by other banks (document to be cleared)	124,437	93,650
Funds to be received	735,740	750,166
Subtotal	860,177	843,816
Liabilities		
Funds to be paid	844,382	746,872
Subtotal	844,382	746,872
Cash items in collection process	15,795	96,944

As of December 31, 2022	326	-	-	326

The Bank assessed those instruments with unrealised loss as of June 30, 2023, and concluded they were not impaired. This review assessed the economic drivers of any decline, the securities' issuer credit ratings and the Bank's intention and ability to hold the securities until the unrealised loss is recovered. Based on this analysis, the Bank considers there are no significant or prolonged declines or changes in credit risk to cause impairment in its investment portfolio. Most of these instruments' fair value decline was caused by market conditions that the Bank considers temporary. All instruments with unrealised loss as of June 30, 2023, were not in a continuous unrealised loss position for over one year.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

As of June 30, 2023, and 2022, and as of December 31, 2022

NOTE 11 - FINANCIAL ASSETS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME, continued

The following table shows debt instruments and trading placements at fair value through accumulated other comprehensive income of unrealised gains and losses as of June 30, 2023, and December 31, 2022:

NOTE 12 - FINANCIAL DERIVATIVES CONTRACTS FOR HEDGE ACCOUNTING PURPOSES, continued**a. Micro-hedge accounting****Fair value micro-hedges**

The Bank uses cross-currency swaps, interest rate swaps, and call money swaps to cover its exposure to changes in the hedged item's fair value attributable to the interest rate. These hedging instruments change the effective cost of long-term issues from a fixed to a floating interest rate.

The following is a notional SUMMARY of hedged items and hedging instruments under fair value hedges, effective as of June 30, 2023, and December 31, 2022, separated by term to maturity:

	As of June 30, 2023							Total
	On	Up to	Between	Between 3	Between 1	Between 3	More than 5	
	demand	1 month	1 month	months	year	years	years	
	MCh\$	MCh\$	and 3	and 1 year	and 3	and 5	years	
	MCh\$	MCh\$	months	MCh\$	years	years	MCh\$	MCh\$

NOTE 12 - FINANCIAL DERIVATIVES CONTRACTS FOR HEDGE ACCOUNTING PURPOSES, continued**Cash flow micro-hedging**

The Bank uses cross-currency swaps to hedge the risk of the variability of cash flows attributable to changes in the interest rate of bonds and interbank loans issued at floating rates and to hedge foreign currency fluctuations, mainly in US dollars. In addition, it uses both forward and cross-currency swaps to hedge the inflation risk on certain items.

The following are the notional amounts of the hedged item as of June 30, 2023, and 2022, and December 31, 2022, and the period in which the flows will occur:

	As of June 30, 2023							
	On demand	Up to 1 month	Between 1 month and 3 months	Between 3 months and 1 year	Between 1 year and 3 years	Between 3 years and 5 years	More than 5 years	Total

NOTE 12 - FINANCIAL DERIVATIVES CONTRACTS FOR HEDGE ACCOUNTING PURPOSES, continued**b. Effect on other comprehensive income**

The valuation generated by those hedging instruments used in cash flow hedges whose effect was recorded in the Interim Consolidated Statements of Changes in Equity, specifically within 'accumulated other comprehensive income', in cash flow hedges, is presented as follows:

Hedged item	As of June 30,	As of December 31,
	2023 MCh\$	2022 MCh\$
Interbank borrowing	(2,013)	(2,343)
Time deposits and other term equivalents	51	-
Issued debt instruments	(5,558)	415
Debt instruments at FVOCI	(55,646)	(22,571)
Loans and receivables at amortised cost	81,847	(94,339)
Total	18,681	(118,838)

Considering that the variable flows of both the hedged item and the hedging instrument are mirrors of each other, the hedges are close to 100% efficient; This entails that all variations in value attributable to components of the hedged risk are almost fully netted. The Bank did not record any forecasted future transactions in its cash flow hedge accounting portfolio during the period.

c. Effect on results

The result generated by the cash flow derivatives whose effect was transferred from other comprehensive income into the results for the period is presented below:

Hedged item	As of June 30,	As of December 31,
	2023 MCh\$	2022 MCh\$
Bond hedge derivatives	(889)	(826)
Interbank loans hedge derivatives	(6,683)	(4,762)
Mortgage loans hedge derivatives	(12,913)	(37,698)
Cash flow hedge net income(*)	(20,485)	(43,286)

(*) See Note 28 'Equity', letter f.

d. Net investment hedges in foreign operations

As of June 30, 2023, and December 31, 2022, the Bank has no net foreign investment hedges in its hedge accounting portfolio.

NOTE 12 - FINANCIAL DERIVATIVES CONTRACTS FOR HEDGE ACCOUNTING PURPOSES, continued**e. Fair value macro-hedges**

The Bank has macro-hedges for loans and receivables from clients, specifically for the mortgage and commercial loan portfolios. The details are presented below:

As of June 30, 2023	Notional amount							Total
	On	Up to	Between 1	Between 3	Between 1	Between 3	More than 5

NOTE 14 - INVESTMENTS IN ASSOCIATES AND OTHER COMPANIES, continued

- b. Restrictions on the ability of partners to transfer funds to investors.

There are no significant restrictions on the ability of associates to transfer funds to the Bank in the form of cash dividends or repayment of loans or advances.

- c. The movement in investments in companies is as follows:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Initial book value	46,586	37,695
Acquisition of investments	-	-
Sale of investments	-	-
Participation in income	4,197	10,310
Dividends received	(2,987)	(526)
Other equity adjustments (*)	(3,125)	(893)
Total	44,671	46,586

(*) This corresponds to the market value of the investments in other companies in the country as indicated in the Compendium of Accounting Standards for Banks.

- d. The objective evidence indicated in IAS 28 'Investments in Associates and Joint Ventures' has been evaluated, and no impairment of the Bank's investments has been detected.

NOTE 15 - INTANGIBLE ASSETS

The composition of the item as of June 30, 2023, and December 31, 2022, is as follows:

	Opening net balance January 1, 2023 MCh\$	As of June 30, 2023		
		Gross balance MCh\$	Accumulated amortisation MCh\$	Net balance MCh\$
Software or computer programmes	107,789	364,176	(269,858)	94,318
Total	107,789	364,176	(269,858)	94,318

	Opening net balance January 1, 2022 MCh\$	As of December 31, 2022

Depreciation	22,581	20,660
Interests	1,588	1,356
Short-term leasing	4,277	1,870
Total	28,446	23,886

NOTE 17 - RIGHT OF USE ASSETS AND OBLIGATION FOR LEASE CONTRACT, continued

- d. As of June 30, 2023, and December 31, 2022, the maturity level of lease obligations, according to their contractual maturity, is as follows:

	As of June 30, 2023	As of December 31, 2022
	MCh\$	MCh\$
Due within 1 year	24,643	25,902
Due after 1 to 2 years	24,252	24,862
Due after 2 to 3 years	20,955	22,093
Due after 3 to 4 years	17,621	19,585
Due after 4 to 5 years	12,265	13,220
Due after 5 years	28,336	31,447
Total	128,072	137,089

- e. Operating Leases - Lessor

As of June 30, 2023, and December 31, 2022, the future minimum rents to be received from non-cancellable operating leases are as follows:

	As of June 30, 2023	As of December 31, 2022
	MCh\$	MCh\$
Due within 1 year	742	1,090
Due after 1 to 2 years	1,269	1,805
Due after 2 to 3 years	487	582
Due after 3 to 4 years	468	475
Due after 4 to 5 years	465	470
Due after 5 years	943	1,194
Total	4,374	5,616

- f. As of June 30, 2023, and December 31, 2022, the Bank has no finance lease contracts that cannot be unilaterally terminated.
- g. The Bank has no restrictions on fixed assets as of June 30, 2023, and December 31, 2022. Furthermore, fixed assets have not been pledged as collateral to fulfil obligations. On the other hand, no amounts are owed on fixed assets by the Bank on the same dates.

NOTE 18 - CURRENT AND DEFERRED TAXES**a. Current taxes**

As of June 30, 2023, and December 31, 2022, the Bank has set up a first-category income tax provision based on the tax provisions in force. This provision is presented net of payments and credits as follows:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
SUMMARY of current tax liabilities (assets)		
(Assets) for current taxes	(41)	(315)
Current tax liabilities	69,195	112,481
Total net taxes payable (recoverable)	69,154	112,166
Details of current tax liabilities (assets) (net)		
Income tax (27%)	105,442	147,668
Minus:		
Monthly provisional payments	(36,541)	(33,021)
Credit for training expenses	(21)	(2,039)
Grant credits	(305)	(1,160)
Other	579	718
Total taxes payable (recoverable)	69,154	112,166

b. Results for taxes

The effect of the tax expense for the periods from January 1 to June 30, 2023, and 2022, consists of the following items:

	For the period of 6 months until June 30,	
	2023 MCh\$	2022 MCh\$
Income tax expense		
Current year tax	86,719	13,357

NOTE 18 - CURRENT AND DEFERRED TAXES, continued**c. Reconciliation of the effective tax rate**

The reconciliation between the income tax rate and the effective tax rate applied in determining the tax expense as of June 30, 2023, and 2022, is shown below.

	For the period of 6 months until June 30,			
	2023		2022	
	Tax rate %	Amount MCh\$	Tax rate %	Amount MCh\$
Tax calculated on the profit before taxes	27.00	80,230	27.00	166,142
Permanent differences (*)	(15.62)	(46,427)	(14.99)	(92,210)
Single tax (disallowed expenditure)	0.06	186	0.02	112
Other	(3.19)	(9,465)	1.97	12,102
Effective rate and income tax expense	8.25	24,524	14.00	86,146

(*)Corresponds mainly to permanent differences arising from the Price-Level Restatement of Tax Equity.

	For the quarter ended June 30,			
	2023		2022	
	Tax rate %	Amount MCh\$	Tax rate %	Amount MCh\$
Tax calculated on the profit before taxes	27.00	37,671	27.00	87,622
Permanent differences (*)	(4.73)	(29,257)	(4.55)	(61,856)
Single tax (disallowed expenditure)	(0.01)	72	(0.01)	55
Other	1.68	(1,800)	0.97	9,215
Effective rate and income tax expense	23.94	6,686	23.42	35,036

(*)Corresponds mainly to permanent differences arising from the Price-Level Restatement of Tax Equity.

d. Effect of deferred taxes on equity

The SUMMARY of the deferred tax effect in equity is presented below separately, showing the corresponding asset and liability balances for the periods ended June 30, 2023, and December 31, 2022:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Deferred tax assets (OCI)		
Financial investment instruments	58,449	76,512
Cash flow hedging	30,156	35,689
Total deferred tax assets with effect in other comprehensive income	88,605	112,201
Deferred tax liabilities		
Financial investment instruments	(32,903)	(46,976)
Cash flow hedging	(35,200)	(3,603)
Total deferred tax liabilities with effect on others comprehensive income	(68,103)	(50,579)
Net deferred tax balances in equity	20,502	61,622
Deferred taxes in equity attributable to equity holders of the bank	20,728	61,821
Deferred tax in equity attributable to non-controlling interests	(226)	(199)

NOTE 18 - CURRENT AND DEFERRED TAXES, continued**e. Effect of deferred taxes on income**

As of June 30, 2023, and December 31, 2022, the Bank has recorded the effects of deferred taxes in its Interim Consolidated Financial Statements.

Below are the effects of deferred taxes on assets, liabilities and income allocated due to temporary differences:

	As of June 30,	As of December 31,
	2023 MCh\$	2022 MCh\$
Deferred tax assets		
Interest and readjustments	18,805	17,670
Extraordinary charge-off	32,075	29,613
Goods received in payment	4,327	3,777
Valuation of fixed assets	6,049	4,708
Provision for loan losses	315,615	322,194
Provision for expenses	70,379	89,713
Derivatives	107	50
Leased assets	61,105	95,152
Subsidiaries tax loss	4,048	5,570
Right-of-use assets	33,471	887
Other	40,201	9,316
Total deferred tax assets	586,182	578,650
Deferred tax liabilities		
Valuation of investments	(454)	(423)
Anticipated expenses	(6,564)	(7,285)
Valuation provision	(2,775)	(3,147)
Derivatives	(223,150)	(289,352)
Lease obligations	(33,978)	-
Exchange rate adjustments	(1,118)	(8,779)
Other	(16,025)	(17,162)
Total deferred tax liabilities	(284,064)	(326,148)

f. SUMMARY of deferred taxes

Below is a SUMMARY of deferred taxes, considering their effect on equity and results.

	As of June 30,	As of December 31,
	2023 MCh\$	2022 MCh\$
Deferred tax assets		
With an effect on other comprehensive income	88,605	112,201
With an effect on income	586,182	578,650
Total deferred tax assets	674,787	690,851
Deferred tax liabilities		
With an effect on other comprehensive income	(68,103)	(50,579)
With an effect on income	(284,064)	(326,148)
Total deferred tax liabilities	(352,167)	(376,727)

NOTE 18 - CURRENT AND DEFERRED TAXES, continued**g. Presentation of taxes in the financial statements**

At the date of these Interim Consolidated Financial Statements, taxes are presented as follows:

Deferred taxes	As of June 30, 2023	As of December 31, 2022
	MCh\$	MCh\$
Deferred tax assets before reclassifying	674,787	690,851
Reclassifying (netting)	(352,166)	(376,726)
Deferred tax asset after reclassifying	322,621	314,125
Deferred tax liabilities before reclassifying	(352,167)	(376,727)
Reclassifying (netting)	352,166	376,726
Deferred tax liabilities after reclassifying	(1)	(1)
Current taxes	As of June 30, 2023	As of December 31, 2022
	MCh\$	MCh\$
Current tax asset before reclassifying	37,205	36,514
Reclassifying (netting)	(37,164)	(36,199)

NOTE 19 - OTHER ASSETS

The composition of the item 'other assets' as of June 30, 2023, and December 31, 2022, is as follows:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Other assets		
Assets to be leased out as lessor (1)	26,545	32,220
Cash guarantees provided for derivative financial transactions (2)	2,711,090	2,442,325
Debtors due to financial instrument intermediation	28,046	243,345
Accounts receivable from third parties	193,407	184,989
VAT tax credit receivable	18,502	44,180
Expenses paid in advance (3)	219,197	245,937
Valuation adjustments for macro hedges (4)	145,990	160,531
Assets to support defined benefit post-employment plan obligations	558	542
Investment in gold	709	715
Other cash guarantees provided	2	2
Pending operations	18,105	31,709
Other assets	237,546	191,509
Total	3,599,697	3,578,004

1) This corresponds to assets available to be provided by means of finance leases.

2) This corresponds to guarantees related to certain derivative contracts. These guarantees operate when the valuation of derivatives exceeds thresholds defined in the respective contracts and may be in favour of or against the Bank.

3) In this item, the Bank has recorded in advance the expense paid concerning the Santander LATAM Pass programme, which will naturally be consumed as our customers use the Bank's transactional products and are therefore assigned the corresponding LATAM Pass miles (loyalty programme administered by LATAM Airlines Group SA).

4) Corresponds to the balances of the mark-to-market valuation of net assets or liabilities hedged in a macro hedge (Note 12).

NOTE 20 - NON-CURRENT ASSETS AND DISPOSAL GROUPS HELD FOR SALE AND LIABILITIES INCLUDED IN DISPOSAL GROUPS HELD FOR SALE

The composition of non-current assets and disposal group and liabilities included in disposal groups as of June 30, 2023, and December 31, 2022, is as follows:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Assets received in payment or awarded in a judicial auction (1)		
Goods received in payment	5,942	4,772
Assets awarded in a judicial auction	19,488	22,573
Provisions for assets received in lieu of payment or awarded in a judicial auction	(978)	(1,182)
Non-current assets held for sale		
Assets for the recovery of goods sold under financial leasing operations	7,525	4,736
Disposal group for sale		
	-	-
Total	31,977	30,899

- 1) Goods received in payment are those received in lieu of overdue debts from customers. The aggregate assets held in this way must not exceed 20% of the Bank's effective assets. Currently, these assets represent 0.01% (0.01% as of December 31, 2022) of the Bank's effective equity. Goods awarded in a judicial auction correspond to those awarded in judicial auctions as repayment of debts previously contracted with the Bank. Assets awarded in a judicial auction are not subject to the above. These immovable properties are assets available for sale. For most assets, the sale is expected to be completed within one year from the asset's reception or acquisition. If such property is not sold within the time frame in the regulation, it must be written off. Furthermore, a provision is recorded for the difference between the higher initial award value plus any additions and its estimated realisable value (appraisal).

