Loans to GDP (%)¹

1 Loans to companies over GDP

The large corporates make up around 1% of all the companies, but have 80% of the total debt.

Commercial lending by type of client²

2 Loans to individuals over GDP

The mortgage market is deep in Chile and many households have long-term stable debt.

Calidad de activo estable durante distintos ciclos económicos

All financial institutions regulated by the CMF (previously the SBIF) use Chilean Bank GAAP as the accounting standard. The main difference to other accounting standards is that under Chilean Bank GAAP, loan loss allowances are calculated based on specific guidelines set by the local regulator, using an expected loss approach. Through the years, the local regulator has been updating their standardized provisioning models, becoming more conservative. To date, the local regulator has announced that it will not be adopting IFRS 9.

Total loans: Non-performing loans (NPL) and coverage (%)

Competition has been consolidating throughout the years

Total loans to clients by bank

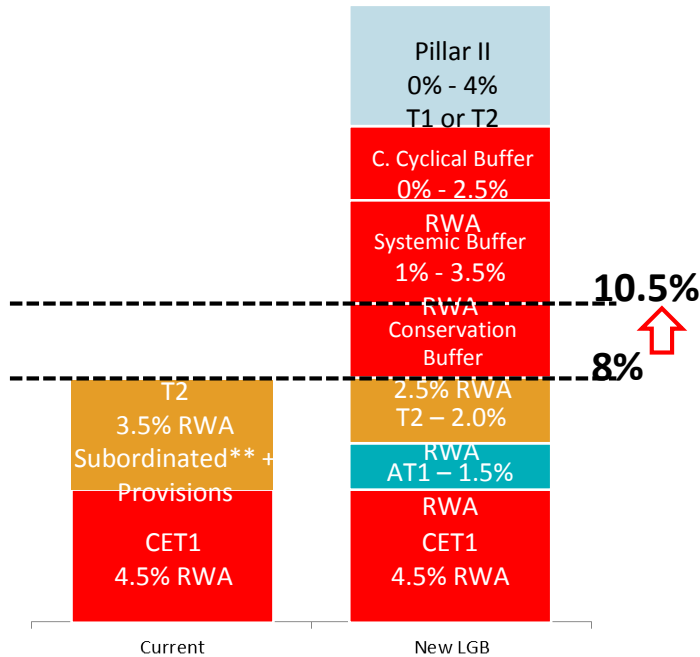

Santander's growth has been organic throughout the years, but recently acquired Santander Consumer Chile, an autofinancing company.