NOTE 21 - FINANCIAL LIABILITIES HELD FOR TRADING AT FAIR VALUE THROUGH PROFIT OR LOSS

Financial liabilities at fair value through profit or loss comprise the liabilities held for trading. They are classified in this category because they are acquired to sell in the short term.

Financial liabilities held for trading and derivatives that are financial liabilities are measured at fair value, in which gains and losses are taken to the income statement.

As of June 30, 2023, and December 31, 2022, the Bank holds the following portfolio of financial liabilities held for trading at fair value through profit or loss:

	Fair value	
	Liabilities	
	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Financial derivatives contracts		
Forwards	1,481,956	1,818,024
Swaps	8,609,317	9,497,035
Call options	1,879	2,794
Put options	6,087	1,467
Future	-	-
Other	-	-
	Subtotal	10,099,239
		11,319,320
Other financial instruments		
Deposits and other demand liabilities	-	-
Time deposits and other term equivalents	-	-
Issued debt instruments	-	-
Other derivatives	-	-
	Subtotal	-
	Total	10,099,239
		11,319,320

Banco Santander presents financial liabilities for trading at fair value through profit or loss corresponding to financial derivative contracts, specifically forwards and swaps, which hedge the exchange rate and interest rate risk related to future obligations.

NOTE 21 - FINANCIAL LIABILITIES HELD FOR TRADING AT FAIR VALUE THROUGH PROFIT OR LOSS, continued

The following is a SUMMARY of the financial derivatives contracted by the Bank as of June 30, 2023, and December 31, 2022, their fair value and the SUMMARY by the maturity of the notional or contractual values:

	As of June 30, 2023								Fair value MCh\$

NOTE 22 - FINANCIAL LIABILITIES AT AMORTISED COST, continued**c. Obligations to the Central Bank of Chile**

As part of the Central Bank of Chile's measures to address the shocks impacting the Chilean economy due to the current Covid-19 pandemic, the Credit Facility Conditional to Incremental Flexibility (FCIC) programme was announced. This corresponds to a unique financial facility open to banks, allowing them to continue funding households and companies' loans.

The Bank must leave collateral for these operations, which include: the Central Bank of Chile, the government and private bonds (bank and corporate) and, more recently, commercial credits from the individual assessment portfolio classified as high credit quality. FCIC resources can also be accessed through the Liquidity Line of Credit (LCL), capped at the local currency reserve requirement.

The FCIC consists of an initial facility and an additional one. The first amounts to US\$4,800 million. The additional line can reach four times the initial one, that is, US\$19,200 million. Its availability depends on two factors: growth of the base portfolio and targeting loans to smaller companies. Furthermore, the Central Bank created the FCIC 2 for US\$16,000 million.

The maturity of these obligations is as follows:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Due within 1 year	5,787,121	-
Due after 1 to 2 years	-	5,584,090
Due after 2 to 3 years	-	-
Due after 3 to 4 years	-	-
Due after 5 years	-	-
Total liabilities to the Central Bank of Chile	5,787,121	5,584,090

d. Loans from domestic financial institutions

The maturity of these obligations is as follows:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Due within 1 year	35,960	41,317
Due after 1 to 2 years	-	-
Due after 2 to 3 years	-	-
Due after 3 to 4 years	-	-
Due after 5 years	-	-
Total loans from domestic financial institutions	35,960	41,317

NOTE 22 - FINANCIAL LIABILITIES AT AMORTISED COST, continued**e. Obligations abroad**

	As of June 30,	As of December 31,
	2023	2022
	MCh\$	MCh\$
Due within 1 year	3,514,984	3,239,358
Due after 1 to 2 years	79,888	-
Due after 2 to 3 years	-	-
Due after 3 to 4 years	-	-
Due after 5 years	-	-
Total loans from foreign financial institutions	3,594,872	3,239,358

f. Debt Financial Instruments Issued and Other Financial Obligations

Debts classified as short-term constitute obligations on demand, or that will mature in one year or less. All other debts are classified as long-term. The details are as follows:

	As of June 30, 2023		
	Short-term MCh\$	Long-term MCh\$	Total MCh\$
Letters of credit	1,840	461	2,301

Provisions for adjustments to the minimum required provision for normal portfolio with individual assessment	-	-
Subtotal	-	-
Provisions established for credit risk as a result of supplementary prudential requirements	-	-
Subtotal	-	-
TOTAL	330,714	331,519

NOTE 26 - SPECIAL PROVISIONS FOR CREDIT RISK, continued

The movement in provisions as of June 30, 2023, and December 31, 2022, is shown below:

Special provisions for credit risk as of June 30, 2023 (MCh\$)	Provisions for contingent claims	Provisions for local risk	Special provisions for foreign loans	Additional provisions for loans	Provisions for adjustments to minimum provision requirements	Provisions due to supplementary prudential requirements
Balance as of January 1, 2023	37,969	550	-	293,000	-	-
Provision establishment	7,021	52	-	-	-	-
Provision application	-	-	-	-	-	-
Provision release	(7,341)	(537)	-	-	-	-
Other changes in provisions	-	-	-	-	-	-
Balance as of June 30, 2023	37,649	65	-	293,000	-	-

Special provisions for credit risk as of December 31, 2022 (MCh\$)	Provisions for contingent claims	Provisions for local risk	Special provisions for foreign loans	Additional provisions for loans	Provisions for adjustments to minimum provision requirements	Provisions due to supplementary prudential requirements
Balance as of January 1, 2022	30,801	194	-	258,000	-	-
Provision establishment	14,250	552	-	35,000	-	-
Provision application	-	-	-	-	-	-
Provision release	(7,082)	(196)	-	-	-	-
Other changes in provisions	-	-	-	-	-	-
As of December 31, 2022	37,969	550	-	293,000	-	-

NOTE 27 - OTHER LIABILITIES

The composition of the item 'other liabilities' as of June 30, 2023, and December 31, 2022, is as follows:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Other liabilities		
Cash guarantees received for financial derivative transactions (1)	1,096,929	1,017,967
Creditors for intermediation of financial instruments	49,822	265,794
Accounts payable to third parties	418,191	405,878
Valuation adjustments for macro-hedges (2)	87,186	85,725
Revenue liabilities due to income from ordinary activities generated by contracts with customers	6,135	6,354
VAT debit unpaid tax	25,705	36,814
Pending operations	17,766	21,918
Other liabilities	144,853	201,232
Total	1,846,587	2,041,682

- 1) This corresponds to guarantees related to certain derivative contracts (threshold transactions). These guarantees operate when the valuation of derivatives exceeds thresholds defined in the respective contracts and may be in favour of or against the Bank.
- 2) This corresponds to the balances of the mark-to-market valuation of net assets or liabilities hedged in a macro-hedge (Note 12).

NOTE 28 - EQUITY

a. Equity and preferred shares

As of June 30, 2023, and December 31, 2022, the Bank has a share capital of MCh\$891,303 comprising 188,446,126,794 authorised shares, which are subscribed and paid up. All these are ordinary shares with no par value and no preferences. Accordingly, share movements as of June 30, 2023, and December 31, 2022, are as follows:

	Shares	
	As of June 30, 2023	As of December 31, 2022
	Issued as of January 1,	188,446,126,794
Issuance of paid-up shares	-	-
Issuance of shares owed	-	-
Exercised stock option	-	-
Total shares	188,446,126,794	188,446,126,794

As of June 30, 2023, and December 31, 2022, the Bank does not hold any treasury shares, nor do the companies involved in the consolidation.

As of June 30, 2023, the shareholders' distribution is as follows:

Company name or Shareholder name	Shares	ADRs (*)	Total	% Of equity holding
Santander Chile Holding SA	66,822,519,695	-	66,822,519,695	35.46
Teatinos Siglo XXI Inversiones Limitada	59,770,481,573	-	59,770,481,573	31.72
The Bank of New York Mellon	-	15,693,121,271	15,693,121,271	8.33
Banks on behalf of third parties	21,032,790,139	-	21,032,790,139	11.16
Pension funds (AFP) on behalf of third parties	14,356,773,657	-	14,356,773,657	7.62
Stockbrokers on behalf of third parties	4,928,146,292	-	4,928,146,292	2.62
Other minority holders	5,842,294,167	-	5,842,294,167	3.10
Total	172,753,005,523	15,693,121,271	188,446,126,794	100.00

(*) American Depository Receipts (ADR) are certificates issued by a US commercial bank to be traded on the US securities markets.

As of December 31, 2022, the distribution of shareholders is as follows:

Company name or Shareholder name	Shares	ADRs (*)	Total	% Of equity holding
Santander Chile Holding SA	66,822,519,695	-	66,822,519,695	35.46
Teatinos Siglo XXI Inversiones Limitada	59,770,481,573	-	59,770,481,573	31.72
The Bank of New York Mellon	-	19,845,850,871	19,845,850,871	10.53
Banks on behalf of third parties	16,841,385,216	-	16,841,385,216	8.94
Pension funds (AFP) on behalf of third parties	13,742,809,166	-	13,742,809,166	7.29
Stockbrokers on behalf of third parties	6,122,497,451	-	6,122,497,451	3.25
Other minority holders	5,300,582,822	-	5,300,582,822	2.81
Total	168,600,275,923	19,845,850,871	188,446,126,794	100.00

(*) American Depository Receipts (ADR) are certificates issued by a US commercial bank to be traded on the US securities markets.

NOTE 28 - EQUITY, continued**b. Reserves**

At the Ordinary Shareholders' Meeting of Banco Santander-Chile held April 19, 2023, along with the approval of the 2022 Consolidated Financial Statements, the shareholders resolved to distribute 60% of the net profit for the year ('Profit attributable to the equity holders'), which amounted to MCh\$485,191. These earnings are equivalent to a dividend of Ch\$2,57469221 per share. In addition, it was approved that 40% of the net profit for the year shall be used to increase Retained Earnings of prior years by the amount necessary to meet the payment of the next three interest coupons on the bonds with no fixed maturity and to increase the Bank's Reserves and other retained earnings by the remaining amount. As of June 30, 2023, and December 31, 2022, the balance of reserves is MCh\$3,115,239 and MCh\$2,815,170 respectively.

c. Dividends

Details of dividend distribution can be found in the Interim Consolidated Statements of Changes in Equity.

d. As of June 30, 2023, and 2022, the composition of diluted profit and basic profit is as follows:

	As of June 30,	
	2023 MCh\$	2022 MCh\$
a) Basic earnings per share		
Profit attributable to equity holders	262,870	521,257
Weighted average number of outstanding shares	188,446,126,794	188,446,126,794
Basic earnings per share (in Ch\$)	1.40	2.77
Diluted earnings per share from continuing operations (in Ch\$)	1.40	2.77
b) Diluted earnings per share		
Profit attributable to equity holders	262,870	521,257
Weighted average number of outstanding shares	188,446,126,794	188,446,126,794
Assumed conversion of convertible debt	-	-
Adjusted number of shares	188,446,126,794	188,446,126,794
Basic earnings per share (in Ch\$)	1.40	2.77
Diluted earnings per share from continuing operations (in Ch\$)	1.40	2.77

The Bank does not hold any dilutive instruments as of June 30, 2023, and December 31, 2022.

e. Provision for interest payments on bonds with no fixed term to maturity

The Bank records interest accrual on the non-fixed maturity bonds in the Provisions for dividends, interest payments and repricing of regulatory capital financial instruments issued. As of June 30, 2023, and December 31, 2022, the balance was MCh\$4,610 and MCh\$3,625 respectively. For further information, please refer to note N 25.

NOTE 28 - EQUITY, continued

f. Other comprehensive income from investment instruments and cash flow hedges:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Investment instruments		
Balances as of January 1,	(109,392)	(112,926)
Gain (loss) on valuation adjustment of Investment Financial Instruments portfolio before taxes.	54,013	23,707
Reclassifying and adjustment of the portfolio of Financial Investment Instruments	-	-
Net realised profit	(39,235)	(20,173)
Subtotal	14,778	3,534
Total	(94,614)	(109,392)
Cash flow hedging		
Balances as of January 1,	(118,838)	(373,581)
Gain (loss) on valuation adjustment of cash flow hedges before taxes	158,004	298,029
Reclassifying and adjustments for cash flow hedges before taxes	(20,485)	(43,286)
Amount reclassified from equity included as the book value of non-financial assets and liabilities. Its acquisition or disposal was hedged as a highly probable transition.	-	-
Subtotal	137,519	254,743
Total	18,681	(118,838)
Other comprehensive income before taxes	(75,933)	(228,230)
Income tax related to other comprehensive income components		
Income tax relating to portfolio of financial investment instruments	25,546	29,536
Income tax relating to cash flow hedges	(5,044)	32,086
Total	20,502	61,622
Other comprehensive income, net of tax	(55,431)	(166,608)
Attributable to:		
Equity holders of the Bank	(56,041)	(167,147)
Non-controlling interest	610	539

The Bank expects all results included in other comprehensive income will be reclassified to profit or loss when specific conditions are met.

NOTE 28 - EQUITY, continued

g. Non-controlling interest

This includes the net amount of subsidiaries' equity attributable to equity instruments not owned, directly or indirectly, by the Bank, including the portion of profit or loss attributed to them. As of June 30, 2023, and December 31, 2022, the balance of owners' equity amounts to MCh\$4,168,518 and MCh\$4,128,808 respectively.

The non-controlling interest's share of equity and the results of affiliates are summarised as follows:

As of June 30, 2023	Participation of third parties %	Equity MCh\$	Results MCh\$	Other comprehensive income

NOTE 29 - CONTINGENCIES AND COMMITMENTS

a. Lawsuits and legal procedures

As of the date of issuance of these Interim Consolidated Financial Statements, several lawsuits have been filed against the Bank and its affiliates concerning business operations. As of June 30, 2023, the Bank had provisions of MCh\$5,833 (MCh\$5,533 as of December 31, 2022), which are included in the Interim Consolidated Statements of Financial Position under the item 'Provisions for contingencies'. For further information, please refer to Note No 24.

Banco Santander

To cover the value of legal proceedings in which there are first and second-instance rulings adverse to the interests of Banco Santander or possible alternate outcomes to these. The Bank has made provisions of MCh\$5,743 and MCh\$5,284 as of June 30, 2023, and December 31, 2022, respectively. It is noteworthy that the values have been estimated based on quantitative information from the first instance judgements adverse to the Bank and qualitative information from the process, including expert opinion from the trial, the recommendation from the defence lawyer(s) and experience based on court judgements in similar cases (jurisprudence) pronounced by different courts.

Santander Corredores de Bolsa Limitada

Lawsuit 'Echeverría vs Santander Corredora de Bolsa' (currently Santander Corredores de Bolsa Ltda), filed before the 21st Civil Court of Santiago, Role C- 12.366-2014, regarding compensation for damages due to failures in the purchase of shares, the amount of the claim is MCh\$60. As for its current situation as of June 30, 2023, this lawsuit is pending the dismissal of the case and the resolution of the motion for abandonment of proceedings filed by the Brokerage Firm.

Lawsuit 'Chilena de computación vs Banco Santander and Santander Corredores de Bolsa' filed before the 3rd Civil Court of Santiago, Role C-12325-2020. As for its current situation as of June 30, 2023, the lawsuit is in the current discussion stage, the documents requested by the Court have been exhibited, and possible actions by the petitioners are pending.

Santander Corredora de Seguros Limitada

Existing lawsuits amount to UF 2,248, which mainly relate to assets supplied by leasing. Therefore, our lawyers have not estimated any material loss from these lawsuits.

Santander Consumer Finance Limitada

Currently, there are 31 lawsuits corresponding to processes mainly related to clients. Therefore, our lawyers have not estimated any material loss from these lawsuits.

NOTE 29 - CONTINGENCIES AND COMMITMENTS, continued**b. Contingent loans**

The Bank entered various irrevocable commitments and contingent obligations to meet customers' needs. Although these obligations should not be recognised in the Interim Consolidated Statements of Financial Position, they contain credit risk and are part of the Bank's overall risk. The following table shows the contractual amounts that oblige the Bank to grant loans:

	Contingent loans	
	As of June 30, 2023	As of December 31, 2022
	MCh\$	MCh\$
Guarantees and sureties	565,217	924,173
Guarantees and sureties in Chilean currency	361,627	483,807
Guarantees and sureties in foreign currency	203,590	440,366
Letters of credit for goods movement transactions	192,752	255,522
Transactions related to contingent events	1,425,625	1,476,599
Transactions related to contingent events in Chilean currency	1,028,086	1,216,117
Transactions related to contingent events in foreign currencies	397,539	260,482
Immediately repayable unrestricted credit lines	9,071,795	8,974,077
Other credit commitments	305,214	324,962
Credits for higher studies Law No 20,027 (CAE)	1,216	1,617

Total	25,075,834	23,407,364

d. Guarantee

Banco Santander-Chile has a comprehensive bank policy for Fidelity Bond No 5721202 in force with Compañía de Seguros Chilena Consolidada SA, with coverage of US\$50,000,000 per claim with an annual cap of US\$100,000,000, which covers the Bank and its subsidiaries jointly and severally, with an expiry date of June 30, 2023; this policy has been renewed under the same conditions until June 30, 2024.

NOTE 29 - CONTINGENCIES AND COMMITMENTS, continued

Santander Corredores de Bolsa Limitada

As of June 30, 2023, the Company has guarantees deposited with the Santiago Stock Exchange to cover simultaneous operations carried out by the Company's portfolio for a total of MCh\$15,380 (MCh\$18,737 as of December 31, 2022).

Furthermore, as of June 30, 2023, the Company holds a guarantee with CCLV Contraparte Central SA, amounting to MCh\$10,016 in cash (MCh\$9,960 as of December 31, 2023).

To ensure the correct and full compliance with all its obligations as a stockbroker, as required by articles 30 et seq. of Law No 18,045 on the Securities Market, the Company has delivered fixed-income securities to the Santiago Stock Exchange for a present value of MCh\$1,042 as of June 30, 2023 (MCh\$1,040 as of December 31, 2022). This corresponds to a fixed-term deposit with Banco Santander maturing on August 8, 2023.

As of June 30, 2023, the company has a share loan guarantee of MCh\$3,528 (MCh\$3,519 as of December 31, 2022).

As of June 30, 2023, the Company has a guaranteed bond No B017883 from Banco Santander Chile to comply with the provisions of general rule No 120 of the FMC regarding the operation of placement, transfer and redemption agent of Morgan Stanley funds in the amount of USD\$300,000, which covers participants who acquire quotas of Morgan Stanley Sicav open-end foreign funds and whose maturity date is April 19, 2024.

Santander Corredora de Seguros Limitada

As required by Circular No 1,160 of the FMC (ex-SVS), the company has procured an insurance policy to guarantee correct and full compliance with all obligations arising from its operations as an insurance intermediary.

The insurance policy for insurance brokers No 10050030, which covers UF 500, and the professional liability policy for insurance brokers No 10050031, for an amount equivalent to UF 60,000, were contracted with Compañía de Seguros Generales Consorcio Nacional de Seguros SA. Both policies are valid from April 15, 2023, to April 14, 2024.

The Company has a guaranteed bond with Banco Santander Chile to ensure faithful compliance with the terms and conditions of the public bidding process, the mortgage and mortgage insurance plus ITP 2/3 for Banco Santander Chile's housing mortgages. The total amounts to UF 10,000 and UF 2,000 for each portfolio, respectively, both with maturity dates of October 30, 2023.

The company has a guaranteed bond to ensure faithful compliance with the terms of the public bidding process for fire plus earthquake insurance for the bank's housing mortgage portfolio and professional services, amounting to UF 500 and UF 10,000 with the same financial institution, both with maturity dates of December 31, 2024.

Klare Corredora de Seguros SA

As required by Circular No 1,160 of the FMC, the company has procured an insurance policy to guarantee correct and full compliance with all obligations arising from its operations as an insurance intermediary. The insurance policy for insurance brokers No 10051671, which covers UF 500, and the professional liability policy for insurance brokers No 10051670, for an amount equivalent to UF5,091, were contracted with Compañía de Seguros Generales Consorcio Nacional de Seguros SA. Both policies are valid from April 15, 2023, to April 14, 2024.

NOTE 30 - INTEREST INCOME AND EXPENSES

This comprises interest accrued during the year on all financial assets whose implicit or explicit return is obtained by applying the effective interest rate method, regardless of whether they are measured at fair value and remeasurements due to hedge accounting.

a. As of June 30, 2023, and 2022, the composition of interest income is as follows:

	For the period of 6 months until June 30,		For the quarter ended June 30,	
	2023	2022	2023	2022
	MCh\$	MCh\$	MCh\$	MCh\$
Financial assets at amortised cost				
Rights under repurchase and securities lending agreements	12	379	(546)	267

Expenses for defined benefit post-employment plan obligations	737	666	361	244
Other human resources costs	3,967	4,041	2,673	1,088
Total	211,141	208,797	113,927	111,251

Share-based compensation (settled in cash)

The Bank provides certain executives of the Bank and its affiliates a share-based payment benefit, which is settled in cash according to the requirements of IFRS 2. Accordingly, the Bank measures services received and liabilities incurred at fair value.

Until settlement of the liability, the Bank determines the liability's fair value at the end of each reporting period and on the settlement date, with any fair value changes recognised in the period results.

Pension plan

The Bank has an additional benefit available to its senior executives, consisting of a pension plan to provide them with funds for a better complementary pension upon retirement.

In this respect, the Bank will complement the voluntary contributions made by beneficiaries for their future pension with an equal contribution. Executives shall earn the right to receive this benefit only if they meet the following copulative conditions:

- Aimed at the Group's senior management.
- The general requirement for eligibility is to be still employed when they are 60 years old.
- The Bank will contract a mixed collective insurance policy (life and savings) for each executive, with the contracting party and beneficiary being the Group company to which the executive belongs.
- Periodic contributions will be made equal to the amount each manager commits to their voluntary contribution plan.
- The Bank will be responsible for granting the benefits directly.

In the event of termination of the employment relationship between the executive and the respective company before meeting the conditions described above, no entitlement shall accrue to them under this benefit plan.

Exceptionally, in the event of the manager's death or total or partial disability, their heirs shall be entitled to receive this benefit as the case may be.

The Bank will contribute to this benefit plan based on mixed group insurance policies, the beneficiary of which is the Bank. The life insurance company with which these policies are contracted is unrelated to the Bank or any other Group company.

The Bank's entitlements under the plan as of June 30, 2023, amounted to MCh\$7,572 (MCh\$6,819 as of December 31, 2022).

The Bank has quantified the amounts of the defined benefit obligations based on the following criteria:

Calculation method:

The projected unit credit method is used, which treats each year of service as generating an additional unit of benefit entitlement and values each unit separately. It is calculated according to the fund contribution that considers as the main parameters the factors related to the legal annual pension ceiling, the years of service, age and annual income of each unit valued individually.

Actuarial assumptions used:

Actuarial assumptions regarding demographic and financial variables are unbiased and mutually compatible. The most significant actuarial assumptions considered in the calculations were:

NOTE 37 - EMPLOYEE BENEFIT OBLIGATION EXPENSES, continued

The assets related to the savings fund that the Bank to the Compañía de Seguros Euroamérica contributed for particular service plans are presented in the net-related commitments. The assumptions used are as follows:

Post-Employment Plans	As of June 30, 2023	As of December 31, 2023

NOTE 42 - RESULTS FROM DISCONTINUED OPERATIONS

The Bank currently has no results from discontinued operations.

NOTE 43 - RELATED PARTY DISCLOSURES

'Related parties' refers to the Bank as well as its subsidiaries and associates, the 'key personnel' of the Bank's management (members of the Bank's Board of Directors and also the managers of Banco Santander-Chile and its affiliates, together with their close relatives), as well as entities over which the key personnel may exercise significant influence or control.

Furthermore, the Bank considers the various companies comprising Santander Group worldwide to be related parties, on the understanding that they all have a common parent company, which is Banco Santander SA (based in Spain).

Article 89 of the Chilean Corporation Law, which also applies to banks, provides that any transaction with a related party must be carried out on fair terms and conditions similar to those normally prevailing in the market.

Additionally, Article 84 of the General Banking Law limits credits granted to related parties and prohibits granting credits to the Bank's directors, general managers, or general representatives.

The Bank's transactions with its related parties are listed below. For ease of understanding, we have divided the information into four categories:

Santander Group companies

This category includes entities over which the Bank, as indicated in Note 01 (b) of these Consolidated Financial Statements, exercises some degree of influence and generally corresponds to the so-called 'business support companies'.

Associated companies

This category includes those entities over which the Bank, as indicated in Note 01 (b) of these Interim Consolidated Financial Statements, exercises some degree of influence and, in general, corresponds to the so-called 'business support companies'.

Key personnel

This category includes the members of the Bank's Board of Directors and Directors of Banco Santander-Chile and its affiliates, together with their close relatives.

Other

This category includes those related parties not included in the groups described above and which generally correspond to those entities over which key personnel can exercise noteworthy influence or control.

The terms for transactions with related parties are equivalent to those of transactions made under market conditions or to which the corresponding considerations in kind have been attributed.

NOTE 43 - RELATED PARTY DISCLOSURES, continued**a. Loans to related parties**

Loans and receivables, as well as contingent loans corresponding to related entities, are shown below:

The movement in related party loans during the financial periods of 2023, and 2022 has been as follows:

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place in the principal market for the asset or liability or the most advantageous market for the asset or liability.

For those financial instruments for which market prices are not available, fair values have been estimated using recent transactions in similar instruments or, if absent, current values or other valuation techniques based on mathematical valuation models sufficiently validated by the international financial community. In using these models, the specific features of the asset or liability to be valued and, in particular, the different types of risks related to the asset or liability are considered.

These techniques are inherently subjective and significantly affect the assumptions used, including the discount rate, estimates of future cash flows and prepayment assumptions. Therefore, the fair value of an asset or liability may not coincide exactly with the price at which the asset or liability could be delivered or settled on its valuation date and may not be justified by comparison with independent markets.

NOTE 44 - FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES**Determining the fair value of financial instruments**

The following is a comparison between the book value of the Bank's financial assets and liabilities and their corresponding fair values as of June 30, 2023, and December 31, 2022:

	As of June 30, 2023		As of December 31, 2022	
	Book value	Fair value	Book value	Fair value
	MCh\$	MCh\$	MCh\$	MCh\$

Other financial liabilities	254,342	254,343	292,995	292,995
Guarantees received for financial derivative transactions	1,096,929	1,096,929	1,017,968	1,017,968

The fair value approximates the book value of the following items, due to their short-term nature, for the following cases: cash and bank deposits, cash items in collection process and securities lending and repurchase agreements.

Furthermore, the fair value estimates presented above are not intended to estimate the value of the Bank's profits generated by its business or future activities. They, therefore, do not represent the value of the Bank as a going concern. The methods used to estimate the fair value of financial instruments are detailed below.

a. Debt financial instruments

The estimated fair value of these financial instruments was established using market values or estimates from an available dealer or quoted market prices of similar financial instruments. Investments are valued at carrying value (recorded) as they are not considered to have a fair value significantly different from their historical one. To estimate the fair value of debt investments, the variables and additional elements (where applicable) were considered, including the estimated prepayment rates and the credit risk of the issuers.

NOTE 44 - FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES, continued

b. Interbank loans and receivables from clients

The fair value of commercial, mortgage, credit cards and consumer loans are measured using discounted cash flow analysis. For this purpose, prevailing market interest rates are used regarding the product, term, amount and similar credit quality. The fair value of loans overdue by 90 days or more is measured using the market value of the associated collateral, discounted at the expected realisation rate and term. The estimated fair value is based on the book value for variable-rate loans whose interest rates frequently change (monthly or quarterly) and are not subject to any significant change in credit risk. The account balances and fair values are presented net of provisions for credit risk.

c. Deposits and other demand obligations

The disclosed fair value of non-interest-bearing deposits and savings accounts is the amount payable at the reporting date and equal to the book value. The fair value of time deposits is calculated using the discounted cash flow method, which applies current interest rates offered to a schedule of monthly maturities expected in the market.

d. Short and long-term issued debt instruments

The fair value of these financial instruments is calculated using a discounted cash flow analysis based on the current incremental lending rates for similar loan types with similar maturities.

e. Financial derivatives and hedge accounting contracts

The estimated fair value of foreign exchange forward contracts was calculated using quoted market prices for financial instruments with similar characteristics.

The fair value of interest rate swaps represents the estimated amount the Bank determines as the exit price under IFRS 13. If there are no quoted market prices (direct or indirect) for any derivative instruments, the respective fair value estimates are calculated using valuation models and techniques such as Black-Scholes, Hull and Monte Carlo simulations. It considers relevant inputs such as option volatility, observable correlations between underlying values, counterparty credit risk, implied price volatility, the speed with which volatility reverts to its mean value and the linear relationship (correlation) between the value of a variable.

Fair value measurement and hierarchy

IFRS 13 'Fair Value Measurement' establishes a fair value hierarchy, which segregates the valuation technique's inputs and/or assumptions used to measure the fair value of financial instruments. The hierarchy prioritises unadjusted quoted prices in active markets for identical assets or liabilities (level 1). The lowest priority is given to measures involving significant unobservable inputs or inputs (level 3 measures). The three levels of the fair value hierarchy are as follows:

- Level 1: inputs are quoted (unadjusted) prices in active markets for identical assets and liabilities that the Bank can access at the measurement date.
- Level 2: inputs other than quoted prices included in Level 1, which can be observed directly or indirectly for assets or liabilities.
- Level 3: unobservable input data for the asset or liability.

The estimated fair value of foreign exchange forward contracts was calculated using quoted market prices for financial instruments with similar characteristics.

The fair value of interest rate swaps represents the estimated amount the Bank expects to receive or pay to terminate the contracts or agreements, considering the term structures of the interest rate curve, volatility of the underlying and the credit risk of the counterparties.

In cases in which quotes cannot be observed, management makes its best estimate of the price that the market would set using its internal models, which in most cases use data based on observable market parameters as significant inputs (Level 2) and, in limited cases, use significant inputs that are not observable in market data (Level 3). Various techniques are used to estimate it, including extrapolating observable market data.

Financial instruments at fair value and determined by published quotations in active markets (Level 1) comprise:

- Chilean Government and Treasury bonds
- Mutual Funds

NOTE 44 - FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES, continued

If the instruments are not 100% market observable, the price is a function of other market observable prices (Level 2). The following financial instruments are classified in level 2:

Type of financial instrument	Valuation model used	Description
· Mortgage and private bonds	Present value of cash flows	RiskAmerica provides the internal rates of return (IRR) according to the following criteria: On the valuation day, if there are one or more valid transactions in the Santiago Stock Exchange for a given mnemonic code, the reported rate is the weighted average of said rates. If there are no valid transactions for a given mnemonic code on the valuation day, the reported rate is an 'IRR baseline' from a reference structure plus a 'Model Spread' based on information from historical spreads of the same or similar documents.
· Time deposits	Present value of cash flows	RiskAmerica provides the internal rates of return (IRR) according to the following criteria: On the valuation day, if there are one or more valid transactions in the Santiago Stock Exchange for a given mnemonic code, the reported rate is the weighted average of said rates. If there are no valid transactions for a given mnemonic code on the valuation day, the reported rate is an 'IRR baseline' from a reference structure plus a 'Model Spread' based on the 'Issuer curves'.
· Constant Maturity Swap (CMS), Forward FX and Inflation, Cross Currency Swap (CCS), Interest Rate Swap (IRS)	Present value of cash flows	Rates (IRR) are provided by ICAP, GFI, Tradition and Bloomberg according to the following criteria: The published market prices are used to construct the valuation curve using the bootstrapping method, and then this curve is used to value the various derivatives.
· FX Options	Black-Scholes	Formula adjusted by the volatility smile (implicit volatility). BGC Partners provide prices (volatilities) according to the following criteria: The volatility surface is built through interpolation using published market prices, and these volatilities are then used to value the options.
· Guarantees for threshold transactions, guarantee deposits	Present value of cash flows	Transactions related to derivatives contracts such as Constant Maturity Swap (CMS), Forward FX and Inflation, Cross Currency Swap (CCS), Interest Rate Swap (IRS) and FX Options.

In limited cases, unobservable inputs are used in market data (Level 3). Various techniques are used to estimate this, including extrapolating observable market data or a mix of observable data.

The following financial instruments are classified at level 3:

Type of financial instrument	Valuation model used	Description
· Caps/Floors/Swaptions	Black Normal model for Cap/Floors and Swaptions	There is no observable input of implied volatility.
	Black-Scholes	There is no observable input of implied volatility.
	Hull-White	Hybrid HW model for rates and Brownian motion for FX. There is no observable input of implied volatility.
	Implicit Forward Rate Agreement (FRA)	Start Fwd is unsupported by Murex (platform) due to the UF forward estimate.
· CCS, IRS, CMS in Active Bank Rate (TAB)	Present value of cash flows	Valuation obtained using yield curve interpolating to maturity of flows. Nevertheless, TAB is not a directly observable variable nor correlated to any market input.
	Present value of cash flows	Valuation using prices of instruments with similar characteristics plus a liquidity charge-off rate.
· CCS (maturities over 25 years)	Present value of cash flows	Rates (IRR) are provided by ICAP, GFI, Tradition and Bloomberg according to the following criteria: The published market prices are used to construct the valuation curve using the bootstrapping method and then this curve is used to value the various derivatives.
· Recognition bonds	Spread over risk-free	Valuation by the stochastic dynamic model to obtain the discount rate.
· Receivables accounts valued at fair value	Present value of cash flows	Measured by discounting the estimated cash flow using the interest rate of the new contracts.

The Bank estimates that any changes in the unobservable inputs for instruments classified as level 3 would not result in significant differences in the fair value measurement.

NOTE 44 - FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES, continued

The following table presents the assets and liabilities that are measured at fair value constantly:

Total	45,051,218	-	30,964,992	14,086,226

The fair value of other assets and other liabilities approximates its book value.

The methods and assumptions for estimating fair value are defined below:

- Loans and amounts owed by credit institutions and clients: Fair value is estimated for groups of loans with similar characteristics. The fair value was measured by discounting the estimated cash flow using the interest rate of the new contracts. First, the future cash flow of the current loan portfolio is estimated using contractual rates. Then the new loans distributed over the risk-free interest rate are incorporated into the (risk-free) yield curve to calculate the loan portfolio at fair value.

Regarding behavioural assumptions, it is important to underline that a prepayment rate is applied to the loan portfolio, resulting in a more realistic future cash flow.

- Deposit and Bank Borrowings: The fair value of deposits was calculated by discounting the difference between the cash flows on a contractual basis and prevailing market rates for instruments with similar maturities. The book value was considered to approximate the fair value for variable-rate deposits.
- Debt instruments issued and other financial obligations: The fair value of long-term borrowings was estimated using the discounted cash flow to the interest rate presented in the market with similar terms and maturities.

The valuation techniques used to estimate each level are defined in Note 2.

There were no transfers between levels 1 and 2 as of June 30, 2023, and 2022, and December 31, 2022.

NOTE 44 - FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES, continued

The following table presents the Bank's activity for assets and liabilities measured at fair value repeatedly using significant unobserved inputs (level 3) as of June 30, 2023, and December 31, 2022:

	Assets MCh\$	Liabilities MCh\$
As of January 1, 2023	142,776	-

As of December 31, 2022	142,776	-
Total profit or loss included in profit or loss as of December 31, 2022 attributable to the change in unrealised profit (loss) relating to assets or liabilities as of December 31, 2021	41,962	-

The quarterly Local Risk Factor Internal Committee reviews the cases in which transfers are to be made between the different levels. During the year 2023, the Committee decided to reclassify instruments from level 3 to level 2.

Realised and unrealised profit (loss) included in results as of June 30, 2023, and 2022, on assets and liabilities measured at fair value regularly through significant unobservable inputs (Level 3) are recorded in the Interim Consolidated Income Statements under 'Net income from financial operations'.

The potential effect as of June 30, 2023, and 2022, on the continuous valuation of assets and liabilities measured at fair value through significant unobservable inputs (Level 3) —which stem from a change in key assumptions in case using other reasonably possible assumptions is more or less favourable than those used— is not considered significant to the Bank.

NOTE 44 - FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES, continued

The following tables show the financial instruments subject to compensation according to IAS 32 for 2023 and 2022:

As of June 30, 2023	Linked financial instruments offset on the balance sheet			Residuals of financial instruments that are not linked and/or not subject to compensation MCh\$	Amount in the statement of financial position MCh\$
	Gross imports	Amounts offset on the balance sheet	Net amount presented in the balance sheet		
	MCh\$	MCh\$	MCh\$		
Assets					
Financial derivatives contracts and hedge accounting (*)	10,401,952	-	10,401,952	593,061	10,995,013
Repurchase and securities lending contracts	-	-	-	-	-
Interbank credits and receivables from clients	-	-	-	38,123,042	38,123,042
Total	10,401,955	-	10,401,955	38,716,103	49,118,058

(*) These items include guarantees of MCh\$1,695,431 and MCh\$746,729 for derivative assets and liabilities, respectively.

To reduce the credit exposure on its financial derivatives transactions, the Bank has entered into bilateral collateral agreements with its counterparties, setting out the terms and conditions under which they operate. In general terms, collateral (received/delivered) operates when the net fair value of the financial instruments held exceeds the thresholds defined in the respective contracts.

NOTE 45 - MATURITY OF FINANCIAL ASSETS AND LIABILITIES ACCORDING TO REMAINING MATURITIES

Financial derivative contracts are listed below, according to their collateral agreement:

Financial derivatives contracts and hedge accounting	As of June 30, 2023		As of December 31, 2022	
	Assets	Liabilities	Assets	Liabilities
	MCh\$	MCh\$	MCh\$	MCh\$
Derivative contracts with a zero threshold collateral agreement	9,728,601	10,731,079	8,177,074	9,588,768
Derivative contracts with non-zero threshold collateral agreement	662,730	1,160,594	440,091	536,318
Derivative contracts without collateral agreement	603,671	885,942	3,533,557	3,983,028
Total financial derivatives	10,995,002	12,777,615	12,150,722	14,108,114

As of June 30, 2023, and December 31, 2022, the detail of the maturity of financial assets and liabilities according to their remaining maturities is as follows:

As of June 30, 2023	On demand MCh\$	Up to 1 month MCh\$	Between 1 to 3 months MCh\$	Between 3 to 12 months MCh\$	Between 1 to 3 years MCh\$	Between 3 to 5 years MCh\$	More than 5 years MCh\$	Total MCh\$
Financial assets

The fair value of derivative instruments is shown in Chilean Peso currency and the notional amount is not included.

NOTE 47 - RISK MANAGEMENT AND REPORTING

General information

The Bank has placed risk management at the centre of its activity to ensure that the organisation as a whole acts responsibly in the new social context, economic changes, customer demands and the business environment, always aligned with the strong corporate culture and the legal regulations in force.

The risk management and control model is underpinned by a set of common principles, a risk culture embedded throughout the Bank, a strong governance structure, and advanced risk management processes and tools.

Banco Santander's risk management and control principles are mandatory, must always be applied, and comprise the regulatory requirements and best practices. They are:

1. A strong risk culture that all employees follow covers all risks and promotes socially responsible management, contributing to the Bank's long-term sustainability.
2. All employees are responsible for risk management and must know and understand the risks generated by their daily activities. They must avoid taking risks whose impact is unknown or exceeds the Bank's risk appetite limits.
3. Involvement of senior management in ensuring consistent risk management and control through their conduct, actions, and communications. This body promotes the risk culture, assessing its degree of implementation and monitoring that the profile remains within the levels defined in the Bank's risk appetite.
4. Independence of risk management and control functions.
5. Proactive and comprehensive risk management and control approach across all businesses and risk types.
6. Proper and comprehensive information management enables risks to be identified, assessed, managed and communicated appropriately at the appropriate levels.

These principles, together with several interconnected tools and processes of the strategy, such as the risk appetite, risk profile assessment, scenario analysis, risk reporting structure, and annual budget processes, all articulate a holistic control structure for the entire Bank.

The Bank has a solid risk culture known as Risk Pro, which defines how risks are understood and managed daily. It is based on the principle that all employees are responsible for risk management, where their classification is fundamental for effective management and control. All identified risks should, therefore, be associated with risk categories to organise their management, control and related information.

The Bank's risk classification enables effective risk management, control and communication. Its corporate risk framework includes the following:

- Credit risk: is the risk of financial loss arising from the default or deterioration in the credit quality of a customer or counterparty to which Banco Santander Chile has provided financing or has assumed a contractual obligation.
- Market risks: arise from holding financial instruments whose value may be affected by changes in market conditions; they generally include the following types of risk:
 - Foreign exchange risk arises from changes in the exchange rate between currencies.
 - Fair value interest rate risk arises from changes in market interest rates.
 - Price risk arises from changes in market prices, either due to factors specific to the instrument itself or factors affecting all instruments traded in the market.
 - Inflation risk arises due to changes in inflationary indices in Chile, which would apply mainly to financial instruments denominated in UF.
- Liquidity risk: is the risk that liquid financial resources will not be available to meet obligations as they fall due or can only be obtained at a high cost.
- Operational risk: is the risk of loss due to inadequate or failed internal processes, employees and systems or due to external events. It includes legal risk and conduct risk.
- Capital risk: it is the risk that the Bank has insufficient capital quantity and/or quality to meet the minimum requirements to operate as a bank, respond to market expectations regarding its credit capacity and support the growth of its business and any strategies that may emerge per its strategic plan.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

Risk governance

The Bank has a robust risk governance structure that pursues effective control of the risk profile, consistent with the appetite defined by the Board and based on the distribution of roles among the three lines of defence and a strong committee structure, which is reinforced by the Risk Pro culture that permeates the entire organisation.

The Bank's three lines of defence model aim to ensure effective risk management and control:

First line

Business lines and all other risk-creating functions are the first lines of defence. These functions must ensure their risks align with the approved risk appetite and corresponding limits. Any unit that originates risk has primary responsibility for managing said risk.

Second line

The Risk and Compliance and Conduct functions. Its role is to independently monitor and challenge the risk management activities of the first line of defence. These functions ensure risk management under the appetite defined by the Board and promote a strong risk culture throughout the organisation.

Third line

The Internal Audit function regularly assesses that policies, methodologies, and procedures are adequate and effectively implemented in managing and controlling all risks.

The risk, compliance and internal audit functions have an adequate level of separation and independence, as well as direct access to the Board and its committees.

Risk committee structure

The Board of Directors is responsible for establishing and monitoring the Bank's risk management structure. It has a corporate governance system aligned with local regulations and international best practices.

Furthermore, it has several high-level committees that are key to risk management, each of which is composed of directors and executive members of Santander's management and are described in detail in the Corporate Governance section of this Report:

A. Comprehensive Risk Committee (CIR)

The Board's Comprehensive Risk Committee is the body responsible for advising the Board on the definition of the risk appetite that the business areas may assume and supervising the correct identification, measurement, and control of all risks that may affect the Bank. In addition, this committee acts as a governance body through which the Board oversees the reasonableness of risk measurement and control systems.

B. Directors and Audit Committee

The main objective of the committee is to supervise the Bank and its subsidiaries concerning the process of generating the financial statements; the management of the internal and external auditors in this process so that the institution provides adequate information for its shareholders, investors and the public in general, and to ensure the efficiency of the company's internal control systems, as well as its compliance with the rules and regulations applicable.

C. ALCO and Markets Committee (Assets Liabilities Committee)

Its main functions are monitoring and controlling structural balance sheet risks, such as inflation exposure limits, interest rate risk, capital funding levels and liquidity. Furthermore, it reviews the developments in the most relevant local and international monetary markets and policies, as well as revealing and analysing the main economic and risk factors that directly impact the performance of trading portfolios.

D. Appointment Committee

The committee constantly reviews the application of appointment policies and processes to those positions defined as 'key positions' in particular and reviews the application of these policies to other individuals in the organisation in general.

E. Remuneration Committee

Constant review of the regulatory documentation concerning the evaluation and remuneration of positions defined as 'key positions' and also of other persons in the organisation in general.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

The Board delegates the identification, measurement and control of the various risks faced by the Bank to the Risk Division, which is led by the Chief Risk Officer (CRO), and reports directly to the CEO. The Chief Risk Officer (CRO) is responsible for monitoring all risks and reviewing and advising the business lines on managing these risks. This division is responsible for credit, market, non-financial, compliance, and reputational risks. The Director of Internal Audit reports directly to the Chairman of the Board of Directors to ensure independence from senior management and thus be an effective third line of defence in risk management and internal control.

CREDIT RISK

Credit risk is the risk of financial loss arising from the default or deterioration in the credit quality of a client or counterparty to which the Bank has provided financing or assumed a contractual obligation. It is our most relevant risk, both in terms of exposure and capital consumption.

Credit risk management

The Bank's credit risk identification, analysis, decision and control processes are based on a comprehensive view of the credit risk cycle, including the transaction, the client and the portfolio.

Identifying credit risk allows for active management and effective control of portfolios. External and internal risks are identified and classified in each business to adopt corrective and mitigating measures where necessary, through the following processes:

1. **Planning:** Planning allows us to establish business objectives and define concrete action plans according to our risk appetite statement. The commercial strategic plans are a management and control tool defined by the business and risk areas for our credit portfolios. Commercial strategies, risk policies, means and infrastructures are determined, ensuring a holistic view of the portfolios.
2. **Risk assessment and credit rating process:** Risk approval criteria are generally based on the ability of borrowers to meet their financial obligations. The funds or net cash flows from their business or regular income are analysed to determine this capacity. Our credit quality assessment models are built around rating engines, different in each of our segments, which we monitor and test to fine-tune the decisions and ratings they assign.
3. **Scenario analysis:** This enables the determination of potential risks in credit portfolios, providing a better understanding of their behaviour under different macroeconomic conditions, as well as anticipating and applying management strategies to avoid future deviations from established plans and goals.
4. **Monitoring:** Holistic monitoring of all clients facilitates the observation of credit quality and early detection of impacts on risk evolution. The regular monitoring of business performance and its comparison with pre-established plans are essential in credit risk management. Our monitoring function uses a system that helps establish client-specific monitoring levels, policies and actions.
5. **Credit risk mitigation techniques:** Risk approval criteria are based on determining the ability of borrowers to meet their financial obligations without relying on collateral or pledged assets as security. These are always considered as a second recovery channel in case the first one fails and are defined as a reinforcement measure added to a credit operation to mitigate the loss in case of default.
6. **Recovery management:** Recovery management defines a strategy based on the economic environment, business model and other particularities of local recovery. Effective and efficient recovery management requires segmenting our customers according to their characteristics and using new digital channels that support the creation of sustainable value.

The Board has delegated responsibility for credit risk management to the Integrated Risk Committee (IRC) and the Bank's risk departments, whose roles are summarised below:

- Formulation of credit policies, in consultation with the business units, covering collateral requirements, credit assessment, risk rating and reporting, documents and legal procedures in compliance with regulatory, legal and internal Bank requirements.
- Establishing the authorisation structure for the approval and renewal of credit applications. The Bank structures credit risk levels by limiting the concentration of credit risk in terms of individual debtors, groups of debtors, industry segments and countries.
- Authorisation limits assignment to the respective business unit officers (commercial, consumer, SME) to be monitored continuously by the administration. Furthermore, these limits are regularly reviewed. Risk assessment teams at the branch level regularly interact with clients. Yet, for large operations, the risk teams at the head office and even the Risk Committee collaborate directly with clients in assessing credit risks and preparing credit applications.
- Limiting exposure concentrations to customers, counterparties, in geographic areas, industries (for receivables or credits), and credit rating and liquidity (for investments) by the issuer.
- Developing and maintaining the Bank's risk classification to categorise risks by the exposure to financial loss of the respective instruments and to focalise risk management, specifically on the related risks.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

- Reviewing and assessing credit risk. The risk divisions are largely independent of the Bank's commercial division and assess all credit risks above designated limits before customer credit approvals or specific investment acquisitions. Credit renewals and reviews are subject to similar processes.

The risk assessment teams regularly interact with our clients. Risk teams collaborate directly with clients to assess credit risks and prepare credit applications for larger transactions. Credit approval committees, including risk and commercial staff, must ensure that each applicant meets appropriate qualitative and quantitative parameters. The Bank's Board of Directors defines the powers of each committee.

In preparing a credit application for a corporate customer whose loans are approved on an individual basis, the Bank verifies various parameters such as debt servicing capacity (including, typically, projected cash flows), the customer's financial history and/or projections for the economic sector in which it operates. The risk division is actively involved in this process and prepares the credit application for the customer. All applications contain an analysis of the client's strengths and weaknesses, a rating and a recommendation. Credit limits are not determined based on outstanding customer balances but on the financial group's direct and indirect credit risk. For example, a corporation would be assessed with its subsidiaries and affiliates.

Their respective risk divisions assess and approve consumer loans (individuals, SMEs). The assessment is based on an evaluation system known as Garra (Banco Santander-Chile), an automated process with a scoring system that includes the credit risk policies implemented by the Bank's Board of Directors. The credit application process is based on collecting information to determine the client's financial situation and ability to pay. The parameters used to assess the applicant's credit risk include several variables such as income levels, length of current employment, indebtedness, and credit bureau reports.

For investments in debt instruments, the Bank assesses the probability of Non-collectability or default of issuers or counterparties using internal and external assessments such as the Bank's independent risk assessors. Furthermore, the Bank adheres to a strict and conservative policy that ensures that the investment issuers and counterparties to derivative transactions have the highest reputation.

Furthermore, the Bank operates several instruments which, although they involve exposure to credit risk, are not reflected in the Interim Consolidated Statements of Financial Position, such as guarantees and sureties, documentary letters of credit, letters of guarantee and commitments to extend credit.

Guarantees and sureties represent an irrevocable payment obligation. If a guaranteed customer defaults on its obligations to third parties guaranteed by the Bank, the Bank will make the corresponding payments. These transactions involve the same credit risk exposure as ordinary loans.

Documentary letters of credit are commitments recorded by the Bank on behalf of the customer. They are secured by the traded goods they relate to and have a lower risk than direct borrowing. The guaranteed bonds are contingent commitments that become effective only if the customer fails to perform the works agreed with a third party, as guaranteed by the bonds.

In the case of commitments to extend credit, the Bank is potentially exposed to losses equal to the total unused commitment. Nevertheless, the likely amount of loss is less than the unused total of the commitment. In addition, the Bank monitors the maturity period of the credit lines because long-term commitments generally have a higher credit risk than short-term commitments.

Covid-19 Solutions

The government has supported SMEs by expanding the Guarantee Fund for Small Entrepreneurs (Fogape) and by amending rules and regulations to encourage banks to provide working capital loans to small businesses.

Regarding provisions, on July 17, 2020, the CMF requested the determination of specific provisions for loans backed by Fogape guarantees, for which expected losses must be determined, estimating the risk of each transaction, without considering the substitution of the credit quality of the guarantee, according to the appropriate individual or group analysis method, under the provisions of Chapter B-1 of the CASB. See Note 2, letter q.

As of June 30, 2023, and December 31, 2022, the balance of provisions for this item amounted to MCh\$15,361 and MCh\$19,423, respectively.

Additional provisions

According to FMC regulation, banks can establish provisions over the already described limits to protect themselves from the risk of non-predictable economic fluctuations that could affect the macroeconomic environment or a specific economic sector. These provisions shall be reported under liabilities per number 9 of Chapter B-1 of the FMC's CASB.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

Due to the adverse effects caused by the pandemic, the decrease in state aid, and the current economic situation, the Bank's Board of Directors approved the creation of additional voluntary provisions, which, as of December 31, 2022 and June 30, 2023, amounted to MCh\$293,000.

Maximum credit risk exposure

For financial assets recognised in the Interim Consolidated Statements of Financial Position, the exposure to credit risk is equal to their carrying amount. The maximum credit risk exposure for financial guarantees granted is the maximum amount the Bank would have to pay if the guarantee were enforced.

The following is the distribution by financial asset of the Bank's maximum credit risk exposure as of June 30, 2023, and December 31, 2022, without deducting collateral and credit enhancements received:

	Note	As of June 30, 2023 Amount of exposure MCh\$	As of December 31, 2022 Amount of exposure MCh\$
Deposits in banks	7	2,342,891	1,982,942
Cash in collection process	7	860,177	843,816
Financial assets held for trading at fair value through profit or loss	8		
Financial derivatives contracts		10,603,105	11,672,960
Debt instruments		125,989	154,046
Financial assets at fair value through other comprehensive income	11		
Debt instruments		6,853,341	5,880,733
Loans and receivables from clients		122,620	142,306
Financial derivative contracts for hedge accounting	12	391,908	477,762
Financial assets at amortised cost	13		
Debt instruments		4,784,584	4,867,591
Interbank loans		25,790	32,955
Loans and receivables from clients		38,123,042	37,659,885
Unrecognised loan/credit commitments:			
Letters of credit for goods movement transactions		192,752	255,522
Transactions related to contingent events		1,425,625	1,476,599
Immediately repayable unrestricted credit lines		9,071,795	8,974,077
Guarantees and sureties		565,217	924,173
Contingent loans linked to CAE		1,216	1,617
Other credit commitments		303,998	313,345
Total		75,794,050	75,660,329

Under the new CASB, the provisions for credit risk on credits and receivables (Due from banks and loans and receivables from clients) and contingent credits are determined under the criteria defined in Chapters B-1 to B-3 of the new CASB. While Credits and receivables from clients and debt instruments measured at fair value through other comprehensive income, and debt instruments measured at amortised cost, their impairment is measured according to Chapter 5.5 of IFRS 9. Debt instruments measured at fair value through profit or loss are not subject to impairment requirements.

In the case of derivatives, the fair value of derivatives includes the adjustment reflecting the counterparty credit risk (CVA). The CVA is calculated considering the potential exposure to each counterparty in future periods.

The methodology established for determining provisions for loan losses (Due from banks and Receivables from clients) and contingent loans is set out in Note No 2 of accounting principles letter q). The methodology used for calculating provisions for loans and receivables and debt instruments measured at fair value through other comprehensive income and debt instruments measured at amortised cost is described in Note 2 (r).

Information related to the concentration of credit risk is provided in Note 13, letters k, m, and n.

For derivative instruments, as of June 30, 2023, the Bank's foreign exposure, including counterparty risk in the derivatives portfolio, was US\$4 million or 8.70% of assets.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

The table below calculates the derivative exposure using the corresponding credit risk, which is equal to the net replacement value plus the maximum potential value, considering cash collateral that mitigates the exposure. Additional details regarding our exposure to countries rated above 1 and corresponding to the largest exposures are also included. The exposure as of June 30, 2023, considering the fair value of derivative instruments, amounts to:

Domestic Loans	Ranking	Derivative instruments (Market-adjusted)	Deposits	Loans	Financial investments	Total exposure
		US\$ million	US\$ million	US\$ million	US\$ million	US\$ million
Hong Kong	2	-	10	16	-	26
México	3	4	-	-	-	4
China	2	-	-	16	-	16
Total		4	10	32	-	46

Our exposure to Spain within the group is as follows:

Counterpart	Domestic Loans	Classification	Derivative instruments (market-adjusted)	Deposits	Loans	Financial investments	Total exposure
Banco Santander SA	España	1	476	7	-	-	483

(*) Our exposure to Santander Hong Kong, BSCH Spain and Santander NY is included as exposure to Spain.

Recognition and measurement of credit risk provisions

The Bank segments loans and contingent loans by the type of obligor and loan to a level appropriate for applying the models.

Provisions required to cover loans and contingent loan exposures are calculated and set up monthly in relation to the valuation models used and the type of transaction.

Provisions established for financial assets measured at amortised cost and Loans and receivables at fair value through other comprehensive income are treated as valuation accounts for the respective assets. The amount of the portfolio net of provisions is reported in the Statement of Financial Position. Additional provisions and contingent loan provisions are reported under liabilities, in accordance with the instructions of the FMC.

Provisions for financial assets at fair value through other comprehensive income are presented in Note 11, provisions for financial assets at amortised cost are presented in Note 13 and special provisions for credit risk (contingent credits, country risk, additional) are presented in Note 26.

The following is a SUMMARY of loans (due from banks and receivables from clients) and contingent loan exposures and the corresponding established provisions according to CNCB standards (B1 to B3) as of June 30, 2023, and December 31, 2022:

As of June 30, 2023 (**) MMS	Financial assets before provisions					Established provisions					Deductible FOGAPEC covid-19 guarantee *

** See Note 13 letters c, d and e for further details.

The following is a summary of the provisions associated with financial assets that are provided for per IFRS 9:

	As of June 30, 2023	As of December 31, 2022
	MCh\$	MCh\$
Debt instruments at amortised cost	1,107	894
Debt instruments at fair value with changes in other comprehensive income	1,367	877
Loans and receivables	194	326
Total	2,688	2,097

As of June 30, 2023, and December 31, 2022, the debt instrument portfolios include instruments of the Central Bank of Chile and/or the General Treasury of the Republic. Accordingly, their risk has been classified as low (no significant increase in risk). The description of the main components of the IFRS 9 model used by the Bank to determine these provisions can be found in Note 2 (r).

As of June 30, 2023, and December 31, 2022, the loans included in the portfolio of loans and receivables measured at fair value through other comprehensive income are assets of a high credit quality with individual assessment (normal portfolio).

Non-compliance

The non-performing portfolio includes debtors and their loans for which recovery is considered remote, as they show an impaired or zero payment capacity, have been subject to forced restructuring or are overdue by 90 days or more in the payment of interest or principal, and are classified in the non-performing portfolio (C1 to C6).

Non-performing portfolio	As of June 30, 2023		As of December 31, 2022	
	Financial assets	Provisions	Financial assets	Provisions
	MCh\$	MCh\$	MCh\$	MCh\$
Interbank loans	-	-	-	-
Commercial loans	1,108,788	423,008	1,067,492	406,919
Mortgage loans	550,955	101,722	422,064	76,998
Consumer loans	224,805	141,339	179,593	120,801
Contingent loan exposure	16,891	10,150	13,347	-
Total	1,901,439	676,219	1,682,496	604,718

Under the IFRS 9 model, the Bank uses one of the default presumption factors when an asset is overdue by 90 days or more.

Debt instruments and loans and receivables measured at fair value through other comprehensive income do not present any non-performance.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

Individual/Group

Group assessments are suitable for dealing with many transactions with low individual amounts and involving individuals or small companies. The Bank groups debtors with similar credit risk characteristics by associating each group with a certain probability of non-performing and a recovery rate based on a substantiated historical analysis. To this end, the Bank implemented the standard model for mortgage and commercial loans and the internal model for consumer loans.

IFRS 9 aims to recognise expected credit loss over the asset's life, attending to significant increases in credit risk since the initial recognition. This may require a group assessment as the increase in credit risk may become more evident before the financial instrument is overdue, depending on the instrument's nature and available information. Always on the premise that information is available at no cost or effort. The grouping is based on similar risk characteristics.

Credit impairment

The impaired portfolio consists of the non-performing loans (C1 to C6) plus B3 and B4 in the case of individual assessment. As of June 30, 2023, and December 31, 2022, the impaired portfolio amounts to MCh\$2,108,044 and MCh\$1,847,333, respectively.

IFRS 9 defines an asset as impaired when one or more events harm the estimated future cash flows, as evidenced by the issuer's financial difficulties, default or delinquency, bankruptcy or financial reorganisation, and disappearance from the active market.

Debt instruments, and loans and receivables measured at fair value through other comprehensive income are not impaired.

Charge-offs

Charge-offs must be affected when the contractual rights to the cash flows expire. Charge-offs are translated into derecognitions in the Statement of Financial Position and include the unmatured portion in the case of instalment loans. Additional circumstances could lead to a loan charge-off, such as when the Bank concludes that it will not obtain any flows, or there is no enforceable title, when collection actions become time-barred or when the deadlines defined by the FMC are reached (see Note 2 letter q). As of June 30, 2023, and December 31, 2022, loan write-offs amount to MCh\$216,794 and MCh\$337,851, respectively.

IFRS 9 states that a charge-off occurs when there is no reasonable expectation of recovering all or part of the contractual cash flows. A charge-off constitutes a derecognition.

Debt instruments, and loans and receivables measured at fair value through other comprehensive income do not present impaired instruments/transactions.

Reconciliation of provisions and loans

The reconciliation between the opening and closing balance of established provisions for financial assets measured at amortised cost and for contingent claims is presented in Note 13 (f, g, h, i and j).

The reconciliation between the opening and closing balance of established provisions for financial assets measured at fair value through other comprehensive income is presented in Note 11.

The reconciliation of interbank, commercial, residential and consumer loans, and contingent loan exposure as of June 30, 2023, and December 31, 2022, is presented below:

The normal portfolio comprises those debtors whose ability to pay enables them to meet their obligations and commitments, which is not expected to change. When a debtor is experiencing financial difficulties or a significant deterioration in its ability to pay, and there are reasonable doubts about the full recovery of principal and interest under the contractual terms, the customer is classified in the substandard portfolio. A customer will be classified towards the non-performing portfolio if the possibility of recovering the credit is considered remote, as it shows an impaired or no ability to pay.

The gross movements in financial assets at fair value through other comprehensive income and debt instruments at amortised cost as of June 30, 2023, and December 31, 2022, are presented below:

Guarantees and credit enhancements

In some cases, the maximum credit risk exposure is reduced by guarantees, credit enhancements and other actions that mitigate the Bank's exposure. On this basis, the constitution of guarantees is a necessary but insufficient instrument in the granting of a loan; therefore, the acceptance of the risk by the Bank requires the verification of other variables or parameters, such as the capacity to pay or the generation of resources to mitigate the risk incurred.

The securities management and valuation procedures are set out in the internal risk management policy. These policies set out the basic principles for credit risk management, including managing collateral received in client transactions. In this respect, the risk management model includes assessing the existence of appropriate and sufficient guarantees to recover the loan when the debtor's circumstances do not allow it to meet its obligations.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

The procedures used for the valuation of collateral align with best market practice, involving appraisals on real estate collateral, the market price on stock market securities, the value of units in an investment fund, etc. In addition, all received guarantees must be properly instrumented, registered, and approved by the Bank's legal divisions.

The Bank also has rating tools that enable it to rank the credit quality of transactions or clients. The Bank has historical databases that store internally generated information to study how this probability varies. Rating tools vary according to the customer segment analysed (commercial, consumer, SME, etc.).

The maximum credit risk exposure by type of loan, the associated collateral and the net credit risk exposure as of June 30, 2023, and December 31, 2022, are presented below:

	As of June 30, 2023				As of December 31, 2022			
	Maximum credit risk exposure	Guarantee	Net exposure	Allowance	Maximum credit risk exposure	Guarantee	Net exposure	Allowance
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Interbank loans	25,799	-	25,799	9	32,991	-	32,991	36

Contingent loans exposure	2,639,509	375,313	2,264,196	37,649	3,048,383	476,327	2,572,056	37,969
Total	41,879,173	26,558,980	15,320,193	1,128,481	41,920,416	26,373,603	15,546,813	1,074,856

Mortgage placements are, by their nature, covered by the properties that generated the loan, that is, the property that the customer has acquired and which guarantees the transaction.

When the Bank can receive or foreclose a property, it is accounted for as an 'Asset received or awarded in payment', and the loan and its provision are derecognised. The asset received is carried at the lower of book value and fair value (appraisal) minus costs to sell, under IFRS 5, and categorised as held for sale. Once a loan has been derecognised, there are no subsequent enforcement activities.

Impaired and non-impaired financial assets with associated guarantees, collateral or credit enhancements in favour of the Bank as of June 30, 2023, and December 31, 2022, are presented below:

	As of June 30,		As of December 31,	
	2023		2022	
	MCh\$		MCh\$	
Non-impaired financial assets				
Properties/mortgages	28,796,666		28,012,572	
Investments and others	70,917,475		4,441,058	
Impaired financial assets				
Properties/mortgages	2,273,637		2,009,968	
Investments and others	246,863		274,296	
Total	102,234,641		34,737,894	

Financial derivative transactions are secured by collateral agreements deposited or transferred by one party in favour of the other, either in cash or financial instruments, and reduce the counterparty's credit risk. These guarantees are monitored periodically (usually daily). Accordingly, the net balance per counterparty is determined based on agreed parameters, and a decision is taken concerning whether collateral is to be posted or collected.

Credit limits of debtors related to the ownership or management of the Bank

According to Article 84, No 2 of the General Banking Law (LGB) and the Updated Compilation of Banking Regulations (RAN) 12-4, the total amount of credits granted to a group of related persons may not exceed 5% of the bank's effective equity; this limit increases to 25% if what exceeds 5% corresponds to credits secured by guarantees. In no case may the total of such credits granted by a bank exceed the amount of its effective equity. Furthermore, these credits may not be granted on more favourable terms of maturity, interest rates or guarantees than those granted to third parties in similar operations.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

A person's relationship with the Bank arises when they have a direct, indirect or third-party ownership interest in the Bank, participate in the management or are presumed to have such a relationship until there is sufficient evidence to rebut the presumption.

A group of persons related to the Bank shall be understood to include all natural and legal persons who can exert significant and permanent influence on the decisions of the other; there is a presumption that credits granted to one person will be used for the benefit of another, or there is a well-founded presumption that the persons maintain a relationship and form a unit of economic interest.

Subsidiaries, business support companies and affiliated companies are companies related to a bank.

Security over movable or immovable tangible property, or any other property that may legitimately be received as security, constitutes valid security.

As of June 30, 2023, and December 31, 2022, the credit limit for debtors related to the ownership or management of the Bank under Article 84 No 2 of the General Banking Law and Chapter 12-4 of the Updated Compilation of Banking Regulations (RAN) are as follows:

	As of June 30, 2023		As of December 31, 2022	
	%	MCh\$	%	MCh\$
Global limitation to related groups of persons	7%	475,465	7%	473,133
Regulatory capital		6,792,358		6,759,047

MARKET RISK

Market risk arises due to market activity through financial instruments whose value may be affected by changes in market conditions, reflected in changes in the various assets/liabilities and financial risk factors. Market risk management aims to manage and control market risk exposure within acceptable parameters.

Four main risk factors affect market prices: interest rates, exchange rates, price, and inflation.

- Interest Rate Risk: the exposure to losses arising from adverse changes in market interest rates that affect the value of instruments, contracts and other transactions recorded on the balance sheet.
- Foreign exchange risk is the sensitivity to losses arising from adverse changes in the value of the exchange rates of foreign currencies, including gold, in which the instruments, contracts and other transactions recorded on the balance sheet are denominated.
- Inflation risk is the exposure to losses arising from adverse changes in the units or indices of readjustment defined in national currency. The instruments, contracts, and other transactions are denominated on the balance sheet.
- Price risk is generated by the volatility of rates or prices of assets or liabilities. Prepayment risk arises when, based on price movements, holders can alter the future cash flows of these assets or liabilities, leading to balance sheet mismatches that pose additional market risk management challenges.

Market risk management

The measurement and control of market risks are the responsibility of Market Risk Management, which is part of the Risk Division. The limits are approved by the appropriate committees, with responsibility resting mainly with the ALCO and Markets Committee. The Integrated Risk Committee also reviews the main market risks.

The Financial and Capital Management areas, as part of the Financial Executive Vice-Presidency, have the following functions, which are supervised and controlled by the ALCO and Markets and Risk Management:

- To optimise the cost of liabilities and seek the most efficient financing strategies, including issuing bonds and bank facilities.
- Management of short- and long-term regulatory liquidity limits.
- Inflation risk management and exposure
- To manage local and foreign currency rate risk.
- Capital adequacy and requirements

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

Rate sensitivity is measured primarily using an analysis that quantifies the impact on earnings and the balance sheet of parallel movements in the real and nominal interest rate curve in Pesos and US dollars.

The Bank's internal management for measuring market risk is mainly based on analysing the management of the following three components:

- trading portfolio
- Local financial management portfolio
- Foreign financial management portfolio

Treasury manages the Bank's trading portfolios and ensures they remain within the loss limits determined, calculated and estimated by Market Risk Management. The trading portfolio (measured at fair value through profit or loss) consists mainly of those investments measured at fair value, free of any restriction on their immediate sale and which are often bought and sold by the Bank to sell them in the short term to benefit from short-term price movements. Financial management portfolios (measured at fair value through other comprehensive income) include all financial investments not considered in the trading portfolio.

The roles that concern the trading portfolio comprise the following:

- i. applying Value-at-Risk (VaR) techniques to measure interest rate risk,
- ii. adjusting trading portfolios to market and the measurement of daily profit and loss from trading activities,
- iii. comparing the actual VAR with the established limits,
- iv. establishing loss control procedures for losses above predetermined limits, and
- v. providing information on trading activities to the ALCO, other members of the Bank's management, and the Global Risk Department

The functions regarding financial management portfolios entail the following:

- i. Applying sensitivity simulations (as explained below) to measure the interest rate risk of local currency activities and the potential loss predicted by these simulations and
- ii. Providing the respective daily reports to the ALCO, other members of the Bank's Management, and the Global Risk Department.

Market risk - Trading portfolio

The Bank applies VaR methodologies to measure the trading portfolio's foreign currency risk and interest rate sensitivity. The Bank has a consolidated trading position comprising fixed-income investments and foreign currency trading. This portfolio comprises bonds issued by the Central Bank of Chile, mortgage bonds and low-risk locally issued corporate bonds. At the end of the year, the trading portfolio did not present investments in equity portfolios.

Historical simulation methodology is used to estimate the Bank's VaR, which consists of observing the behaviour of the profits and losses that would have occurred with the current portfolio if market conditions in a given historical period had prevailed and using this information to infer the maximum loss with a given level of confidence. The methodology accurately reflects the historical distribution of market variables and does not require any specific probability distribution assumptions. All VaR measures are intended to determine the distribution function for the change in the value of a given portfolio. Once this distribution is known, the percentile is calculated related to the required confidence level, which will equal the value at risk under these parameters. As calculated by the Bank, the VaR estimates the maximum expected loss of the market value of a given portfolio over a 1-day horizon with 99.00% confidence. This is the maximum one-day loss the Bank could expect to incur on a given portfolio with a 99.00% confidence level. In other words, it is the loss that the Bank would expect to surpass only 1.0% of the time. The VaR provides a single estimate of market risk that is not comparable from one market risk to another. Returns are calculated using a time window of 2 years or at least 520 data points backwards in time from the VaR calculation reference date.

The Bank does not calculate three separate VaRs. Instead, a single VaR is calculated for the entire trading portfolio, further segregated by risk type. The VaR programme performs a historical simulation and calculates a Profit and Loss (G&P) statement for 520 data points (days) for each risk factor (fixed income, foreign exchange and equities). Then, the G&P of each risk factor is added together, and a consolidated VaR is calculated with 520 data points or days of data. Simultaneously, the VaR is calculated for each risk factor based on the individual G&P calculated for each factor. Moreover, a weighted VaR is calculated similarly, as described above, but gives a higher weighting to the most recent 30 data points. As a result, the higher of the two VaRs is reported. The Bank uses VaR estimates to warn if statistically estimated losses in the trading portfolio exceed prudent levels and, therefore, certain predetermined limits are in place.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued*Limitations of the VaR model*

In applying this methodology for calculation, no assumptions are made about the probability distribution of risk factors changes; instead, the historically observed changes are used to generate scenarios for the risk factors under which each portfolio item will be valued. The definition of a valuation function $f_j(x_i)$ for each instrument j is necessary, preferably the same as the one used to calculate the market value and daily position results. This valuation function shall be applied to generate simulated prices for all instruments in each scenario.

Furthermore, the VaR methodology should be interpreted considering the following limitations:

- Market rate and price changes may not be independent and identically distributed random variables, nor may they have a normal distribution. The normal distribution assumption, in particular, may underestimate the probability of extreme market movements.
- The historical data used by the Bank may not provide the best estimate of future joint distribution of changes in risk factors. Any modification of the data may be inappropriate. In particular, the use of historical data may fail to capture the risk of possible extreme and adverse market fluctuations regardless of the time frame used;
- A 1-day time horizon may not fully capture those market risk positions that cannot be liquidated or hedged within one day. It would not be possible to liquidate or hedge all positions in one day;
- The VaR is calculated at the close of business, but trading positions may change substantially during the trading day;
- The use of a 99% confidence level does not consider or make any representation about losses that may occur beyond this confidence level, and
- The VaR model does not capture all the complex effects of risk factors on the value of positions or portfolios and, therefore, may underestimate potential losses.

During the period ended on June 30, 2023, and December 31, 2022, the Bank did not exceed the VaR limits of the trading portfolio's three components: fixed-income, equity, and foreign currency investments.

The Bank performs back-testing daily and generally finds that trading losses exceed the estimated VaR almost every 100 trading days. At the same time, a limit was set on the maximum VaR it is willing to accept on the trading portfolio. As of June 30, 2023, and December 31, 2022, the Bank has remained within its VaR threshold, even in instances where the actual VaR exceeded the estimated VaR.

The high, low and average levels for each component and each year were as follows:

VAR	As of June 30,	
	2023	2022
	US\$ million	US\$ million
Consolidated:		
High	7.84	9.59
Low	3.65	2.04
Average	5.54	3.90
Fixed income investments:		
High	7.94	8.89
Low	3.67	2.06
Average	5.39	3.41
Variable income investments:		
High	-	0.04
Low	-	-
Average	-	0.01
Foreign currency investments		
High	3.91	3.33
Low	0.19	0.22
Average	1.00	1.04

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued*Market risk – Local and foreign financial management*

The Bank's financial management portfolio includes most of the Bank's assets and non-trading liabilities, including the credit/loan portfolio. The Bank's commercial strategies (structural risk) heavily influence these portfolios' investment and funding decisions.

The Bank uses sensitivity analysis to measure the market risk of local and foreign currency (not included in the trading portfolio). The Bank conducts a scenario simulation, which is calculated as the difference between the present value of the flows in the chosen scenario (curve with a parallel movement of 100 bps in all segments) and their value in the baseline scenario (current market). All items in local currency indexed to inflation (UF) are adjusted by a sensitivity factor of 0.57, representing a yield curve shift by 57 basis points in real rates and 100 basis points in nominal rates. The same scenario is conducted for net foreign currency positions and interest rates in US dollars. The Bank has also set limits on the maximum loss these interest rate movements can have on budgeted capital and net interest income for the year. To determine the consolidated limit, the foreign currency limit is added to the local currency limit for both the net financial loss limit and the capital loss and reserves limit using the following formula:

Bounded limit = square root of $a^2 + b^2 + 2ab$, in which:

a: limit in national currency.

b: limit in foreign currency.

Since it is assumed that the correlation is 0. $2ab = 0$.

Limitations of sensitivity models

The most important assumption is using a change of 100 basis points in the yield curve (57 basis points for real rates). The Bank uses a change of 100 basis points as sudden changes of this magnitude are considered realistic. In addition, the Global Risk Department has also established comparable country limits to compare, monitor and consolidate market risk by country in a realistic and orderly manner.

Furthermore, the methodology of sensitivity simulations should be interpreted considering the following limitations:

- The scenario simulation assumes that the volumes remain on the Bank's Interim Consolidated Statements of Financial Position and are always rolled over at maturity, omitting the fact that certain credit risk considerations and prepayments may affect the maturity of certain items.
- This model assumes an equal change across the entire yield curve of everything and does not consider different movements for different maturities.
- The model does not consider the sensitivity of volumes resulting from changes in interest rates.

Limits on budgeted finance income losses are calculated based on expected finance income for the year that cannot be obtained. This means the actual percentage of finance income at risk could be higher than expected.

Market Risk - Financial Management Portfolio as of June 30, 2023, and December 31, 2022:

	As of June 30, 2023		As of December 31, 2022	
	Effect on financial income	Effect on capital	Effect on financial income	Effect on capital

Low	16,516	68,043	16,515	66,098
Average	44,343	173,865	23,438	71,003

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued*Inflation risk*

The Bank's assets and liabilities are indexed according to the Unidad de Fomento (UF) variation. The Bank has, in general, more assets than liabilities in UF. Therefore, moderate rises in inflation have a positive effect on repricing income, while a fall in the UF value negatively impacts the Bank's margin. To manage this risk, the Assets and Liabilities Committee limits the difference between UF-denominated assets and liabilities, which may not exceed 30% of the Bank's interest-earning assets. Financial Management manages this mismatch on a day-to-day basis, and the limits are calculated and monitored by the Market Risk Division.

Market Risk items and their measurement

Market Risk Exposure is measured and monitored using the difference between the foreign currency asset and liability balances (net position) and the cash flows payable (associated with liability items) and cash flows receivable (associated with asset items) in the Trading and Banking Books for a given period.

Foreign currency items and term mismatches are exposed to different adjustment factors, sensitivities and rate changes.

The Board of Directors of Banco Santander presented and approved the Market Risk Exposure Policy on a Standardised Basis.

The following risks will determine Market Risk Exposure:

- Interest Rate Risk
- Currency Risk
- Readjustment Risk
- Currency Options Risk

The following illustrates the market risk exposure according to the FMC and the Central Bank of Chile guidelines. The maximum exposure to long-term interest rate risk is 35% of regulatory capital and is approved by the Board of Directors. The maximum exposure to short-term interest rate risk is 30% of net interest and repricing income plus interest rate sensitive fees:

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Trading portfolio market risk		
Rate Risk Exposure	427,109	441,688
Currency Risk Exposure	2,207	1,535

Short-term market risk of financial management portfolio		
Short-term Exposure to Interest Rate Risk	182,916	193,895
Exposure to Readjustment Risk	175,217	112,523
Short-term exposure to financial management portfolio	358,133	306,418
Limit = 35% net (net interest and adjustment income + interest rate-sensitive fees)	602,423	530,199
Available margin	244,290	223,781
Long-term market risk of financial management portfolio		
Long-term exposure to interest rate risk	984,016	1,194,181
Limit = 35% of Effective Equity	2,377,325	2,365,666
Available margin	1,393,309	1,171,485

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

IBOR Reform

In December 2020, the ICE Benchmark Administration Limited (IBA) launched a consultation on its intention to cease publication of non-USD LIBOR and USD LIBOR 1W and 2M tenors until December 31, 2021, and of all other USD LIBOR tenors after publication on June 30, 2023. The Bank has been working since 2019 on the transition to risk-free reference rates (RFR), including the SOFR. In this context, the Bank's work plan includes the identification of the impacted customers, the impacted areas, the various risks to which the Bank is exposed, the determination of working teams for each risk, the involvement of senior management in a robust project governance plan and an action plan for each of the identified impacted/risk areas, which will enable us to meet the challenges imposed by the changes in benchmark rates. As of June 30, 2023, and December 31, 2022, the financial asset and liability exposures impacted by the IBOR reform are presented below:

	Loans and receivables from clients	Deposits	Financial instruments	Financial derivatives contracts (Assets) MCh\$	Financial derivatives contracts (Liabilities) MCh\$
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
31.06.2023	110,296	-	33,327	1,132,737	1,050,598
31.12.2022	515,277	-	36,730	1,818,517	1,712,642

The Bank has been working based on its IBOR transition programme, focusing mainly on: i) Identifying the risks associated with the transition and defining mitigation actions, ii) Developing products benchmarked to the proposed replacement rates, iii) Developing transition capacity through the renegotiation of existing USD LIBOR benchmarked contracts, vi) Preparing systems for the transition from USD LIBOR to SOFR or term SOFR and conducting the relevant tests to ensure a successful migration. In this regard, efforts in the latter half of 2022 and the first half of 2023 have focused on the following aspects:

- Renegotiating USD LIBOR-linked contracts maturing after June 30, 2023, with impacted customers.
- Preparing systems and performing the relevant tests for migrating USD LIBOR transactions to SOFR or term-SOFR, both bilaterally and with the Chambers.
- Preparing curves, pricers and risk models to ensure their performance with the new SOFR and term-SOFR rates.

In the second half of 2023 onwards, work will focus on monitoring the smooth transition of the remaining loan transactions to be migrated in systems, which will take place on the next interest settlement date following the signature of the new SOFR or term-SOFR contract. It should be noted that all contracts referenced to USD LIBOR before June 30, 2023, have been renegotiated and remediated, and all migrations with LCH and bilateral derivatives have been successfully completed, so that the use of synthetic USD LIBOR has not been necessary.

As of June 30, 2023, the financial asset and liability items impacted by the IBOR reform are loans and receivables from customers, deposits, financial instruments and derivative contracts. To fulfil its functions, the Integrated Risk Committee works directly with the Bank's risk and control departments, whose joint objectives include:

- To assess those risks which, due to their size, could compromise the Bank's solvency or which present potentially significant operational or reputational risks;
- to ensure that the Bank has the means, systems, structures and resources following the best practices to implement the risk management strategy;
- to ensure the integration, control and management of all the Bank's risks;
- to implement consistent risk principles, policies and metrics across the Bank and its businesses;
- to develop and implement a risk management model in the Bank so that risk exposure is properly integrated into the different decision-making processes;
- to identify risk concentrations and mitigation alternatives, monitor the macroeconomic and competitive environment and quantify sensitivities and the foreseeable impact of different scenarios on risk positioning; and
- to manage the Bank's structural liquidity, interest rate and exchange rate risks, as well as the Bank's own funds base.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

In order to achieve the objectives mentioned above, the Bank (Management and Asset-Liability Committee) performs several activities related to risk management, which include: calculating the risk exposures of the different portfolios and/or investments, considering mitigating factors (guarantees, netting, collateral, etc.); to calculate the expected loss probabilities of each portfolio and/or investments; to assign loss factors to new operations (rating and scoring); to measure the risk values of portfolios and/or investments against different scenarios through historical simulations; to set limits to potential losses based on the different risks incurred; to determine the potential impact of structural risks on the Bank's Interim Consolidated Income Statements; to set limits and alerts to ensure the Bank's liquidity; and to identify and quantify operational risks by business lines and thus facilitate their mitigation through corrective actions.

The Integrated Risk Committee is primarily responsible for monitoring compliance with the Bank's risk management policies and procedures and reviewing the adequacy of the risk management framework concerning the risks faced by the Bank.

Benchmark interest rate reform - phase 2

In 2013, IOSCO published the Principles for Financial Benchmarks (IOSCO Principles), setting standards for developing benchmarks. Subsequently, the FSB formed the Official Sector Steering Group (OSSG) to apply the IOSCO Principles to IBOR (Interbank Offered Rates) indices. Since then, central banks and regulators in several jurisdictions have organised working groups to recommend alternative indices to indices such as EONIA (Euro Overnight Index Average) and LIBOR (London Interbank Offered Rates). As of September 13, 2018, the European Central Bank's working group recommended that the euro short-term interest rate (€STR) should replace the EONIA. Accordingly, as of October 2, 2019, when the €STR became available, the EONIA changed its methodology to be calculated as the €STR plus a spread of 8.5 basis points. This change in the EONIA methodology was intended to facilitate the transition of the EONIA market to €STR before its final cessation on January 3, 2022.

On March 5, 2021, the Financial Conduct Authority (FCA) announced the final dates for the cessation of LIBOR:

- On December 31, 2021, the publication of USD LIBOR (one-week and two-month maturities), CHF LIBOR (all maturities), GBP LIBOR (overnight, one-week, two-month and 12-month maturities), JPY LIBOR (overnight, one-week, two-month and 12-month maturities) and EUR LIBOR (all maturities) ceased.
- On December 31, 2021, the calculation methodology for some LIBORs was amended to publish temporary synthetic LIBORs, which became non-representative: GBP LIBOR (1-month, 3-month and 6-month maturity) and JPY LIBOR (1-month, 3-month and 6-month maturity).
- On June 30, 2023, the publication of USD LIBOR (overnight, 1 month, 3 months, 6 months and 12 months) will cease.

In October 2020, the International Swaps and Derivatives Association (ISDA) launched the protocol and supplement of substitute indices (from now on, fallbacks) for IBORs (which came into force on January 25, 2021). It provided derivatives market participants with new fallbacks of LIBORs (among other IBORs, such as EURIBOR) for existing and new derivative contracts. Furthermore, on August 19, 2021, ISDA launched a new protocol allowing institutions to incorporate a fallback to the EONIA as the applicable collateral rate in ISDA collateral arrangements (CSAs). To control the risks and address the different challenges generated by the transition, in 2019, the Corporate Department launched a global Santander programme. This IBOR transition programme enabled us to ensure that the risks linked to the process were identified and managed consistently and appropriate measures were taken to mitigate them. The programme structure focuses on the following areas: Technology and Operations, Legal, Client Relationship, Risk Management and Modelling, Conduct and Communication, and Accounting and Finance.

In 2021, the programme focused on making all contractual, commercial, operational and technological changes necessary to address the transition from LIBOR and EONIA rates that were discontinued in 2021.

Throughout 2022, the IBOR Santander programme focused on making all the contractual, commercial, operational and technological changes necessary to undertake the USD LIBOR transition (overnight, 1 month, 3 months, 6 months and 12 months).

Finally, in 2023, the IBOR Santander programme focused on adequately completing the technological and legal milestones established by the regulators, basically: having all contracts referenced to USD LIBOR renegotiated and remediated before June 30, 2023 (the index cessation date) and performing the migration of USD LIBOR referenced transactions with a maturity after June 2023 with the LCH and bilaterals on the established dates (April 22, May 20 and June 30, 2023).

LIQUIDITY RISK

This refers to the possibility that an entity may not be able to meet its payment commitments or may have to resort to raising funds on burdensome terms or on terms that could damage its image and reputation.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

Liquidity risk management

The Bank's approach to liquidity management is to ensure, to the extent possible, that it always has sufficient resources to meet its obligations as they fall due under normal circumstances and stress conditions without incurring unacceptable losses or risking damage to the Bank's reputation.

The Financial Management area manages liquidity risk by using a portfolio of liquid assets to ensure that the Bank always maintains sufficient liquidity to cover short-term fluctuations and long-term funding while complying with internal liquidity regulatory requirements. The Financial Management Directorate receives information from all business units on the liquidity profile of their financial assets and liabilities, as well as a SUMMARY of other projected cash flows from future business. Based on this information, the area maintains a portfolio of short-term liquid assets, consisting mainly of liquid investments, loans and advances to other banks, to ensure that the Bank has sufficient liquidity. The liquidity needs of the business units are covered by short-term transfers from Financial Management to cover short-term fluctuations and long-term funding to meet all structural liquidity needs.

Accordingly, the Board sets limits on a minimum portion of maturing funds available to meet such payments and on a minimum level of interbank operations and other lending facilities that should be available to cover drawings at unexpected levels of demand, which is reviewed periodically by the Asset and Liability Committee (ALCO) whose functions include monitoring the necessary liquidity risk management strategies. Setting these limits is conceived as a dynamic process that responds to the level of risk appetite deemed acceptable by the Bank and its entities.

The system of limits is sufficiently robust to allow the level of exposure each institution incurs to liquidity risks to be known at all times.

Besides the limits, the Bank includes alert indicators by the concentration of counterparties, type of products, and maturities in its management to diversify the funding sources and their maturity structure.

The Bank monitors its liquidity position daily, determining the future flows of its inflows and outflows. Furthermore, stress tests are performed at the end of each month, using a variety of scenarios covering both normal market conditions and market fluctuation (stress) conditions.

The Bank has a structure of internal liquidity limits that Financial Management and the Treasury must respect. Market Risk Management calculates and monitors the consumption of internal limits, verifies compliance with them and communicates their status to senior management and the Board of Directors.

At the beginning of each calendar year, these limits are proposed by Market Risk Management, approved locally at the ALCO and Markets and then ratified at the highest level.

Liquidity limits and early warning indicators, and internally defined management measures can be differentiated into the following three groups:

- Limits associated with concentration and mismatches of cash flows and liquidity of the Bank's operations.
- Liquidity Management Tools, called Structural Liquidity or Funding Table, are used to determine the Bank's structural liquidity position and enable its active management as an essential mechanism to ensure its assets' funding under optimal conditions permanently.
- Early warning indicators are linked with concentration risks and as tools for detecting and anticipating potential liquidity stress situations and, if necessary, activating the Liquidity Contingency Plan.

Market Risk Management establishes and updates the Liquidity Management Policy (LMP) contents. Reviews and possible updates are conducted once a year. Nevertheless, it may be updated at the request of any areas affected by the LMP that have identified the need for modification. The Board approves the contents of the LMP of Directors.

Market Risk Management provides all the necessary tools for the statistical analysis required by local liquidity regulations. It also assesses whether the models used are valid at least once a year. The Board of Directors must approve the conclusions of this analysis.

In periods of normal liquidity, Financial Management applies policies and makes arrangements to keep the Bank within internal and regulatory limits.

If a crisis has been identified, even at its mildest level, the Liquidity Crisis Committee applies the necessary policies to deal with potential liquidity shortfalls or restrictions, creates contingency plans to manage emergencies quickly, and reports such situations to senior management and the respective committees.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

Liquidity risk measurement and control

1. Time-limit mismatches subject to regulatory limits

The Regulatory Liquidity Ratio measures and limits the mismatches of net income flows relative to capital. Under current regulations, the 30-day mismatch cannot exceed one time the Bank's core capital for both domestic and foreign currency, and the 90-day mismatch cannot exceed two times.

2. Monitoring indicators and liquidity ratios subject to regulatory limits

An important component of liquidity risk management is High-Quality Liquid Assets (HQLA). These are balance sheet assets, mainly consisting of financial investments that are not pledged as collateral, have low credit risk, and have a deep secondary market.

According to Basel III standards, these assets are divided into three tiers, with Tier 1 assets being the most liquid and Tier 3 the least liquid. Level 1 assets are mostly composed of bonds from the Republic of Chile, the Central Bank of Chile, and the United States Treasury Department.

HQLA	As of June 30,		As of December 31,	
	2023		2022	
	MCh\$		MCh\$	
Tier 1: available	858,405		1,453,265	
Tier 1: fixed income	5,707,516		5,424,452	
Tier 2: fixed income	7,179		8,066	
Total	6,573,100		6,885,783	

3. Liquidity Coverage Ratio (LCR)

The Liquidity Coverage Ratio (LCR) measures liquid assets over 30-day net cash outflows. It is used by banks globally as part of the Basel III standards. Since 2019, Chilean banks have been required to have a minimum level of 60%, which will gradually increase to 100% by 2022. A minimum level of 100% was required for the financial year of 2023.

The objective of the LCR is to promote the short-term resilience of banks' liquidity risk profiles. To this end, the LCR ensures that these organisations have an adequate pool of unencumbered High-Quality Liquid Assets, which can be easily and immediately converted into cash in the private markets to cover short-term liquidity needs.

Liquidity coverage ratio	As of June 30, 2023		As of December 31, 2022	
	%		%	
LCR	176		175	

Banco Santander-Chile's LCR indicator was well above the minimum required for 2021 and already above the 100% required for 2022. This reflects the conservative liquidity policies imposed by the Board of Directors through the Assets and Liabilities Committee.

4. Net Stable Funding Ratio (NSFR)

This indicator is required by Basel III and provides a sustainable maturity structure of assets and liabilities so that banks maintain a stable funding profile concerning their activities.

The Central Bank and the FMC defined a minimum NSFR level of 60% by 2022, rising to 100% by 2026. By 2023 the minimum level required is 70%.

Net stable funding ratio	As of June 30, 2023		As of December 31, 2022	
	%		%	
NSFR	109		116	

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued**5. Information on liquidity position per the requirements of the Central Bank of Chile****i. Maturity mismatches**

The Central Bank of Chile published on March 8, 2022, Rules on the Management and Measurement of the Liquidity Position of Banking Companies, which modernises liquidity regulation, aligning the published regulatory requirements of the FMC in line with the Basel III standards.

According to the Central Bank, the liquidity position is measured and monitored through the difference between cash flows payable, which are associated with liability and expense account items, and cash flows receivable, which concern asset and income account items, for a given period or time frame, referred to as the maturity mismatch.

The liquidity policy on an Adjusted Basis was presented and approved by the Board of Directors of Banco Santander-Chile. Maturity mismatch calculations are performed separately for domestic and foreign currencies.

Maturity mismatches shall be made in the following time frames:

- First time frame: up to 7 days inclusive
- Second time frame: between 8 days and 15 days inclusive
- Third time frame: between 16 and 30 days inclusive
- Fourth time frame: between 31 days and 90 days inclusive

	As of June 30, 2023					
	Individual			Consolidated		
	Up to 7 days	Up to 15 days	Up to 30 days	Up to 7 days	Up to 15 days	Up to 30 days
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Cash flow to be received (assets) and income	7,641,379	1,388,413	5,732,972	6,174,843	1,399,214	5,734,135
Cash flow payable (liabilities) and expenses	10,763,352	1,835,674	2,078,794	10,747,747	1,835,674	2,078,794
Mismatch	(3,121,973)	(447,261)	3,654,178	(4,572,904)	(436,460)	3,655,341
Mismatch subject to limits			84,944			1,354,023
Limits:						
1 times the capital			4,168,518			4,287,883
Available margin			4,253,462			2,933,860
% Used			2%			32%
	As of December 31, 2022					
	Individual			Consolidated		
	Up to 7 days	Up to 15 days	Up to 30 days	Up to 7 days	Up to 15 days	Up to 30 days
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Cash flow to be received (assets) and income	9,123,887	1,805,516	3,552,792	9,269,188	1,804,580	3,514,336
Cash flow payable (liabilities) and expenses	9,295,580	1,855,664	2,702,150	9,320,125	1,855,664	2,707,135
Mismatch	(171,693)	(50,148)	850,642	(50,937)	(51,084)	807,201
Mismatch subject to limits			628,801			705,180
Limits:						
1 times the capital			4,128,808			4,238,372
Available margin			4,757,609			4,943,552
% Used			15%			17%

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

ii. Composition of funding sources

The main sources of third-party funding are as follows:

Main sources of funding	As of June 30,	As of December 31,
	2023	2022
	MCh\$	MCh\$
Deposits and other demand liabilities	13,272,010	14,086,226
Time deposits and other term equivalents	14,892,389	12,978,790
Interbank borrowing	9,417,953	8,864,765
Debt and regulatory capital instruments issued	9,961,573	9,490,009
Total	47,543,925	45,419,790

The Central Bank has statutory powers allowing it to demand banks to hold reserves of up to 40% on average for demand deposits and up to 20% for time deposits to implement monetary measures. Furthermore, as the aggregate amount of demand deposits exceeds 2.5 times the bank's regulatory capital, the bank must maintain a 100% 'technical reserve' against them in bonds and Central Bank's notes.

As of June 30, 2023, and December 31, 2022, the Central Bank required Santander to maintain a technical reserve of MCh\$0 for both periods.

The volume and composition of liquid assets are presented in item 2 above.

The liquidity coverage ratio is presented in item 3 above.

6. Maturity analysis of financial liabilities

The remaining contractual maturities of financial liabilities are provided in Note 45.

The liquidity management inherent in derivative and non-derivative financial liabilities is managed through various levers that enable this risk to be kept in line with the profile defined by the Bank while at the same time making efficient use of available liquidity. To this end, a high level of liquid assets is maintained, and the level of expected short-term income and expenditure is monitored daily, thus avoiding high concentrations of maturities. On the other hand, a very diversified funding matrix is maintained, both across product types and customer types.

OPERATIONAL RISK

Operational risk is defined as the risk of loss due to defects or failures of internal processes, employees and systems or external events. It covers risk categories such as operational incidents, cloud computing, cyber security, business continuity, and strategic and non-strategic outsourcing.

Operational risk is generated in all business and support areas and is inherent in all products, activities, processes and systems. For this reason, all employees are responsible for managing and controlling the operational risks generated by their activities. Our operational risk control and management model is based on a continuous process to identify, assess and mitigate risk sources, whether or not they have materialised, ensuring that risk management priorities are properly established.

Operational risk management

The operational risk model regulates the necessary elements for adequate management and control of operational risk, aligned with compliance with advanced regulatory standards and best management practices, and includes the following phases:

- strategy and planning;
- identification, assessment and monitoring of risks and internal controls;
- implementation and monitoring of mitigation measures;
- availability of information, adequate reporting and escalation of relevant issues.

The main operational risk tools used are:

- Internal events database. Recording operational risk events with financial impact (all losses are recorded, regardless of their amount) or non-financial impact (such as the regulatory impact on customers and/or services). This information:
 - allows root-cause analysis;
 - raises awareness of the risks;

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

- enables the escalation of relevant operational risk events to the senior management of the Risk division with maximum immediacy;
- facilitates regulatory reporting;
- Self-assessment of operational risks and controls. A qualitative process that assesses the main operational risks related to each function, the state of the control environment and their assignment to the different functions within the Bank, using the judgement and experience of a panel of experts from each function.

The objective is to identify and assess material operational risks that could prevent business or support units from achieving their objectives. Once the risks and the internal controls that mitigate them have been assessed, mitigating measures are identified if risk levels are above tolerable.

This process integrates specific operational risk reviews that allow for a cross-cutting identification of risks, especially technological risks, fraud, supplier risks and factors that could lead to other operational risks and specific regulatory non-compliance.

- External events database. Quantitative and qualitative information of external operational risk events. The database allows for a detailed and structured analysis of relevant events in the sector, comparing the loss profile and the proper preparation of self-assessment exercises and scenario analysis.
- Analysis of operational risk scenarios. Its objective is to identify events with an extremely low probability of occurrence that could generate significant losses for the Bank and establish appropriate mitigation measures through the assessment and expert opinion of the business lines and risk managers.
- A statement establishing the Bank's commitment to control and limit non-financial risk events that lead to or could lead to financial losses; fraud events; operational and technological incidents; legal and regulatory breaches; conduct issues, or reputational damage. Although a certain volume of losses is expected, unexpected high-severity losses due to a failure of controls are not acceptable.
- Internal audit, external audit and regulators' recommendations. They provide relevant independent information on inherent and residual risk and identify areas for improvement in controls and processes.
- Capital model: a model that captures the Bank's risk profile, based primarily on information gathered from the internal loss database, external data and scenarios. The main application of the model is to determine the economic capital for operational risk and the estimation of expected and stressed losses, which are used in the operational risk appetite.
- Other specific tools to further analyse and manage operational risks include assessing new products and services, managing business continuity plans, and updating the operational risk programme's perimeter and quality review processes.

The Bank's operational risk management and reporting system support programmes and tools focusing on governance, risk and compliance. It provides information for management and reporting and helps improve decision-making in operational risk management by consolidating information, simplifying the process, and avoiding duplication.

Operational continuity plan

Digital transformation is revolutionising the way banks operate, presenting new business opportunities while also giving rise to a wide range of emerging risks, such as technology risks, cyber risks and an increasing reliance on suppliers, which increases exposure to events that may affect the delivery of services to our customers.

The Bank is highly committed to ensuring robust control of the environment as determined by the best industry standards. This seeks to strengthen our operational resilience to potentially disruptive events, thereby ensuring adequate service delivery to our customers and system stability.

One of the main pillars is a business continuity management system aimed at ensuring the continuity of business processes in the event of a disaster or major incident. This process identifies the potential impacts that threaten the entity, supplying the correct protocols and governance to ensure an effective response capability. Its main objectives are:

- To protect the integrity of people in a contingency situation.
- To ensure that core functions are performed, and the impact on service delivery to our customers is minimised in contingency events.
- To meet the Bank's obligations to its employees, customers, shareholders and other stakeholders.
- To comply with regulatory obligations and requirements.
- To minimise the entity's potential financial losses and impact on the business.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

- To protect the brand image, credibility and trust in the entity.
- To reduce operational effects by providing effective procedures, priorities, and strategies for recovering and restoring business operations following a contingency.
- To contribute to stabilising the financial system.

The pandemic challenged the business continuity planning frameworks and strategies. While some protocols had to be adapted, this crisis demonstrated that the Bank has a robust Business Continuity Management system.

Relevant mitigation measures

The Bank implements and monitors mitigation measures related to the main sources of risk through internal operation risk management tools and other external sources of information.

Business transformation and digitalisation bring new risks and threats, such as increased payment fraud and origination (credit) fraud. We have improved control mechanisms and designed new products to mitigate these risks.

Strong authentication processes in the customer enrolment process and the reinforcement of anti-fraud alerts in origination are increasingly widespread resources to mitigate the risk of fraud.

In the case of cards, the use of chip and PIN cards in shops and ATMs, two-step authentication with one-time passwords (dynamic verification passwords), reinforced security at ATMs through the incorporation of physical protection and anti-skimming elements, as well as improvements in the logical security of the devices have become widespread.

In the case of Internet banking, verification of online banking transactions with a second security factor of one-time passwords, implementation of specific protection measures for mobile banking, such as identification and registration of customer devices, monitoring of the security of the e-banking platform to prevent attacks on the systems, among others.

Cybersecurity

Cybersecurity threats are expected to increase. The financial sector is expected to be one of the main targets. With the increased reliance on digital systems, cybersecurity is one of the main non-financial business risks. Therefore, our goal is to make the Bank a cyber-resilient organisation that can quickly resist, detect, and respond to cyber-attacks by constantly evolving and improving its defences.

In this area, the Bank continues to develop its control and monitoring framework in line with the best international practices.

Outsourcing of services

Consistent with our digitalisation strategy, the Bank aspires to present its customers with the best solutions and products on the market. This implies increasing services provided by third parties and the intensive use of new technologies such as cloud services. In addition, due to increasing cyber risks and regulatory requirements, we have updated and strengthened the supplier management framework, internal control framework and risk culture to ensure that risks associated with third-party procurement are properly assessed and managed.

The Bank has identified the suppliers that could present a higher level of exposure for our operations and the services provided to our customers. Accordingly, it has reinforced the monitoring of these suppliers to ensure that:

- They have an appropriate control environment, depending on the level of risk of their service.
- Business continuity plans are in place to ensure service delivery in case of disruptive events.
- They have controls to protect sensitive information processed during service provision.
- Contracts and agreements with third parties include the necessary clauses to protect the interests of the Bank and our clients while at the same time covering existing legal obligations.
- There are exit strategies, including service reversion or migration plans, in the case of services with a strong impact on business continuity and high replacement complexity.

Insurance

To address operational risk and other risk types generated by the Bank's own operations, insurance has been procured for property damage, general civil liability, fraud, expenses arising from cybersecurity breaches, and third-party claims against executives, among others.

NOTE 47 - RISK MANAGEMENT AND REPORTING, continued

Exposure to net loss, gross loss and gross loss recovery per operational risk event

	As of June 30, 2023 MCh\$	As of December 31, 2022 MCh\$
Gross loss and expenses for operational risk events in the period		
Internal fraud	538	91
External fraud	2,712	8,513
Labour practices and business security	3,862	8,095
Clients, products and business practices	612	789
Damage to physical assets	104	221
Business interruption and system failures	885	981
Execution, delivery and process management	4,599	3,624
Subtotal	13,312	22,314
Expense recoveries for operational risk events in the period		
Internal fraud	-	-
External fraud	(1,682)	2,194
Labour practices and business security	(885)	1,391
Clients, products and business practices	(144)	673
Damage to physical assets	(12)	-
Business interruption and system failures	(799)	2
Execution, delivery and process management	(2,287)	809
Subtotal	(5,809)	5,069
Net loss from operational risk events	7,503	17,245

NOTE 48 - INFORMATION ON REGULATORY CAPITAL AND CAPITAL ADEQUACY INDICATORS

The Bank defines capital risk as that which the Bank or any of its companies will incur in insufficient quantity and/or quality of capital necessary to: meet the minimum regulatory requirements to operate as a bank; meet market expectations regarding its creditworthiness; and support the growth of its business and any strategic opportunities that may arise, under its strategic plan.

The objectives in this respect include in particular:

- To meet internal capital and capital adequacy targets.
- To comply with regulatory requirements.
- To align the Bank's strategic plan with the capital expectations of external stakeholders (rating agencies, shareholders and investors, clients, supervisors, etc.).
- To support business growth and any strategic opportunities that may arise.

The Bank has a capital adequacy position that exceeds regulatory requirements.

Capital management optimises value creation in the Bank and its business segments. The Bank continuously assesses its risk-return ratios through its core capital, effective net worth, economic capital and return on equity. Regarding capital adequacy, the Bank conducts its internal process based on the standards of the FMC, which are in force as of December 1, 2021 (Basel III). Economic capital is the capital required to bear the full risk of doing business at a given level of solvency.

Capital is managed according to the risk environment, Chile's economic performance and the economic cycle. The respective Committee may amend our existing capital policies to address changes in the above-risk environment.

Capital risk management

The Bank has an Executive Capital Committee responsible for overseeing, authorising and assessing all aspects of capital and solvency. The Board of Directors has deferred to the ALCO the knowledge and assessment of the capital levels and returns in line with the Bank's strategy. In addition, the Integrated Risk Committee monitors and is responsible for the limits of primary and secondary metrics based on risk appetite.

Capital management is based on a Capital Framework designed to ensure that the capital, structure and composition level are appropriate at any point in time considering the Bank's risk profile and under different scenarios. It warrants the adherence to the minimum regulatory requirements, the risk appetite and the Recovery Plan, and that these frameworks align with the interests of all stakeholders while supporting the growth strategy determined by the Bank.

The capital model defines the functional and governance aspects of capital planning, budget execution and monitoring, capital adequacy analysis, capital measurement, and capital reporting and disclosure. In addition, this model covers the main capital management activities:

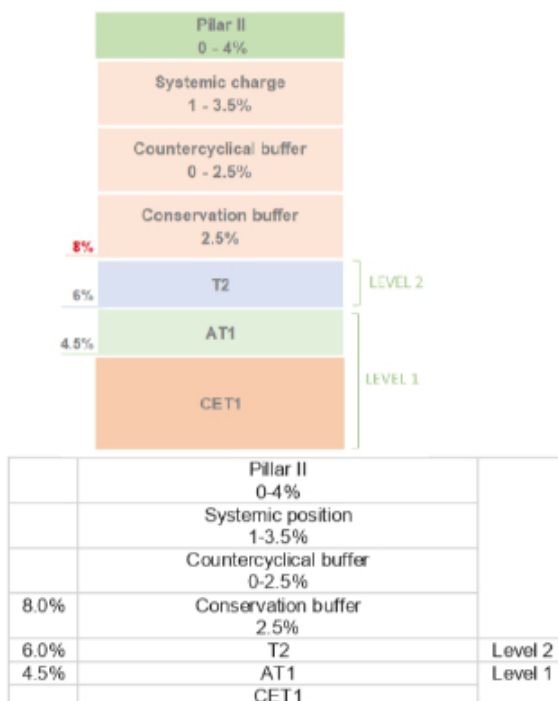

1. Establish the Bank's solvency and capital contribution targets aligned with minimum regulatory requirements and internal policies to ensure a strong level of capital, consistent with the Bank's risk profile and efficient use of capital to maximise shareholder value.
2. Development of a capital plan to meet these objectives consistent with the strategic plan.
3. Capital adequacy assessment to ensure that the capital plan is consistent with the Bank's risk profile and risk appetite (also stress scenarios).
4. Capital budget development as part of the Bank's budget process.
5. Monitoring and controlling budget execution and developing of action plans to correct any deviations from the budget.
6. Calculation of capital metrics.
7. Internal capital reporting and reporting to supervisory authorities and the market.

The Bank has also developed the necessary policies to manage and fulfil capital management strategies and objectives, including Capital Adequacy Policy, Capital Planning Policy, Capital Impairment Management Policy, Capital Monitoring Policy, and Dividend Policy, BASILEA III Implementation.

NOTE 48 - INFORMATION ON REGULATORY CAPITAL AND CAPITAL ADEQUACY INDICATORS, continued

A new version of the General Banking Law (LGB) was published in January 2019. Adopting the capital levels established in the Basel III standards is among the most relevant changes. In 2020, the final versions of the rules governing the new capital models for Chilean banks were published.

According to the new General Banking Law (updated through Law No 21,130), the minimum capital requirements have increased in quantity and quality. Total regulatory capital remains at 8% of risk-weighted assets but includes credit, market and operational risk. Minimum Tier 1 capital increased from 4.5% to 6% of risk-weighted assets, of which up to 1.5% can be Additional Tier 1 (AT1), either in the form of preferred shares or bonds with no fixed maturity which can be convertible into shares. Tier 2 capital is now set at 2% of risk-weighted assets.

Additional capital requirements are incorporated through a conservation buffer of 2.5% of risk-weighted assets. Furthermore, in coordination with the FMC, the Central Bank may establish an additional countercyclical buffer of up to 2.5% of risk-weighted assets consistent with the FMC. Both buffers should be composed of core capital.

In addition, the FMC was empowered, subject to the favourable agreement of the Council of the Central Bank of Chile (BCC), to define by regulation the new methodologies for calculating assets weighted by credit, market and operational risk; the conditions for issuing hybrid AT1 instruments; the determination and capital charges for local systemically important banks; prudential discounts to regulatory capital; and to require additional measures, including higher capital, for banks with deficiencies in the supervisory capital assessment process (Pillar II).

Pillar II aims to ensure that banks maintain a level of capital commensurate with their risk profile and encourage the development and use of appropriate processes for monitoring and managing the risks they face. To this end, banks are responsible for developing an internal capital adequacy assessment process. Supervisors should review their internal strategies and assessments and intervene early when they are not satisfied with the outcome of this process. As a result, supervisors may require additional capital over and above the minimum requirement to ensure a sufficient level to address risks, especially in adverse credit cycles.

The result will be a simplified report with the conclusions of the self-assessment process, which in its first version in 2021 will only include credit risk, and in 2022 will only include Pillar I risks. From 2023, a full report will be required.

NOTE 48 - INFORMATION ON REGULATORY CAPITAL AND CAPITAL ADEQUACY INDICATORS, continued

Pillar III promotes market discipline and financial transparency by disclosing meaningful and timely information, allowing information users to understand the risk profile of local banking institutions and their capital structure, thereby reducing information asymmetries. Banks must publish the first Pillar III document with information for the quarter of January - March 2023.

The new rules for calculating risk-weighted assets came into force in December, 2021. Therefore, the Bank implemented the rules through a multidisciplinary group, which conducted the required developments, including applying the files designed by the regulator for this purpose.

Capital metrics

Minimum capital requirement

Under the General Banking Law, a bank must have a minimum of UF800,000 (approximately MCh\$28,871 or US\$36,047 million as of June 30, 2023) of paid-in capital and reserves, calculated under FMC Rules.

Capital requirement

According to the General Law of Banks, banks must maintain regulatory capital of at least 8% of risk-weighted assets, net of required credit loss, as well as a paid-in capital and reserve requirement ('core capital') of at least 3% of total assets, also net of credit loss. Regulatory and core capital is calculated based on the Interim Consolidated Financial Statements prepared under the CASB issued by the FMC. As Santander is the result of a merger between two predecessors with a relevant market share in the Chilean market, a minimum regulatory capital to risk-weighted assets ratio of 9.63% is currently required.

Regulatory capital is defined as the aggregate of:

- a bank's paid-up capital and reserves, excluding capital attributable to foreign subsidiaries and branches or core capital;
- its subordinated bonds, valued at their placement price (but decreasing by 20.0% for each year during the period beginning six years before maturity), for up to 50.0% of their basic capital; and
- its voluntary provisions for credit loss of up to 1.25% of risk-weighted assets.

As of August 21, 2020, Circular No 2,265 indicating the new treatment was published, in which the amounts of loans guaranteed by the Chilean Treasury, CORFO and FOGAPE are incorporated into category 2 of the risk-weighted asset classification, and consequently, their credit risk weighting was reduced from 100% to 10%.

As of March 31, 2023, the FMC issued a press release in which it informed about the annual rating of systemically important banks and established requirements. The statement informed that the Board approved resolution No 2,319 on this rating, thus maintaining for another year the requirement of an additional core capital charge of 1.5% for the bank.

As of May 24, 2023, the FMC issued a press release informing about the activation of the Countercyclical Capital requirement. According to the decision of the Central Bank, at its Financial Policy Meeting (RPF) in the first half of 2023, the board of the Central Bank of Chile agreed to activate the Countercyclical Capital Requirement at a level of 0.5% of risk-weighted assets, enforceable within one year, with the unanimous prior favourable report of the FMC, as a precautionary measure in the face of higher external financial uncertainty.

From December 1, 2021, the definition of regulatory capital changed and is defined as follows:

- Paid-up capital of the bank in terms of subscribed and paid-up ordinary shares;
- Surcharge paid for the instruments included in this capital component;
- Reserves, both non-earnings and earnings, for depreciation of bonds with no fixed maturity and forfeiture of bonds with no fixed maturity;
- Items of 'Accumulated other comprehensive income';
- Retained earnings from prior years, profit (loss) for the year, net of provisions for minimum dividend, the repricing of bonds with no fixed maturity and interest and/or dividend payments on issued regulatory capital financial instruments.
- Non-controlling interest as indicated in the Compendium of Accounting Standards (CASB).

NOTE 49 - SUBSEQUENT EVENTS

Group

In 2023, the company PagoNxt Trade Chile SpA was established in Chile, whose sole shareholder is PagoNxt Trade SL domiciled in Spain. As of July 2023, PagoNxt Trade Chile SpA will be consolidated in the financial statements of Banco Santander Chile as the relevant activities of that company starting during that month are determined by the Bank and, therefore, the Bank exercises control.

Issuance of Interim Consolidated Financial Statements

As of July 28, 2023, the Directors and Audit Committee approved these Interim Consolidated Financial Statements.

There are no other subsequent events to be disclosed between July 1, 2023, and the date of issue of these Interim Consolidated Financial Statements (July 28, 2023).
